This is the first major history of Imperial College London. The book tells the story of a new type of institution that came into being in 1907 with the federation of three older colleges. Imperial College was founded by the state for advanced university-level training in science and technology, and for the promotion of research in support of industry throughout the British Empire. True to its name the college built a wide number of Imperial links and was an outward looking institution from the start. Today, in the post-colonial world, it retains its outward-looking stance, both in its many international research connections, and with staff and students from around the world. Connections to industry and the state remain important. The College is one of Britain's premier research and teaching institutions, including now medicine alongside science and engineering. This book is an in-depth study of Imperial College; it covers both governance and academic activity within the larger context of political, economic and socio-cultural life in twentieth-century Britain. Contents: Introduction Before Imperial: The Colleges that Federated in 1907 The Founding of Imperial College Governance and Innovation, 1907–43 Imperial College during the First World War Continuity within the Three Old Colleges, 1907–45 Imperial Science at Imperial College Imperial College during the Second World War Expansion: Post-War to Robbins, 1945–67 (Part One) Expansion: Post-War to Robbins, 1945–67 (Part Two) Corporate and Social Life The Making of the Modern College, 1967–85: Part One—Governance in a New Political Climate The Making of the Modern College, 1967–85: Part Two: Academic Restructuring Diversifying the Curriculum The Expanding College, 1985–2001... Volume 4 of the letters of T. S. Eliot, which brings the poet, critic, editor and publisher into his forties, documents a period of anxious and fast-moving professional recovery and personal and spiritual consolidation. Following the withdrawal of financial support by his patron Lady Rothermere, Faber & Gwyer (subsequently Faber & Faber) eventually takes over the responsibility for Eliot's literary periodical *The Criterion*. He supplements his income as a fledgling publisher, 'just as I did ten years ago, by reviewing, articles, prefaces, lectures, broadcasting talks, and anything that turns up.' His work as editor is internationalist above all else, and Eliot makes contact with a number of eminent and emergent writers and thinkers, as well as forging links with European reviews ('all of which have endeavoured to keep the intellectual blood of Europe circulating throughout the whole of Europe'). Eliot's responsibilities during this period extend to caring for Vivien, who returns home after months in a French psychiatric hospital and whom he looks after with anxious fortitude; and the personal correspondence with his mother closes with her death in September 1929.

This book, by a former professional forger, describes the difference between the two and presents case studies along with an expose of the trade. The author provides a thorough treatment of the topic and reveals the serious implications for the future of academia. Educators should educate themselves about forgery and join the conversation about solving the problem.
