The activities in this book are designed to provide students with practice in the skill areas required to understand basic geometry concepts. The focus is on congruence and similarity, classifying various kinds of angles and triangles, transformations, parallel and perpendicular lines, properties of geometric figures, arcs and chords, and finding surface area and volume.

Science teacher educators, curriculum specialists, professional development facilitators, and KOCO8 teachers are bound to increase their understanding and confidence when teaching inquiry after a careful reading of this definitive volume.

Advancing a new perspective, James Jadrich and Crystal Bruxvoort assert that scientific inquiry is best taught using models in science rather than focusing on scientists' activities."

Focus on 2-D and 3-D shapes, size, symmetry, visual and spatial reasoning, transformation, location and position, and coordinate geometry with these easy-to-use reproducible worksheets. It includes hands-on activities and timesaving teaching aids such as skill checks, cumulative assessments, and student-created problems. The vocabulary cards reinforce geometry terms and figures and the correlation chart and icons on each page make it easy to identify which standards are being used. A pretest, posttest, and answer key are also provided.

Secondary schools are continually faced with the task of preparing students for a world that is more connected, advanced, and globalized than ever before. In order to adequately prepare students for their future, educators must provide them with strong reading and writing skills, as well as the ability to understand scientific concepts. The Handbook of Research on Science Literacy Integration in Classroom Environments is a pivotal reference source that provides vital research on the importance of cross-curriculum/discipline connections in improving student understanding and education. While highlighting topics such as curriculum integration, online learning, and instructional coaching, this publication explores practices in teaching students how to analyze and interpret data, as well as reading, writing, and speaking. This book is ideally designed for

teachers, graduate-level students, academicians, instructional designers, administrators, and education researchers seeking current research on science literacy adoption in contemporary classrooms.

This book synthesizes current literature and research on scientific inquiry and the nature of science in K-12 instruction. Its presentation of the distinctions and overlaps of inquiry and nature of science as instructional outcomes are unique in contemporary literature. Researchers and teachers will find the text interesting as it carefully explores the subtleties and challenges of designing curriculum and instruction for integrating inquiry and nature of science.

New Approaches to Teaching Italian Language and Culture fills a major gap in existing scholarship and textbooks devoted to the teaching of Italian language and culture. A much-needed project in Italianistica, this collection of essays offers case studies that provide a coherent and organized overview of contemporary Italian pedagogy, incorporating the expertise of scholars in the field of language methodology and language acquisition from Italy and four major countries where the study of Italian has a long tradition: Australia, Canada, Great Britain and the United States. The twenty four essays, divided into six main parts, offer a tremendous variety of up-to-date approaches to the teaching of Italian as a foreign language and L2, ranging from theoretical to more practical, hands-on strategies with essays on curricular innovations, technology, study abroad programs, culture, film and song use as effective pedagogical tools. Each case study introduces a systematic approach with an overview of theory, activities and assessment suggestions, collection of research data and syllabi. The book addresses the needs of instructors and teacher trainers, putting in perspective different examples that can be used for more effective teaching techniques according to the ACTFL guidelines and the Common European Framework of Reference for Languages.
