With this fourth edition, accountants will acquire a practical set of tools and the confidence they need to use them effectively in making business decisions. It better reflects a more conceptual and decision-making approach to the material. The authors follow a "macro- to micro-" strategy by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle. The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. This motivates accountants by grounding the discussion in the real world, showing them the relevance of the topics covered to their careers.

The authors draw on their years of teaching and consulting experience to produce a unique text that combines activity-based management approaches

with a solid foundation of basic management accounting concepts.

This unique book is not written from a specific national perspective, but adopts an international approach throughout. It treats the topic of International Financial Accounting and Reporting as a subject in its own right and not as an alternative or an extension to the existing domestic regulatory framework. The book begins with an introduction to accounting and financial reporting, followed by a description of the development of international standards and the present structure, role and operations of the International Accounting Standards Board. While a major part of the book is devoted to a discussion on individual IFRS (International Financial Reporting Standards), it also discusses income statements, balance sheets and cash flow statements. These financial statements are examined in the context of International Financial Reporting regulations and students are introduced to the main IFRS relating to those statements.

Subsequent chapters examine individually, the more complex standards. A complimentary copy of the Instructor's Manual and the PowerPoint presentations of the text materials are available for all instructors who adopt this book as a course text.
