The Pulitzer Prize-winning author of *Cleopatra*, the #1 national bestseller, unpacks the mystery of the Salem Witch Trials. It began in 1692, over an exceptionally raw Massachusetts winter, when a minister's daughter began to scream and convulse. It ended less than a year later, but not before 19 men and women had been hanged and an elderly man crushed to death. The panic spread quickly, involving the most educated men and prominent politicians in the colony. Neighbors accused neighbors, parents and children each other. Aside from suffrage, the Salem Witch Trials represent the only moment when women played the central role in American history. In curious ways, the trials would shape the future republic. As psychologically thrilling as it is historically seminal, *The Witches* is Stacy Schiff's account of this fantastical story -- the first great American mystery unveiled fully for the first time by one of our most acclaimed historians.

YOUNG AFRICAN AMERICAN LAWYER JIM REED seemingly has it all. Recently named a junior partner in an Atlanta law firm, Jim is shocked when he stops at his usual gas station and realizes the price of fuel has skyrocketed overnight to fifty dollars a gallon. It is 2033, and the world as Jim knows it is suddenly spinning wildly out of control. Sudden hyperinflation shocks everyone. As panic sets in, the value of the dollar plummets and the resulting devastation causes the United States to splinter into several countries, all of which adopt democratic rules except the Federated States, the one in which Jim Reed and girlfriend Linda Alonzo live. They find themselves citizens of a country governed by a white-supremacist dictatorship. Jim Reed joins a group of African American insurgents and finds himself involved in dangerous, bold attacks on Federated States targets. The insurrection causes the Federated States government to intern or exile the entire Federated States African American population. Reed goes into exile and as he recruits like-minded people to join together with the intent to destroy the Federated States Supremacist government, he conceives a plan that may just become the world's greatest act of terrorism.

This report describes the Act and states the reasons for our conclusion that the Act should be repealed. It also contains the text of the Act, describes the survey conducted of members of the legal profession regarding their views on the Act, and summarizes the most frequently expressed reasons for retaining the Act, and states why it was concluded that those reasons were overborne by those in favour of repeal. Finally, it describes some approaches that could be taken to reforming rather than repealing the Act.

Despite the fact that the majority of emigration today originates in the global south, most research has focused on the

receiving states of Europe and North America, while very little attention has been paid to the policies of the sending states toward emigration or toward their nationals abroad. Taking the country cases of Morocco, Tunisia, Lebanon and Jordan, this work explores the relationship between the government of the sending states, the outmovement of their citizens and the communities of expatriates that have developed. By focusing on the evolution of government institutions charged with various aspects of expatriate affairs, this work breaks new ground in understanding the changing nature of the relationship between expatriates and their home state. Far from suggesting that the state is waning in importance, the conclusions indicate that this relationship provides evidence both of state resilience and of new trends in the practice of sovereignty.

This is a completely, totally updated version of the #1 best-selling digital photography book of all time! It's the award winning, worldwide smash hit, written by Scott Kelby, that's been translated into dozens of different languages.

Here's how Scott describes this book's brilliant premise: "If you and I were out on a shoot, and you asked me, 'Hey, how do I get this flower to be in focus, with the background out of focus?', I wouldn't stand there and give you a photography lecture. In real life, I'd just say, 'Put on your zoom lens, set your f-stop to f/2.8, focus on the flower, and fire away.' That's what this book is all about: you and I out shooting where I answer questions, give you advice, and share the secrets I've learned just like I would with a friend—without all the technical explanations and techie photo speak."

This isn't a book of theory—full of confusing jargon and detailed concepts. This is a book on which button to push, which setting to use, and when to use it. With over 200 of the most closely guarded photographic "tricks of the trade," this book gets you shooting dramatically better-looking, sharper, more colorful, more professional-looking photos every time.

Each page covers a single concept that makes your photography better. Every time you turn the page, you'll learn another pro setting, tool, or trick to transform your work from snapshots into gallery prints. If you're tired of taking shots that look "okay," and if you're tired of looking in photography magazines and thinking, "Why don't my shots look like that?" then this is the book for you.

THE RIFLEMAN ran on TV from 1958-1963, and as a comic series from 1960-1962. The Rifleman was Lucas McCain, a Civil War veteran and widower who raised his young son in the 1870s-1880s New Mexico Territory. At a time when the Western was king, on TV and in the comics, The Rifleman entertained the young Baby Boomer generation! Gunman from Laredo starring Lucas McCain, Mark McCain, Yale Zander, Micah (Sheriff), Bill Collins, and Hoby Biggs; A hired killer named Zander, has come to town to kill somebody and nobody knows who. The Desert Trap The Key The comic reprints from are reproduced from actual classic comics, and sometimes reflect the imperfection of books that are decades old. Many people enjoy these authentic characteristics.

Canadians are beginning to learn about the negative effects of residential schools on Aboriginal people in Canada. More hidden in the written record, but bearing a similar powerfully destructive role, are Indian Agents, who were with very few exceptions White men who 'ruled the reserves' in Canada from the 1870s to the 1960s. This book is the first to present a discussion of Indian Agents in general. It provides an introductory look at the control Indian Agents exercised over Aboriginal communities throughout the period in question. The primary intent is to spark discussion in Indigenous studies courses. This book is built upon a discussion

of the lives and impact of five Indian Agents: Hayter Reed, William Morris Graham, John McIver, William Halliday, and Fred Hall. However, the practices and views of 39 other Indian Agents are interwoven throughout the text. Although there was a readily detectable sameness in the way that Indian Agent power was imposed on Aboriginal communities based on the institutional racism of the Indian Agent System, one of the points to be made is that not all Indian Agents were the same. Some were more oppressive than others. Also frequently pointed out is the fact that Aboriginal peoples were not merely helpless victims to Indian Agent control, but resisted that control, sometimes successfully. The book concludes with a chapter comparing the Indian Agent System in Canada, with similar systems in the United States, Australia, and New Zealand.

A riveting true story of the failure of the courts and police to protect a woman and her daughters.

In the Old Testament, God's people saw Him in a cloud by day and a pillar of fire by night. In the New Testament, the religious world thought they had God in a box behind the veil. When Jesus died, the veil was rent and God went public. In an ever changing world where the darkness prides itself by proclaiming they have psychic insights for every person, the church has become anemic, without as much as a sign, a miracle or a wonder. Where do we go from here? Faith is at a level the church has never known before. It is a faith being seen in the "here and now." We must understand what Jesus meant when He said, "I only do what I hear and what I see My Father do and say." You are about to enter that eternal zone, where time is losing its grip on the earth. Eternity is Invading Time.

Every six months, 450 fifteen-year-olds are kidnapped from their homes across the world. These kidnappings happen in the span of a week, as reliable as clockwork. The victims don't know each other, or their kidnappers. The fifteen-year-olds either end up with a 'missing persons' file gathering dust in a filing cabinet, or they are assumed dead. No one ever discovers what happens to them. The families move on, forever missing their lost loved one. Unknown to them, their child, grandchild, or sibling, has been taken to the Academy. The Academy, as its members will boast, is the most secretive, powerful organization in the world. The workings of the organization are revealed on a need-to-know basis, and the organization has decided that no one, other than its most trusted members, need to know its true business. Outsiders don't even know it exists. Occasionally, a hunter or hiker will stumble upon the Academy's remote location. They are quickly taken care of. When Asa Palmer, age fifteen, is out running in the woods behind his house, he is taken. Twelve hours later, after being tied and bound, and transported through an underground train station, he finds himself amidst a series of beautifully crafted structures that rest in between a circle of five secluded mountains. He has been chosen as a candidate for the Academy. Each six months, the Academy kidnaps more recruits than they can actually use. For Asa Palmer to live he must undergo body-altering mutations and compete with his cohorts in a series of dangerous and strategy ridden tasks to prove that he is worthy of the Academy's time. This book follows Asa Palmer through his second semester in the Academy. The work is 197,000 words long.

Language and Conscious Experience is a philosophical theory of consciousness. The book presents a theory that accommodates every aspect of consciousness and conscious experience. The aspects referred to are perception, imagery including memory and dreams, feelings (emotion) and the acquisition and development of language including the origination of meaning. The nature of consciousness is the energies detected by sensory receptors. The nature of conscious experience is the detection by spindle receptors of energies developed and enhanced in intrafusal muscle spindles. We experience the environment in the form of sensations: sight, hearing, taste, smell, and touch, to use the common and traditional identifications. Consciousness is experienced by the detection of intrafusal muscle spindles. The spindle receptor detection is analogous to the detection of the environment by sensory receptors. The difference, of course, is that we are conscious as the detection of the intrafusal spindles. The purpose of the neuromuscular system is response to the energies of the environment. The purpose of the intrafusal spindles is to control the neuromuscular system. Efferent impulse activity from synaptic activity enhances the intrafusal spindles that can then be detected as conscious experience. Energies developed in the intrafusal spindles are determined by the innervation of the system. When enhanced from configured synaptic activity the innervation is modified by the synaptic activity configured by experience.

You've heard about "flipping your classroom"—now find out how to do it! Introducing a new way to think about higher education, learning, and technology that prioritizes the benefits of the human dimension. José Bowen recognizes that technology is profoundly changing education and that if students are going to continue to pay enormous sums for campus classes, colleges will need to provide more than what can be found online and maximize "naked" face-to-face contact with faculty. Here, he illustrates how technology is most powerfully used outside the classroom, and, when used effectively, how it can ensure that students arrive to class more prepared for meaningful interaction with faculty. Bowen offers practical advice for faculty and administrators on how to engage students with new technology while restructuring classes into more active learning environments.
