When a loved one dies in a mysterious manner, we rely on coroners and medical examiners to tell us what happened. The stakes are high: Coroners seek justice for the dead, exoneration for the wrongfully accused, and closure for the families of victims. They are always on call and work closely with law enforcement. Author Robert S. West, who served as a physician-coroner in rural Kootenai County, Idaho, from 1970 to 2011, delves into the challenges he faced on the job. While he often lacked resources, he always did the best he could to serve his community, solving numerous mysteries using the tactics of forensic medicine. Dr. West also explores the shortcomings of the coroner/medical examiner system and how it can be improved. Widely varying educational requirements and unrealistic expectations need to be balanced in order to fill the shortage of forensic pathologists while enhancing the training of current coroners. Join a coroner from rural northern Idaho as he looks back at his career's most challenging cases and explains how to reform the system in *It Can (and Does) Happen Here!*

Written for the citizen consumer, healthcare professional and employer who asks: What is health reform going to mean for me? If you want to know more, this is the book for you. It is written in response to politicians attempting to hijack healthcare at the expense of the American people. As both a physician and economist, Dr. Smith plainly lays out the problems and real, workable solutions. With clinical and administrative experience, Dr. Smith has worked in every area of healthcare, from hospitals to insurance companies. She has seen what's worked and what hasn't in the United States, Europe and the Third World. The answers to how healthcare is actually delivered and where the money is really going will likely surprise you. If we are going to have a serious debate about healthcare, it is time for the American people, healthcare professionals and employers to fully understand and reclaim this most important issue.

International Record of Medicine and General Practice Clinics Healthcare Solved - Real Answers, No Politics Debra A Smith

There have always been homeless people in the United States, but their plight has only recently stirred widespread public reaction and concern. Part of this new recognition stems from the problem's prevalence: the number of homeless individuals, while hard to pin down exactly, is rising. In light of this, Congress asked the Institute of Medicine to find out whether existing health care

How our colleges and universities can respond to the changing hopes and needs of society In recent decades, cognitive psychologists have cast new light on human development and given colleges new possibilities for helping students acquire skills and qualities that will enhance their lives and increase their contributions to society. In this landmark book, Derek Bok explores how colleges can reap the benefits of these discoveries and create a more robust undergraduate curriculum for the twenty-first century. Prior to this century, most psychologists thought that creativity, empathy, resilience, conscientiousness, and most personality traits were largely fixed by early childhood. What researchers have now discovered is that virtually all of these qualities continue to change through early adulthood and often well beyond. Such findings suggest that educators may be able to do much more than was previously thought possible to teach students to develop these important characteristics and thereby enable them to flourish in later life. How prepared are educators to cultivate these qualities of mind and behavior? What do they need to learn to capitalize on the possibilities? Will college faculties embrace these opportunities and make the necessary changes in their curricula and teaching methods? What can be done to hasten the process of innovation and application? In providing answers to these questions, Bok identifies the hurdles to institutional change, proposes sensible reforms, and demonstrates how our colleges can help students lead more successful, productive, and meaningful lives.
