This highly anticipated, fully revised second edition revisits and augments the award-winning *Creating & Sustaining Civility in Nursing Education*. In this comprehensive new edition, author Cynthia Clark explores the problem of incivility within nursing academe and provides practical solutions that range from ready-to-use teaching tools to principles for broad-based institutional change. She further explores the costs and consequences of incivility, its link to stress, ways to identify the problem, and how to craft a vision for change – including bridging the gap between nursing education and practice. Rather than dwell on the negative, this book focuses on solutions, including role-modeling and mentoring, stress management, and positive learning environments. Nurse educators at all levels will appreciate the variety of evidence-based strategies that faculty – and students – can implement to promote and maintain civility and respect in the education setting, including online learning.

This comprehensive new textbook covers core ethical and legal content for pre-registration nursing students. It provides readers with a sound understanding of the interrelationships between the NMC's code of conduct, standards and competencies, ethics and relevant sections of the English legal system. The only truly integrated text in the field, it opens with overviews of law and nursing, and ethical theories and nursing. It goes on to explore key areas of contention – such as negligence, confidentiality and consent – from legal and ethical perspectives, mapping the discussion onto the NMC code of conduct. The chapters include objectives, patient-focused case scenarios, key points, activities, questions, areas for reflection, further reading and a summary. Case law and statutes and ethical theories are presented where appropriate. Written by an experienced nurse-lecturer with a law and ethics teaching background, *Law, Ethics and Professional Issues for Nursing* is essential reading for all pre-registration nursing students, as well as students of other healthcare professions.

This salient volume surveys the state of access to primary care and preventive health services by migrants, refugees, and asylum seekers across Europe. Experts in public health and allied fields identify obstacles to healthcare interventions for migrants, including costs, legal status, health-related behaviors and beliefs, and cultural and language barriers. The book includes the latest data concerning access to specific preventive services (e.g., vaccinations, colorectal screenings), specific issues of women and sexual minorities, and the potential for health promotion in prevention. Best practices for improving access are outlined as a basis for public health and policy directives toward reducing health disparities between migrant and native populations. Among the topics covered: Access to medical examination for prevention among migrants Access and barriers to infant vaccinations, female cancer screening and colorectal screening among migrant populations Provision and policy gap between the primary and preventive care required by and the care provided to LGBTQ+ migrants, refugees, and asylum seekers. Health related lifestyles and intermediate health conditions of migrants. Quality of primary healthcare and preventive health services provided to migrants Adaptations of primary health care for migrants Access to primary health care and policies on migration and health at a time of economic crisis Dedicated to bridging research and policy gaps in this vital area, *Primary Care Access and Preventive Health Services of Migrants* is intended for an international audience of academics, researchers, policymakers, and practitioners in public

health and related disciplines.
