No. 21, Porter, J.J. The manufacture of triple superphosphate, [1953?]

Science, technology, engineering, and math (STEM) careers are believed to be the best opportunities for young people today, and this resource outlines the best options for those who are interested in the sciences. This volume covers several career clusters, including environmental science, biofuels, hydrology, genetics, and agriculture, among others. It also outlines what students need to do to prepare for a STEM career in science as well as the future of these exciting new areas. This title is a perfect resource for young people who have a deep interest in the sciences and are looking for the best opportunities.

Sept.-Oct. issue includes list of theses and dissertations for U.S. and Canadian graduate degrees granted in crop science, soil science, and agronomic science during the previous academic year.

The job market continues to change. Highly skilled and specialized workers are in demand. Traditional education cannot meet all the needs to create specialty skill workers. Certification provides up-to-date training and development while promoting individual or professional skills and knowledge in a focused manner.

Certification as a way of continuing professional education can also be more cost effective.

The Certified Crop Adviser CCA program of the American Society of Agronomy aims to provide a benchmark for practicing agronomy professionals in the United States and Canada. It is intend for those who spends the majority of their time advising growers or farm managers/operators on agronomic practices. This product includes 80+ practice questions. We create these self-practice test questions module referencing the concepts and principles currently valid in the exam. Each question comes with an answer and a short explanation which aids you in seeking further study information. For purpose of exam readiness drilling, this product includes questions that have varying numbers of choices. Some have 2 while some have 5 or 6. We want to make sure these questions are tough enough to really test your readiness and draw your focus to the weak areas. Think of these as challenges presented to you so to assess your comprehension of the subject matters. The goal is to reinforce learning, to validate successful transference of knowledge and to identify areas of weakness that require remediation.

Specifically developed for managers interested in preventing contamination of runoff and groundwater leaching, these suggested management practices will help guide you through your own successful plan of action. Also included is an environmental audit checklist to guide you through management practices that impact the environment, increase your awareness of practices that lessen runoff and leaching, and help you identify areas that may require improvements. Chapters cover: protecting water quality, management goals and practices to mitigate runoff and leaching, irrigation practices, nutrients, pest managements, pesticide use and water quality protection, erosion and runoff, water recycling, and environmental audit.

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world. Cambre and Hawkes offer a framework for thinking about technology as it impacts teaching and learning today. We look at technology through a trifocal lense: technology as teaching aid, technology as threat, and technology as progress. We trace the evolution of school technology briefly, leading up to the computer as the point convergence. From the toys they play with to the tools they learn with, we see that students are bombarded with things technological. This mushrooming of technology and how it is to be integrated into the classroom presents challenges that must be confronted so that, indeed, no child is left behind.
