In the past, the teaching of electricity and electronics has more often than not been carried out from a theoretical and often highly academic standpoint. Fundamentals and basic concepts have often been presented with no indication of their practical applications, and all too frequently they have been illustrated by artificially contrived laboratory experiments bearing little relationship to the outside world. The course comes in the form of fourteen fairly open-ended constructional experiments or projects. Each experiment has associated with it a construction exercise and an

explanation. The basic idea behind this dual presentation is that the student can embark on each circuit following only the briefest possible instructions and that an open-ended approach is thereby not prejudiced by an initial lengthy encounter with the theory behind the project; this being a sure way to dampen enthusiasm at the outset. As the investigation progresses, questions inevitably arise. Descriptions of the phenomena encountered in the experiments are therefore given in the explanations. Although these were originally intended to be for the teacher's guidance they have been found, in fact, to be quite suitable for use by the student. In the explanations mathematics has been eliminated wherever possible, mechanistic descriptions of phenomena being preferred in all cases. Stress is thereby placed on concepts rather than on mere algebraic relationships. It is hoped that students of weak mathematical background will, as a result, not be prevented from following the explanations and deriving some benefit from these.

This book is designed to give parents and teachers information on the alternative education options available in the UK. It covers three main areas: Outside the state system: small schools; Steiner Waldorf schools; Montessori schools; democratic schools and other schools with alternative philosophies Doing it yourself: setting up a small school or learning centre; educating at home; flexible schooling Alternatives within the state system: how some state schools are finding different ways of working The values, philosophies and methods of each alternative are described, including the first-hand experiences and accounts of children, teachers and parents. There are answers to common questions and useful sources of further information. This accessible and informative book is the ideal introduction for parents deciding how best to educate their children. It will be of interest to teachers looking to build their knowledge of different education philosophies.

With developments in skills and knowledge level, more and more academic rigour is expected of veterinary nurses. Exams, CPD and repeated testing and study throughout the nurse's career are now requirements. Aimed at veterinary nurses and technicians, this book will guide the reader through the various research and study disciplines required of them. Research and Study Skills for Veterinary Nurses discusses why these academic skills are now required of the veterinary nurse, different types of source material, how to complete written assignments, how to reference properly, how to approach different test questions, how to respond to oral exams, how to complete OSCEs, CPD training, and work-based practical assessments. Research and Study Skills for Veterinary Nurses provides information and advice for student vet nurses who need a reliable resource to guide them through their course.

This text is designed to cover the core technology and alternative specialist options of the CGLI 585 advanced craft syllabus.

This book examines women's activism in the early years of independent Indonesia when new attitudes to gender,

nationalism, citizenship and democratization were forming. It questions the meaning of democratization for women and their relationship to national sovereignty within the new Indonesian state, and discusses women's organizations and their activities; women's social and economic roles; and the different cultural, regional and ethnic attitudes towards women, while showing the failure of political change to fully address women's gender interests and needs. The author argues that both the role of nationalism in defining gender identity and the role of gender in defining national identity need equal recognition.

This popular guide focuses on common misconceptions in the application of the IET Wiring Regulations. It explains in clear language those parts of the regulations that most need simplifying, outlining the correct procedures to follow and those to avoid. Emphasis has been placed on areas where confusion and misinterpretation are common, such as earthing and bonding, circuit design and protection, and in particular the increased use of RCDs. With the coverage carefully matched to the syllabus of the City & Guilds Certificate in the Requirements for Electrical Installations (2382-12 and 2382-15) and containing sample exam questions and answers, this book is also an ideal revision guide.

Addresses the areas highlighted as poor in the Chief Examiner's feedback of candidate performance Assists students in decoding questions found in the City and Guilds 2394 and 2395 exams Uses realistic exam questions as examples and rather than simply providing the answers, explains how the student should go about answering a question of that type. An essential guide to the City and Guilds 2394/2395 Initial Verification and Certification of Electrical Installation and Periodic Inspection and Testing qualifications, this book addresses the areas which have resulted in a considerable failure rate, such as the technical and legal terminology used within these exams. Full coverage of technical terms is included, as is the structure of exam questions and their interpretation. By running through examples of real exam questions in a step-by-step fashion, this book explains how to decode the questions and examine the answer choices in order to get to the correct answers. This book is ideal for all electricians, regardless of their experience, who need a testing qualification in order to take the next step in their career.

"Validating Second Language Reading Examinations describes the development of an empirical framework for test validation and comparison of reading tests at different proficiency levels through a critical evaluation of alignment with the Common European Framework of Reference (CEFR). It focuses on contextual parameters, cognitive processing operations and test results and identifies parameters for the description of different levels of reading proficiency examinations. The volume explores procedures for linking tests to the CEFR and proposes both qualitative and quantitative methods that complement the procedures

recommended in the Council of Europe's Relating Language Examinations to the Common European Framework of Reference for Languages (CEFR): A Manual, piloted in 2003 and revised 2009. Key features of the book include: - a detailed review of the literature on CEFR alignment, vertical scaling, test specifications and test comparability - a comprehensive and coherent approach to the validation of reading tests - an accessible and systematic description of procedures for collecting validity evidence based on a sound theoretical framework - a case study comparing different testing systems targeting the same CEFR level"--
