How I learned to Invest When I started investing in the stock market, at 16 years old, it was overwhelming. There were many technical terms that I did not understand. I did not know how to find a good stock or even when to buy a stock. It was even more overwhelming that there were so many investing strategies- short selling, day trading, long-term investing; I did not know which one was the best for me. Even worse was that I did not know how to get started without the fear of losing my money. For many days, months and years, I studied the strategies that successful investors like Warren Buffet have used to become the best. After discovering an easy-to-learn formula for investing in stocks, I decided to create my portfolio. My first stock quickly jumped over 30%, and my second one increased by over 15% in less than 3 months. With an average investor gaining 8% per year, I destroyed the market, gaining 25% in only 3 months. After my success, I knew that my strategy is the best and foolproof. This strategy is so simple and effective that a 16-year-old kid was able to learn it and implement it. The strategy was created by a beginner investor, and for beginner investors. This is one of the only strategies that require no previous investing knowledge and can be easily understood.
