Throughout history, religion has been used as a tool of female subjugation. Women have been deemed less worthy than men, have been prevented from owning property, and worse--all in the name of a higher power. In recent decades, women have made progress in terms of equal rights with men, at least in Western democracies, but still, why has the United States never had a female president? Why aren't more women heads of Fortune 500 companies? Why do politicians in the West continue to attack women's reproductive rights? As this volume explores, it would be hard to find a bigger culprit than religion when identifying the last cultural barriers to full gender equality. With topics ranging from the subjugation of women in the Bible to the shame and guilt felt by women due to religious teaching, this volume makes clear that only by rejecting the very system that limits their autonomy will women be fully liberated from its malignant influences, not just in codified law but also in cultural practice.

Contemporary Issues in Corporate Social Responsibility presents the significant roles that universities must embrace in order to reverse the damage wrought by two centuries of urbanization, industrialization, and population increase. While many institutions include a course on social responsibility, studies on the education of social responsibility show that there are no commonly accepted teaching methods or guiding curriculum of corporate social responsibility. This book brings together a common sense of understanding about CSR teaching of European universities. Based on the accumulated knowledge and experience of a European project with 9 partner universities, the book contributes to the ongoing discussion of contemporary issues in CSR.
