Effective visualization is the best way to communicate information from the increasingly large and complex datasets in the natural and social sciences. But with the increasing power of visualization software today, scientists, engineers, and business analysts often have to navigate a bewildering array of visualization choices and options. This practical book takes you through many commonly encountered visualization problems, and it provides guidelines on how to turn large datasets into clear and compelling figures. What visualization type is best for the story you want to tell? How do you make informative figures that are visually pleasing? Author Claus O. Wilke teaches you the elements most critical to successful data visualization. Explore the basic concepts of color as a tool to highlight, distinguish, or represent a value Understand the importance of redundant coding to ensure you provide key information in multiple ways Use the book's visualizations directory, a graphical guide to commonly used types of data visualizations Get extensive examples of good and bad figures Learn how to use figures in a document or report and how employ them effectively to tell a compelling story

preparing copy and graphics, selecting mailing lists, telemarketing, and advertising in all types of media--an unbeatable source of direct marketing ideas that really work. Here's what the pros have said about previous editions of Bill Cohen's Building a Mail Order Business: "Dr. Bill Cohen's book thoroughly explores the many facets, and pitfalls, facing the budding mail order entrepreneur."-- Henry R. "Pete" Hoke, Jr., Publisher, Direct Marketing "It took a mail order businessman who is also an educator to put direct mail and mail order guidelines all in one place--and in language we can all understand."--Freeman F. Gosden, Jr., President, Smith-Hemmings-Gosden, one of the nation's largest direct marketing advertising agencies "An outstanding primer for our industry. It gives you the nuts and bolts necessary to carry you through almost every aspect of mail order from the very rudimentary basics to the same techniques used by the pros."-- Joe Sugarman, JS&A "One of the best books I've ever read on the subject. I enthusiastically recommend Building a Mail Order Business to any man or woman who is serious about getting involved in this fascinating activity."-- E. Joseph Cossman, President, Cossman International, Inc., author of How I Made a Million Dollars in Mail Order "An excellent, informative, comprehensive, illustrative workbook that will help anyone get started making money in the fascinating field of mail order. I highly recommend this professional book."--Melvin Powers, mail order entrepreneur "...must reading for the entrepreneur whose mind is on mail order."-- Paul Muchnick, Chairman, National Mail Order Association "Its good sense and nuts-and-bolts, bottom-line

Written by two leaders in the field of pediatric dermatology, this classic text provides both detailed content for the specialist and easily accessible information for the non-dermatologist and less experienced clinician. Paller and Mancini – Hurwitz Clinical Pediatric Dermatology, 6th Edition, comprehensively covers the full range of skin disorders in children, offering authoritative, practical guidance on diagnosis and treatment in a single volume. This award-winning, evidence-based text has been fully revised and updated, and is an essential resource for anyone who sees children with skin disorders. Features new content outline boxes for faster navigation, hundreds more clinical images, and authors' tips for the diagnosis and treatment of pediatric skin diseases. Contains updated, evidence-based guidance and the latest drug developments and disease classifications. Provides a careful balance of narrative text, useful tables, and 1,300 high-quality clinical photographs, helping you recognize virtually any skin condition you're likely to see. Includes a greatly expanded discussion of atopic dermatitis and psoriasis and new therapeutic approaches for treating genetic disorders and systemic diseases such as ichthyoses and rheumatologic disorders. Discusses new tests for subclassifying disease, such as the myositis-specific antibodies of juvenile dermatomyositis, genotyping, and immunophenotypes of inflammatory skin disorders. Contains new and updated tables on psoriasis co-morbidities, genetic syndrome classifications, acne therapies, pediatric histiocytoses, PHACE syndrome

dedicated group of painters transformed the perception of what had long been considered a marginal medium. Artists of all ages, styles, and backgrounds took up watercolor in the 1870s, inspiring younger generations of impressionists and modernists. By the 1920s many would claim it as "the American medium." This engaging and comprehensive book tells the definitive story of the metamorphosis of American watercolor practice between 1866 and 1925, identifying the artist constituencies and social forces that drove the new popularity of the medium. The major artists of the movement - Winslow Homer, John Singer Sargent, William Trost Richards, Thomas Moran, Thomas Eakins, Charles Prendergast, Childe Hassam, Edward Hopper, Charles Demuth, and many others - are represented with lavish color illustrations. The result is a fresh and beautiful look at watercolor's central place in American art and culture.

Ishtyle follows queer South Asian men across borders into gay neighborhoods, nightclubs, bars, and house parties in Bangalore and Chicago. Bringing the cultural practices they are most familiar with into these spaces, these men accent the aesthetics of nightlife cultures through performance. Kareem Khubchandani develops the notion of "ishtyle" to name this accented style, while also showing how brown bodies inadvertently become accents themselves, ornamental inclusions in the racialized grammar of desire. Ishtyle allows us to reimagine a global class perpetually represented as docile and desexualized workers caught in the web of global capitalism.

The book highlights a different kind of labor, the embodied work these men do to feel queer and sexy together. Engaging major themes in queer studies, Khubchandani explains how his interlocutors' performances stage relationships between: colonial law and public sexuality; film divas and queer fans; and race, caste, and desire. Ultimately, the book demonstrates that the unlikely site of nightlife can be a productive venue for the study of global politics and its institutional hierarchies.

This long-awaited textbook is the most comprehensive introduction to a broad swath of combinatorial and discrete mathematics. The text covers enumeration, graphs, sets, and methods, and it includes both classical results and more recent developments. Assuming no prior exposure to combinatorics, it explains the basic material for graduate-level students in mathematics and computer science. Optional more advanced material also makes it valuable as a research reference. Suitable for a one-year course or a one-semester introduction, this textbook prepares students to move on to more advanced material. It is organized to emphasize connections among the topics, and facilitate instruction, self-study, and research, with more than 2100 exercises (many accompanied by hints) at various levels of difficulty. Consistent notation and terminology are used throughout, allowing for a discussion of diverse topics in a unified language. The thorough bibliography, containing thousands of citations, makes this a valuable source for students and researchers alike.

climate and the hydrological system, supporting organisms and ecosystems, and contributing to the well-being of human communities and economies. Recognizing the importance of these two geophysical fluids, NASA designed the Plankton, Aerosol, Cloud and ocean Ecosystems (PACE) mission to bring cutting edge technology to space borne measurements of the atmosphere and ocean. PACE will carry the Ocean Color Instrument (OCI), a radiometer with hyperspectral capability from the ultraviolet through the near-infrared, plus eight discreet shortwave infrared bands. Thus, OCI will measure the broadest solar spectrum of any NASA instrument, to date. PACE's second instrument will be a Multi-Angle Polarimeter (MAP). MAP will be NASA's first imaging polarimeter on board a comprehensive Earth science mission. These instruments bring new capability to the science community, but also new challenges. Fundamentals, such as basic radiative transfer models, require review, enhancements and benchmarking in order to meet the needs of the atmosphereocean communities in the PACE era. Both OCI and MAP will bring opportunities to continue heritage climate data records of aerosols and clouds and to advance characterization of these atmospheric constituents with new macrophysical and microphysical parameters. The ability to better characterize atmospheric constituents is a necessity to better separate ocean and atmosphere signals in order to fully realize the potential of PACE measurements for oceanic observations. Atmospheric correction in the PACE era must address the expanded wavelength range and resolution of OCI images, requiring new

approaches that go beyond heritage algorithms. This Research Topic encompasses fundamental radiative transfer studies, with application to the atmosphere, ocean or coupled atmosphere-ocean system. It includes remote sensing of aerosols, clouds and trace gases, over ocean or over land, but with particular focus on algorithms that take advantage of OCI's new capabilities or multi-angle polarimetry. The Research Topic embraces studies of atmospheric correction over ocean including addressing issues of aerosols, cloud masking, foam, bubbles, ice etc., as well as ocean bio-optics and biogeochemical studies taking advantage of the PACE and polarization spectral capabilities.

This book covers how Internet of Things (IoT) has a role in shaping the future of our communities. The author shows how the research and education ecosystem promoting impactful solutions-oriented science can help citizenry, government, industry, and other stakeholders to work collaboratively in order to make informed, socially-responsible, science-based decisions. Accordingly, he shows how communities can address complex, interconnected socio-environmental challenges. This book addresses the key inter-related challenges in areas such as the environment, climate change, mining, energy, agro-economic, water, and forestry that are limiting the development of a sustainable and resilient society -- each of these challenges are tied back to IoT based solutions. Presents research into sustainable IoT with respect to wireless communications, sensing, and systems Provides coverage of IoT technologies in

Trusted by radiologists, interventional radiologists, vascular and interventional fellows, residents, and sonographers through six outstanding editions, the revised 7th Edition covers all aspects of ultrasound vascular diagnosis, including peripheral veins and arteries, carotid and vertebral arteries, abdominal vessels, and transcranial Doppler. Step-by-step explanations, all highly illustrated, walk you through the full spectrum of ultrasound sonography practice, including all that's new in this quickly evolving field. Organizes sections with quick reference in mind: clinical rationale, anatomy, examination technique, findings, and interpretation. Includes 2,100 clinical ultrasound images and anatomic line drawings, including over 1,000 in full color. Features new coverage of noninvasive image-guided procedures, robotic embolization, laser therapy, new Doppler ultrasound and color images, and guidance on promoting patient relationships. The first of its kind, this book traces the evolution of motion picture technology in its entirety. Beginning with Huygens' magic lantern and ending in the current electronic era, it explains cinema's scientific foundations and the development of parallel enabling technologies alongside the lives of the innovators. Product development issues, business and marketplace factors, the interaction of aesthetic and technological demands, and the patent system all play key roles in the tale. The topics are covered sequentially, with detailed discussion of the transition from the magic lantern to Edison's invention of the 35mm camera, the development of the celluloid cinema, and the transition from celluloid to digital. Unique and essential reading from a lifetime innovator in the field of cinema technology, this engaging and well-illustrated book will appeal to anyone interested in the history and science of cinema, from movie buffs to academics and members of the motion picture industry.

What the Spirit is Saying to the Church is an apocalyptic view from the letters to the seven churches in the book of Revelation that begins its message to the church admonishing her to return to her first love which she has abandoned. The author contends that this first love requirement demands a redirection of priorities for the Twenty-First-Century Church-in-the-Black-Experience. It demonstrates how, for the love of Christ, she must move beyond a limited vision of just a good-looking church and satisfaction with old definitions. Christ gives a rebuke to the church and a direct warning that if she does not repent and return to her first love, he will then remove her lampstand! "Reverend Kelley's preaching is spiritually sound and intellectually stimulating and challenging, and also socially relevant. He deeply believes in what I would call a well-rounded ministry. That is to say, that ministry for him involves not only mastering the preached Word, but also taking seriously and fulfilling the roles of pastor, priest, and prophet."-REV. DR. LEWIS V. BALDWIN, PHD, RETIRED PROFESSOR OF RELIGIOUS STUDIES, VANDERBILT UNIVERSITY. "Reverend Kelley is a preacher of the Word. His ability to prepare and deliver biblically sound, inspirational and spirit-filled sermons is a gift that allows those who hear him to participate in the story of salvation at personal and social levels. He is not a closed-lip babbler who preaches to itching ears, rather he speaks with power and authority under the watchcare of an humble spirit and a disciplined mind."-REV. DR. WALTER EARL

Lawrence of Arabia, The Miracle Worker, To Kill a Mockingbird, The Manchurian Candidate, Gypsy, Sweet Bird of Youth, The Longest Day, The Music Man, What Ever Happened to Baby Jane, and more. Most conventional film histories dismiss the early 1960s as a pallid era, a downtime between the heights of the classic studio system and the rise of New Hollywood directors like Scorsese and Altman in the 1970s. It seemed to be a moment when the movie industry was floundering as the popularity of television caused a downturn in cinema attendance. Cinema '62 challenges these assumptions by making the bold claim that 1962 was a peak year for film, with a high standard of quality that has not been equaled since. Stephen Farber and Michael McClellan show how 1962 saw great late-period work by classic Hollywood directors like John Ford, Howard Hawks, and John Huston, as well as stars like Bette Davis, James Stewart, Katharine Hepburn, and Barbara Stanwyck. Yet it was also a seminal year for talented young directors like Sidney Lumet, Sam Peckinpah, and Stanley Kubrick, not to mention rising stars like Warren Beatty, Jane Fonda, Robert Redford, Peter O'Toole, and Omar Sharif. Above all, 1962—the year of To Kill a Mockingbird and The Manchurian Candidate—gave cinema attendees the kinds of adult, artistic, and uncompromising visions they would never see on television, including classics from

Fellini, Bergman, and Kurosawa. Culminating in an analysis of the year's Best Picture winner and top-grossing film, Lawrence of Arabia, and the factors that made that magnificent epic possible, Cinema '62 makes a strong case that the movies peaked in the Kennedy era.

“The ‘how-to manual’ for whites to work with people of color to create an inclusive, just world in the 21st century.” —Maggie Potapchuk, racial equity consultant Over 50,000 copies sold of earlier editions! Completely revised and updated, this fourth edition of *Uprooting Racism* offers a framework around neoliberalism and interpersonal, institutional, and cultural racism, along with stories of resistance and white solidarity. It provides practical tools and advice on how white people can work as allies for racial justice, engaging the reader through questions, exercises, and suggestions for action, and includes a wealth of information about specific cultural groups such as Muslims, people with mixed heritage, Native Americans, Jews, recent immigrants, Asian Americans, and Latino/as. Inequalities in education, housing, health care, and the job market continue to prevail, while increased insecurity and fear have led to an epidemic of scapegoating and harassment of people of color. Yet, recent polls show that only thirty-one percent of white people in the United States believe racism is a major societal problem; at the same time, resistance is strong, as highlighted by indigenous struggles for land and sovereignty and the Movement for Black Lives. This accessible, personal, supportive, and practical guide is ideal for students, community activists, teachers, youth workers, and anyone interested in issues of diversity, multiculturalism, and social justice. “A uniquely sensitive, wise, practical guide for white people struggling with their feelings about race.” —Howard Zinn, national bestselling author of *A People’s History of the United States* “A powerful and wonderful book, a major contribution to our understanding of racism as white people.” —Judith H. issues such as politics, the environment, industry, and education. As a leisure guide, TEXAS MONTHLY continues to be the indispensable authority on the Texas scene, covering music, the arts, travel, restaurants, museums, and cultural events with its insightful recommendations. This book provides primary care clinicians, researchers, and educators with a guide that helps facilitate comprehensive, evidenced-based healthcare of women and gender diverse populations. Many primary care training programs in the United States lack formalized training in women's health, or if they do, the allotted time for teaching is sparse. This book addresses this learning gap with a solid framework for any program or individual interested in learning about or teaching women's health. It can serve as a quick in-the-clinic reference between patients, or be used to steer curricular efforts in medical training programs, particularly tailored to internal medicine, family medicine, gynecology, nursing, and advanced practice provider programs. Organized to cover essential topics in women's health and gender based care, this text is divided into eight sections: Foundations of Women's Health and Gender Based Medicine, Gynecologic Health and Disease, Breast Health and Disease, Common Medical Conditions, Chronic Pain Disorders, Mental Health and Trauma, Care of Selected Populations (care of female veterans and gender diverse patients), and Obstetric Medicine. Using the Maintenance of Certification (MOC) and American Board of Internal Medicine blueprints for examination development, authors provide evidence-based reviews with several challenge questions and annotated answers at the end of each chapter. The epidemiology, pathophysiology, evaluation, diagnosis, treatment, and prognosis of all disease processes are detailed in each chapter. Learning objectives, summary points, certain exam techniques, clinical pearls, diagrams, and images are added to enhance reader's engagement and
