

Bailey And Love Surgery 26th Edition

With over 1000 essential questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey & Love's Short Practice in Surgery, 26th edition. The book assists trainee surgeons as they prepare for examinations and enables them to test their knowledge of the principles and practice of surgery as outlined in Bailey & Love. Divided into 13 subject-specific sections and written by expert contributors, the MCQs and EMQs provide comprehensive coverage of the current surgical curriculum as well as the core learning points as set out in Bailey & Love. The book is ideally suited for the MRCS exam as well as for the first part of the FRCS (General Surgery) and the new Intercollegiate FRCS (International) exams. The book emphasises the importance of self-assessment within effective clinical examination and soundly based surgical principles while taking into account the latest developments in practice. This new edition includes many new contributors and enhanced chapters with answers provided in much greater detail. While the book is closely aligned with the content of the celebrated Bailey & Love, it also performs well as a standalone self-test guide and may be used independently. MCQs and EMQs in Surgery provides an invaluable revision tool for all candidates studying for the MRCS and FRCS exams.

This book provides up-to-date information on lymphatic filariasis supported with abundant images, tables and algorithms. It is a first such monograph on a disease that has varied presentations which are complete clinical entities, such as chyluria, hydrocele, elephantiasis, etc. This book consists of three parts, parasitology, acute clinical manifestations and chronic presentations of the disease. Approximately 120 million people are infected with lymphatic filariasis in tropical and subtropical countries. About a third of these suffer clinical consequences of this infection, and many are seriously disfigured. India, Indonesia and Nigeria are the most endemic countries in the world. In spite of Global Control Program of WHO, filariasis continues to be a significant medical challenge and current efforts underway will take a long time to bring it under control. Lymphatic Filariasis is meant for general surgeons, physicians, urologists and plastic surgeons, including the postgraduate students. Useful for epidemiologists, internists, and those involved in filariasis prevention programs.
