In this volume, Roth presents an edited version of these notes along with other essays on the text, philosophy and translation of this beloved Taoist classic. He concludes the volume with a colophon in which he presents a critique of Graham's textual scholarship and an attempt to resolve several outstanding text-historical issues. A complete bibliography of Graham's publications and a detailed index are also included."--BOOK JACKET.

During the last thirty years, biophysicist and philosopher Henri Atlan has been a major voice in contemporary European philosophical and bio-ethical debates. In a massive oeuvre that ranges from biology and neural network theory to Spinoza's thought and the history of philosophy, and from artificial intelligence and information theory to Jewish mysticism and to contemporary medical ethics, Atlan has come to offer an exceptionally powerful philosophical argumentation that is as hostile to scientism as it is attentive to biology's conceptual and experimental rigor, as careful with concepts of rationality as it is committed to rethinking the human place in a radically determined yet forever changing world. --Book Jacket.

Dr. Robert G. Schwartz has specialized in Complex Chronic Pain, Physical Medicine and Rehabilitation, and Vascular Medicine for over 20 years. His medical practice - Piedmont Physical Medicine & Rehabilitation P.A. in Greenville, South Carolina - is a Mecca for those with chronic pain who are frustrated with ineffective surgical and pharmaceutical treatments. Patient testimonials are plentiful. One patient reports, "He found out more about me and what was wrong in one visit than 6 doctors had in the last 17 months." Resolving Complex Pain is a patient-oriented resource for those with chronic pain. The book includes descriptions of the many illnesses treated by Dr. Schwartz, as well as diagnostic options and pioneering treatments. In addition, the innovative "Challenge & Choice" program - a tool designed to enhance insight awareness and responsible choice in medical decision-making - is presented. Anyone who has the desire can follow the program's home tutorial format. COLOR also available.

This title is directed primarily towards health care professionals outside of the United States. It is aimed at the entire training requirements of Specialist Registrars. It covers both the practice of medicine for the elderly and also generic skills required by all doctors at this stage in their training. The emphasis is on practical advice (backed up by evidence where available) on the common problems of the elderly. Chapters end with references, further reading and self-assessment material. Incorporates implications of the National Service Framework for Older People. Chapter on ethics much changed due to: new GMC Guidelines on consent, confidentiality and withholding treatment; new BMA/RCN Guidelines on "do not resuscitate" decisions. New guidelines on stroke, hypertension and osteoporosis incorporated. Major update to bibliography.

mental health nursing with clinical reasoning and a practical framework for real-life nursing situations. Ideal for both clinical and theory mental health units, the text was developed with input from consumers and clinicians, and includes the clinical manifestations, impacts, treatment and management of persons suffering from mental illness. Chapters on 'Suicide and non-suicidal self-injury' and 'Mental health first aid' provide detailed coverage of these contemporary mental health issues, while a chapter on Mental State Examination (MSE) comprehensively explores MSE in a style similar to a traditional psychiatry text and in the context of many different mental health conditions, giving students multiple perspectives of presentations. Critical thinking and review questions challenge students to apply theory to practice, and pharmacology is discussed in each disorder-chapter, helping students to contextualise their learning. With coverage of the Mental Health Act (2014), and criteria from the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5) integrated throughout, the text equips students with a working understanding of major mental health disorders, and the ability to work practically when engaging with persons suffering from mental illness. This enhanced edition now also includes discussion around mental health as it pertains to the effects that COVID-19 and the global pandemic have had on consumers and practitioners. Resources for the instructor include updated Instructor's Manual, PowerPoints and Test Bank.

Arrhythmia Recognition, Second Edition teaches any student how to interpret a rhythm strip using foundational concepts and a step-by-step approach, covered in an unthreatening, conversational writing style that facilitates learning of this complex subject. This text is appropriate for anyone--nurses, physician assistants, cardiovascular technicians, allied health professionals, paramedics, medical students, and physicians--wishing to learn how to accurately interpret based on a solid understanding of electrophysiology and pathophysiologic mechanisms in the heart, and how these translate to the rhythm strip. It is also an excellent reference text for instructors wishing to expand their knowledge of arrhythmia interpretation. This edition includes full coverage of wide-complex tachycardias in four chapters: the basics, the criteria, the approach, and a chapter on synthesis/interpretation, presented in a case study format. Beginner's Perspective boxes written by someone new to arrhythmia recognition provide tips and insight on how to approach the material as a beginner. This edition also includes chapter objectives written to Bloom's taxonomy.

Karl Ameriks here collects his most important essays to provide a uniquely detailed and up-to-date analysis of Kant's main arguments in all three major areas of his work: theoretical philosophy (Critique of Pure Reason), practical philosophy (Critique of Practical Reason), and aesthetics (Critique of Judgment). Guiding the volume is Ameriks's belief that one cannot properly understand any one of these Critiques except in the context of the other two. The essays can be read individually, but read together they offer a comprehensive guide to the main themes of the most influential of all modern philosophical systems.

This research presents the evidence that Mary Magdalene was the 'Beloved Disciple' whose identity is revealed at the foot of the cross. For almost 2,000 years the incorrect naming of the Fourth Gospel as 'The Gospel According to John' has misled its readers. It would be more correct to say 'The Gospel According to John if you believe Irenaeus.' Just as Church Fathers wanted a line of apostolic bishops linked to Peter and Paul, so they wanted the gospels attributed to people who were accepted by the Church. The Fourth Gospel shows that God views the qualifications for a Beloved Disciple differently to the traditional requirements of men. "But as many as received Him, to them He gave the right to become children of God, to those who believe in His name: who were born, not of blood, nor of the will of the flesh, nor of the will of man, but of God" (John 1:12-13). The Fourth Gospel has much to reveal to those willing to search it out.

The first volume of Biodynamic Craniosacral Therapy presented the basics of craniosacral therapy as a gentle, compassionate healing art that can be used by psychologists, midwives, chiropractors, and massage and physical therapists. In this second volume, author Michael Shea goes deeper into the entire biodynamic paradigm, analyzing the relationship of trauma resolution, psychodynamics, and shamanism, and providing practical meditations, visualizations, and clinical skills to restore physical, spiritual, and emotional health. The book opens by exploring the meaning of biodynamic, followed by a discussion of human embryology as a path to healing in any form of therapy. This section offers a set of pioneering techniques based on perceiving stillness—slow movement—as a fundamental healing influence. The next section describes the bridge between trauma resolution therapy and biodynamic work, establishes a new containment model, and offers skills for resolving shock and trauma. A special section contains fresh strategies for anyone working with infants and children, along with a provocative analysis linking the infant-mother relationship to the patient-therapist relationship. Finally, Shea provides a unique perspective on depth psychology, mythology, and healing. This includes the defining difference between biodynamic craniosacral therapy and all other forms of craniosacral therapy: the focus on the nature of spiritual disease and shamanism.

CD-ROM features virtual hospital setting with five unique patients, whose charts, lab data and medical administration records can be assessed and monitored; each lesson in workbook has a reading assignment from Ignatavicius & Workman, Medical-surgical nursing, 4th edition, Saunders, c2001.
