Lawrence's autobiographical novel *Sons and Lovers* was written in four drafts between August 1910 and November 1912. During that period Lawrence's mother died, he broke for the final time with Jessie Chambers, the original of Miriam, had an affair with Alice Dax, the main model for Clara, had a year-long engagement to Louie Burrows, nearly died of pneumonia, gave up teaching, met Frieda Weekley who was to be his wife and life-companion, and lived abroad with her in Germany and Italy. When he began *Sons and Lovers* he was a schoolteacher in Croydon, South London. Writing after work in the evenings; when he completed it he was a full-time professional writer living with Frieda on the shores of Lake Garda. The writing of the novel and the life on which it was based were closely intertwined. Moreover, Frieda and Jessie crucially influenced the writing of the book. In Jessie's case she wrote sections of it herself as well as well as encouraging Lawrence to make it more directly autobiographical. In many ways the book is the result of dialogues with Jessie and Frieda. Jessie was devastated by the outcome, which she considered a slander and a betrayal. But Lawrence incorporated her answering voice, as well as Frieda's, in the text. This book combines biography and textual scholarship to bring to life the dramatic story of the writing of *Sons and Lovers*.

Draws on the latest research and scholarly thinking to reconstruct the personality and ideological clashes that marked the proceedings of the Constitutional Convention
Lactilla Tends her Fav'rite Cow brings together issues of gender, class, and species through a study of a selection of poetry by five eighteenth-century British laboring-class women poets: Mary Collier, Mary Leapor, Elizabeth Hands, Ann Yearsley and Janet Little. Extending the feminist concept of "interlocking oppressions" to include a consideration of the link between women and animals, this study suggests, ecocritically, that representations of nature are always more than mere imagination. By pairing laboring-class women poets and domesticated animals to read their representations as manifestations of oppression, Milne shows that both laboring-class women and animals are contained by conceptualizations and/or domesticating strategies that typically characterize them as laboring machines, as "mad," and as pets. *Lactilla Tends her Fav'rite Cow* benefits from the foundations set by earlier studies of laboring-class writers even as it extends their conclusions through the use of an explicitly ecocritical perspective.

Beloved classic about a little girl lost in a topsy-turvy land and her encounters with the White Rabbit, March Hare, Mad Hatter, Cheshire Cat and other delightfully improbable characters. 42 illustrations by Sir John Tenniel.

This study of Proust's famous novel *A la recherche du temps perdu* (*Remembrance of Things Past*) focuses on Venice, one of the hero's central obsessions, and shows how a whole network of allusions to art (from Titian to Turner, from Byzantine mosaic to Fortuny dresses) ties in with the hero's quest for self-knowledge and self-fulfilment.

Since the late 1780s historians and jurists have questioned what was uppermost in the minds of the framers of the United States Constitution. In surveying the thirteen states' experiences as colonies and under the Articles of Confederation, one is struck more by their great diversity than by their commonalities. In this groundbreaking historical work, Christopher Collier brings to the fore an interpretation virtually neglected since the mid-nineteenth century: the view from the states, in which the creation and ratification of the new Constitution reflected a unique combination of internal and external needs. *All Politics Is Local* closely analyzes exactly what Connecticut constituents expected their representatives to achieve in Philadelphia and suggests that other states' citizens also demanded their own special returns. Collier avoids popular theory in his convincing argument that any serious modern effort to understand the Constitution as conceived

by its framers must pay close attention to the state-specific needs and desires of the era. Challenging all previous interpretations, Collier demonstrates that Connecticut's forty antifederalist representatives were motivated not by economic, geographic, intellectual, or ideological factors, but by family and militia connections, local politics, and other considerations that had nothing at all to do with the Constitution. He finds no overarching truth, no common ideological thread binding the antifederalists together, which leads him to call for the same state-centered micro-study for the other twelve founding states. To do less leaves historical and contemporary interpretations of the U.S. Constitution not simply blurred around the edges but incomplete at the core as well. Collier delights and surprises readers in proving—with his trademark impeccable historical scholarship, firm grasp of known sources, and ample new material—that in the case of Connecticut, a stalwart defender of the provincial prerogative, all politics is and was, to one degree or another, local.

Bachelor Thesis from the year 2014 in the subject English Language and Literature Studies - Literature, grade: 1,7, TU Dortmund, course: English Language and Literature Studies, language: English, abstract: Although 'Pottermania', as the newspapers have called the huge hype around Joanne K. Rowling's Harry Potter books, has come to an end, the Harry Potter series can still be seen as the most influential and most popular fantasy novels of our time. Children and adults around the world have read the stories of how the adolescent wizard Harry and his friends Ron and Hermione fight against Lord Voldemort and his followers. Professors of the Anglistik and Amerikanistik, such as Prof. Dr. Kullmann even claim that Harry Potter has the potential to become a classic and can be mentioned in the same breath with Alice in Wonderland or The Hobbit (DieWelt2012). Despite all the praise for the novels, also many critics have reflected about and commented on J.K. Rowling's novels. In my bachelor thesis I am going to take a more critical look at the Harry Potter series, focusing mainly on Rowling's fifth novel titled Harry Potter and the Order of the Phoenix, which builds the basis of my text oriented analysis. As the title of my bachelor thesis: Aspects of race and parallels with the Third Reich in J.K. Rowling's Harry Potter and the Order of the Phoenix already reveals, I will examine the novel in terms of its hidden parallels towards the beliefs and practices in the Third Reich as well as the aspects of race and racism which become obvious while analyzing the novel.

Between 1808 and 1819 Samuel Taylor Coleridge delivered to audiences in Bristol and London more than a hundred lectures in twelve courses that may be broadly described as literary. These two volumes record these lectures, which discussed a variety of topics such as taste, education, superstition, and the Dark Ages in Europe, and which also reflected Coleridge's central concerns as a critic. Presents essays that analyze Chomsky's intellectual career and the evolution of his worldview.

Global poverty is falling quite rapidly for about eighty percent of the world. The real crisis lies in a group of about 50 failing states, the bottom billion, whose problems defy traditional approaches to alleviating poverty. The causes of failure include civil war, dependence on the export of natural resources, and bad governance. Standard solutions do not work against these traps, Collier writes; aid is often ineffective, and globalization can actually make matters worse. What the bottom billion need, he argues, is a bold new plan supported by the Group of Eight industrialized nations. In *The Bottom Billion*, Collier offers real hope for solving one of the great humanitarian crises facing the world today.

The Enlightenment saw a critical engagement with the ancient idea that music carries certain powers - it heals and pacifies, civilizes and educates. Yet this interest in musical utility seems to conflict with larger notions of aesthetic autonomy that emerged at the same time. In *Enlightenment Orpheus*, Vanessa Agnew examines this apparent conflict, and provocatively questions the notion of an aesthetic-philosophical break between the eighteenth and nineteenth centuries. Agnew persuasively connects the English traveler and music scholar Charles Burney with the ancient myth of Orpheus. She uses Burney as a guide through wide-ranging discussions of eighteenth-century musical travel, views on music's curative powers, interest in non-European music, and concerns about cultural identity. Arguing that what people said about music was central to some of the great Enlightenment debates surrounding such issues as human agency, cultural difference, and national identity, Agnew adds a new dimension to postcolonial studies, which has typically emphasized the literary and visual at the expense of the aural. She also demonstrates that these discussions must be viewed in context at the era's broad and well-entrenched transnational network, and emphasizes the importance of travel literature in generating knowledge at the time. A new and radically interdisciplinary approach to the question of the power of music - its aesthetic and historical interpretations and political uses -

Enlightenment Orpheus will appeal to students and scholars in historical musicology, ethnomusicology, German studies, eighteenth-century history, and comparative studies.

Patrick Collier brings an impressive array of archival research to the first full-length study of Modernism's relationship to the newspaper press. His discussions of T. S. Eliot, James Joyce, Virginia Woolf, Rebecca West, and Rose Macaulay show how their work participated in contemporary debates about journalism. His book is a major contribution to our understanding of the role journalism played in establishing the careers of Modernist writers.

Beyond the frontiers of reason there extends the vast, shadowy world of fantasy, where monsters lurk in the gloomy depths, vampires flit across the face of the moon, and imagination reigns supreme. Franz Rottensteiner explores the world of fantasy as it appears in the literature of the West. The dark side of the mind, that fascinating and perilous Dream State, has produced its own literature of the weird, the uncanny, and the demoniac. Since the beginning of time, storytellers have told of remote and exotic realms filled with ghosts, werewolves, ghouls, and zombies. From the clinical horrors of Edgar Allan Poe to the nightmare bureaucracy of Kafka; from Frankenstein to Alice in Wonderland; from Rider Haggard to C.S. Lewis; from the Jewish ghetto of the golem to the decayed castle of Gormenghast - The Fantasy Book presents a spectral march of figures and themes from the edge of reality, and beyond.
