"How far this has been done, critics better read than myself must decide. I have endeavoured to speak fairly, to the best of my ability, of such classes of persons as fell in with the course of the narrative, according to such lights as the memoirs of the time afford. The Convent is scarcely a class portrait, but the condition of it seems to be justified by hints in the Port Royal memoirs, respecting Maubuisson and others which Mere Angelique reformed. The intolerance of the ladies at Montauban is described in Madame Duplessis Mornay's life; and if Berenger's education and opinions are looked on as not sufficiently alien from Roman Catholicism, a reference to Froude's History of Queen Elizabeth will show both that the customs of the elder English Church were still kept up by many of the country clergy, and like wise that a broad distinction was made by the better informed among the French between Calvinism and Protestantism or Lutheranism, in which they included Anglicanism. The minister Garden I do not consider as representing his class. He is a possibility modified to serve the purposes of the story."--Excerpt from the book.

This textbook has been designed to meet the needs of BSc Fourth Semester students of Botany as per the UGC Choice Based Credit System (CBCS). It acquaints the students with plant-water relations and throws light on mineral nutrition. It also covers translocation in phloem, photosynthesis, respiration and enzymes. In addition to these, the book also deals with the nitrogen and lipid metabolism, plant growth regulators and plant response to light and temperature. While it provides strong conceptual understanding of the subject, it also helps in developing scientific outlook of the student.
