From the author of the New York Times bestseller *The Inevitable*—a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed-or "what it wants." Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.

Self-Build Homes connects the burgeoning interdisciplinary research on self-build with commentary from leading international figures in the self-build and wider housing sector. Through their focus on community, dwelling, home and identity, the chapters explore the various meanings of self-build housing, encouraging new directions for discussions about self-building and calling for the recognition of the social dimensions of this process, from consideration of the structures, policies and practices that shape it,

through to the lived experience of individuals and households. Divided into four parts – Discourse, Rationale, Meaning; Values, Lifestyles, Imaginaries; Community and Identity; and Perspectives from Practice – the volume comes at a time of renewed focus from policy managers and practitioners, as well as prospective builders themselves, on self-build as a means for producing homes that are more stylised, affordable and appropriate for the specific needs of households. It responds to recent advances in housing and planning policy, while also bringing this into conversation with interdisciplinary perspectives from across the social sciences on housing, home and homemaking. In this way, the book seeks to update understandings of self-build and to account for housing as a distinctly social process.

When Richard Rumelt's *Good Strategy/Bad Strategy* was published in 2011, it immediately struck a chord, calling out as bad strategy the mish-mash of pop culture, motivational slogans and business buzz speak so often and misleadingly masquerading as the real thing. Since then, his original and pragmatic ideas have won fans around the world and continue to help readers to recognise and avoid the elements of bad strategy and adopt good, action-oriented strategies that honestly acknowledge the challenges being faced and offer straightforward approaches to overcoming them. Strategy should not be equated with ambition, leadership, vision or planning; rather, it is coherent action backed by an argument. For Rumelt, the heart of good strategy is insight into the hidden power in any situation, and into an appropriate response - whether launching a new product, fighting a war or putting a man on the moon. Drawing on examples of the good and the bad from across all sectors and all ages, he shows how this insight can be cultivated with a wide variety of tools that lead to better thinking and better strategy, strategy that cuts through the hype and gets results.

In 1956 John Osborne's *Look Back in Anger* changed the course of English theatre. 'Look Back in Anger presents post-war youth as it really is. To have done this at all would be a significant achievement; to have done it in a first play is a minor miracle. All the qualities are there, qualities one had despaired of ever seeing on stage - the drift towards anarchy, the instinctive leftishness, the automatic rejection of "official" attitudes, the surrealist sense of humour . . . the casual promiscuity, the sense of lacking a crusade worth fighting for and, underlying all these, the determination that no one who dies shall go unmourned.' Kenneth Tynan, *Observer*, 13 May 1956 'Look Back in Anger . . . has its inarguable importance as the beginning of a revolution in the British theatre, and as the central and most immediately influential expression of the mood of its time, the mood of the "angry young man".'
