

## Ancient Civilization Test Questions Grade 6 Erpd

Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why. It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity, history, and the contemporary world. All chapters include lesson ideas, a sample lesson plan with activity sheets, primary source documents, and helpful charts, graphs, photographs, and maps. High school students' responses are woven in throughout. Additional material corresponding to each chapter is posted online at [http://people.hofstra.edu/alan\\_j\\_singer](http://people.hofstra.edu/alan_j_singer). The traditional curriculum tends to highlight the Western heritage, and to race through epochs and regions, leaving little time for an in-depth exploration of concepts and historical themes, for the evaluation of primary and secondary sources, and for students to draw their own historical conclusions. Offering an alternative to such pre-packaged textbook outlines and materials, this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it.

In the 1990s the debate over what history, and more importantly whose history, should be taught in American schools resonated through the halls of Congress, the national press, and the nation's schools. Politicians such as Lynne Cheney, Newt Gingrich, and Senator Slade Gorton, and pundits such as Rush Limbaugh, John Leo, and Charles Krauthammer fiercely denounced the findings of the National Standards for History which, subsequently, became a major battleground in the nation's ongoing struggle to define its historical identity. To help us understand what happened, Linda Symcox traces the genealogy of the National History Standards Project from its origins as a neo-conservative reform movement to the drafting of the Standards, through the 18 months of controversy and the debate that ensued, and the aftermath. Broad in scope, this case study includes debates on social history, world history, multiculturalism, established canons, national identity, cultural history, and "liberal education." Symcox brilliantly

illuminates the larger issue of how educational policy is made and contested in the United States, revealing how a debate about our children's education actually became a struggle between competing political forces.
