The advancement of the software industry has had a substantial impact not only on productivity and on GDP growth globally, but also on our daily work and life. Software business refers to commercial activity of the software industry, aimed at generating income from delivery of software products and software services. Although software business shares common features with other international knowledge-intensive businesses, it carries many inherent features making it an intriguing and challenging domain for research. Until now, however, software business has received little attention from the academic community. The First International Conference on Software Business (ICSOB 2010) was organized in Jyvaskyla during June 21–23, 2010. This inaugural conference brought together a strong Program Committee of 52 members with research disciplines from various fields of business management and technology management as well as international forums with members coming from 17 countries from South and North America to Europe, India and Australia.

We received 35 research paper submissions. The papers went through a double-blind review process producing at least three reviews for each accepted paper. The Program Committee accepted 13 submissions to be presented as full papers in the conference, equaling 37% of the submissions. In addition, ten papers were accepted as short papers. The accepted papers represent the wide variety of research activity on software business. For the purposes of the conference program, the papers

were organized under eight themes: business models, business management, ecosystems, education and research, internationalization, open source software and social media, product management, and software as a service. In addition to the paper sessions, the conference program included three keynote presentations and a Business Innovation Track containing best-practice presentations from the software industry. The conference program also included two workshops, three tutorials and an adjunct meeting of the Cloud Software Consortia.

This book constitutes the refereed proceedings of the European Conference on Information Literacy, ECIL 2014, held in Dubrovnik, Croatia, in October 2014. The 93 revised full papers presented together with two keynotes and one invited paper were carefully reviewed and selected from 283 submissions. The papers are organized in topical sections on theoretical framework; related concepts; research; rights and ethics; children; higher education; education and instruction; assessment and evaluation; libraries; different aspects.

How do lawyers construct closing arguments? How do literary critics substantiate their original claims? How do op ed writers convince others that their arguments are valid and credible? The answers are clear: Through inquiry, research, analysis, and composition. *From Inquiry to Argument* blends inquiry, research, and argument by interweaving a discussion of argumentation strategies with instruction in critical thinking and research skills and with writing tasks important to research and argument. This book's approach gives readers a reason to research - to find ideas and information for their arguments - and also helps them build better arguments through analysis. This book covers academic documentation in both MLA and APA styles, while also addressing informal means of citation. Numerous professional readings, as well as nine writing samples, expose readers to different types of writing and provide a base for primary research. The coverage of argument addresses such related topics as critical thinking, logic and fallacies, and the appeals, and presents Toulmin logic as a touchstone for the discussion of argument. Lawyers, business professionals, instructors of critical reading and writing, and anyone else involved with formal or informal persuasive writing and debating.

The International Student's Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time. This book is partly an update of *Writing a Research Paper* (by Lionel Menasche, 1998) and partly a companion to *The ESL Writer's Handbook*. Like *WRP*, teachers can move through the writing process in stages to end up with a thorough and coherent research paper. Like a handbook, the text is less dense, with explanations provided in sections for easy comprehension and practice exercises included.

This issue of *WSQ* spotlights educators' efforts to transform the curriculum in

community colleges, where women make up the majority of the students and over half of the faculty.

This book offers a much needed alternative to the more traditional texts used to teach writing instruction. Grounded in history, the book clarifies changing theoretical and practical approaches to teaching writing, critically assessing each approach in relation to the social and political movements of the day, both within and beyond the university. The author takes us inside the real world of writing instruction; not only from the viewpoint of instructor, but as seen through the eyes of students struggling to make sense of the expectations of writing class. Mitchell emphasizes that "writing" entails far more than putting words to paper, and delves into contextually variable culturally defined expectations, that include multiple linguistic forms - both oral and written - highlighting the complexity of writing(s), while engaging the reader in lively academic debates about language and society.

formulas or templates, Cioffi urges writers to envision argument as an active parsing of experience that imaginatively reinvents the world. Cioffi's manifesto asserts that successful argument also requires writers to explore their own deep-seated feelings, to exploit the fuzzy but often profoundly insightful logic of the imagination. But expression is not all that matters: Cioffi's work anchors itself in the actual. Drawing on Louis Kahn's notion that a good architect never has all the answers to a building's problems before its physical construction, Cioffi maintains that in argument, too, answers must be forged along the way, as the writer inventively deals with emergent problems and unforeseen complexities. Indeed, discovery, imagination, and invention suffuse all stages of the process. *The Imaginative Argument* offers all the intellectual kindling that writers need to ignite this creativity, from insights on developing ideas to avoiding bland assertions or logical leaps. It cites exemplary nonfiction prose stylists, including William James, Ruth Benedict, and Erving Goffman, as well as literary sources to demonstrate the dynamic of persuasive writing. Provocative and lively, it will prove not only essential reading but also inspiration for all those interested in arguing more imaginatively more successfully. This edition features new chapters that cover the revision process in greater depth, as well as the particular challenges of researching and writing in the digital age, such as working with technology and avoiding plagiarism. The book also includes new sample essays, an appendix to help instructors use the book in the classroom, and much more. *THE RESEARCH WRITER* helps students transition from writing the research paper to doing research writing, from reporting information to working with ideas. The subtitle--Curiosity, Discovery, Dialogue--signals this shift: this handbook promotes research as a curiosity-driven activity that leads to discoveries that are then shared through various types of dialogue. With this practical and reader-friendly handbook, students will learn the research and writing skills needed for any research project and will be able to apply and transfer these skills to their own disciplines. Students can use *THE RESEARCH WRITER* to become more intelligent, ethically aware researchers, able not just to avoid plagiarism but to write with credibility while navigating the twenty-first century digital landscape.
