This book is an unpretentious editing venture to fill the gap in our current knowledge on the ecological implications caused by anthropogenic disturbances upon benthic communities in several regions of the world, including the Western Atlantic, the Mediterranean Sea, and the Eastern Pacific Ocean, as well as the pristine environments of the Andes in South America. The common goal of the contributing authors in this book was to unravel the complex processes that make possible the life existence of bottom-living animals in different environmental scenarios. To achieve such a goal, the authors focus their attention on the emerging issues inherent to global climate change or the pollution of aquatic systems. These are all themes that might be of interest to scientists active in a wide range of oceanographic subdisciplines. Well-established researchers would appreciate the innovative approach adopted in each chapter of the book, which extends from the ecosystem level to refined molecular interpretations.

When caffeine-addicted reporter Garth Ross is assigned to co-author a biography of a big Hollywood movie producer, Mylo Jensen, he jumps at the chance. Thriving on his work, getting a charge out of interviewing people, Garth sniffs out the story; one which is supposed to be a 'rags-to-riches' tale of a movie mogul. Until, his reporter's sixth sense kicks in. During an interview with a family friend, Garth uncovers another angle for this book, and it isn't about the producer's success. Jayce Lennox had thought his past was long behind him, until a nosy reporter gets into his business. As Garth uncovers the truth behind the lies, he discovers an old secret that should have lain dormant. But, what Garth suspects is the polar opposite from the facts he learns. And his wrong assumptions nearly destroy the man he was asked to promote. Footprints in the snow...sometimes the trail leads to something totally unexpected. Included in this novel is a debut short story; Seduction of a Straight Man, by up and coming new author, Keith Ory.
