For *Introducing Comparative Politics: The Essentials*, the driving force is the pluralist, objective stance on introducing students to core concepts in Comparative Politics. Authors Stephen Orvis and Carol Ann Drogus introduce key comparative questions while providing equal strengths and weaknesses of commonly debated theories, structures, and beliefs that push students beyond memorization of country profiles and ever-changing statistics and generate in-class debate over key concepts used in the science of comparative politics. While detailed case studies can go in-depth on specific countries and political systems, *Introducing Comparative Politics: The Essentials*, distills its country material into paragraph-long examples woven seamlessly into the narrative of the text, increasing diverse global awareness, current-event literacy, and critical-thinking skills.

Political Ideologies provides a broad-ranging introduction to both the classical and contemporary political ideologies. Adopting a global outlook, it introduces readers to ideologies' increasingly global reach and the different national versions of these ideologies. Importantly, ideologies are presented as frameworks of interpretation and political commitment, encouraging readers to evaluate how ideologies work in practice, the problematic links between ideas and political action, and the impact of ideologies. Regular learning features encourage readers to think critically about ideologies, and view them as competing and contestable ways of interpreting the world. A unique "stop and think" feature calls for readers to reflect on their own ideological beliefs. Online Resources: *Political Ideologies* is accompanied by comprehensive online resources, to support political ideology courses. For students: * Further reading and resources for each chapter to help students to undertake further research and deepen their understanding and critical thinking;* Regular updates help students to keep up to date with ideologies as frameworks of understanding and political action in the real world. For lecturers:* Indicative answers to questions in the book provide a framework for approaching these;* Powerpoint slides to support each chapter, providing an overview and key points to help with planning;* Further discussion and debate ideas, for use in seminars, encourage big picture thinking about the relationships between ideologies.

Timor-Leste's long journey to nationhood spans 450 years of colonial rule by Portugal, a short-lived independence in 1975, and a 24-year occupation by Indonesia. This book examines the history of nation-building and national identity in Timor-Leste, and the evolution of a collective identity through two consecutive colonial occupations, and into the post-independence era. It charts the evolution of the idea of an East Timorese nation: its origins, its sources, and its competitors in traditional understandings of political community, and the distinct colonial visions imposed by Portugal or Indonesia. The author analyses the evolution of ideas of collective identity under the long era of Portuguese colonial rule, and through the 24-year struggle for independence from Indonesia from 1975 to 1999. Reflecting the contested history of the territory, these include successive attempts to define its members as colonial subjects in a wider 'pluri-racial' Portuguese empire, as citizens in an 'integrated' province of the Republic of Indonesia – and, of course, as a nation that demanded its right to self-determination. Finally, the host of nation-building tensions and fault lines that emerged after the restoration of independence in 2002 are discussed. Examining the history of debates and conflict over national identity, national history, cultural heritage, language policy, and relationships between distinct regions, generations, and language groups, this book will be of interest to academics in the fields of Asian studies, nationalism studies, and international and community development.

According to Fossungu, we need healthy competition for progress. Competition that is not geared toward progress is negative competition. No competition or the absence of self-help is negative competition. With factories competing healthily, consumers have a variety of quality goods and services from which to choose. The entire community benefits when people in any grouping are competing positively; thus making the rules of competition graphical. The central focus of this book is the extent to which Canadian regulations apply without discrimination to all of Canada and to everyone, individuals and corporations alike. A swift answer is affirmative. But is that really it? The book is also about voluntary slavery, which is worse than forced enslavement. Drawing on Ignorance Theory, the book argues that the worst thing that can happen to anyone is to be ignorant of one's ignorance. He who does not know what he does not know will never know. Voluntary African slaves generally employ 'One Has No Choice' (On n'a pas le choix) to cloak their having chosen not to secure their rights. Fossungu

demonstrates why he considers this an escapist way of shying away from doing the normal thing, thus giving the dictator or oppressor reason to dictate and oppress with impunity. This is Fossungu at his provocative and controversial best.

"Comparative Politics" provides a comprehensive introduction to political systems around the world. It covers methods and theories; the nation-state; institutions; actors and processes; policies; and recent changes.

Principles of Comparative Politics offers the most comprehensive and up-to-date introduction to comparative inquiry, research, and scholarship. In this thoroughly revised Third Edition, students now have an even better guide to cross-national comparison and why it matters. The new edition retains a focus on the enduring questions with which scholars grapple, the issues about which consensus has started to emerge, and the tools comparativists use to get at the complex problems in the field. Among other things, the updates to this edition include a thoroughly-revised chapter on dictatorships that incorporates a discussion of the two fundamental problems of authoritarian rule: authoritarian power-sharing and authoritarian control; a revised chapter on culture and democracy that includes a more extensive examination of cultural modernization theory and a new overview of survey methods for addressing sensitive topics; a new section on issues related to electoral integrity; an expanded assessment of different forms of representation; and a new intuitive take on statistical analyses that provides a clearer explanation of how to interpret regression results. Examples from the gender and politics literature have been incorporated into various chapters, the Problems sections at the end of each chapter have been expanded, and the empirical examples and data on various types of institutions have been updated. Online videos and tutorials are available to address some of the more methodological components discussed in the book. The authors have thoughtfully streamlined chapters to better focus attention on key topics.

Between 1450 and 1750 thousands of people – most of them women – were accused, prosecuted and executed for the crime of witchcraft. The witch-hunt was not a single event; it comprised thousands of individual prosecutions, each shaped by the religious and social dimensions of the particular area as well as political and legal factors. Brian Levack sorts through the proliferation of theories to provide a coherent introduction to the subject, as well as contributing to the scholarly debate. The book: Examines why witchcraft prosecutions took place, how many trials and victims there were, and why witch-hunting eventually came to an end. Explores the beliefs of both educated and illiterate people regarding witchcraft. Uses regional and local studies to give a more detailed analysis of the chronological and geographical distribution of witch-trials. Emphasises the legal context of witchcraft prosecutions. Illuminates the social, economic and political history of early modern Europe, and in particular the position of women within it. In this fully updated third edition of his exceptional study, Levack incorporates the vast amount of literature that has emerged since the last edition. He substantially extends his consideration of the decline of the witch-hunt and goes further in his exploration of witch-hunting after the trials, especially in contemporary Africa. New illustrations vividly depict beliefs about witchcraft in early modern Europe.

This book critically assesses the impact of Ethiopia's policy of Agriculture Development Led Industrialization. Employing qualitative and quantitative analysis, it presents empirical evidence suggesting persistent economic growth. The research highlights improvements in infrastructure, health care, education, poverty alleviation as well reductions in infant mortality rate. The impact of this economic growth has however had led to only slight improvements in the plight of the poor. The author argues that, while significant steps have been achieved with measurable economic gains, there are still undeniable obstacles within the federal system: prevailing patron-client relationships, constraints on state capacity to efficiently and effectively implement policy, and bureaucratic rent-seeking in the provision of public goods. The author

concludes that these problems will have to be resolved before Ethiopia's political economy can achieve the stage of sustainable development

'A manual for the 21st-century citizen... accessible, refreshingly critical, relevant and urgent' - Financial Times 'Fascinating and deeply disturbing' - Yuval Noah Harari, Guardian Books of the Year In this New York Times bestseller, Cathy O'Neil, one of the first champions of algorithmic accountability, sounds an alarm on the mathematical models that pervade modern life -- and threaten to rip apart our social fabric. We live in the age of the algorithm. Increasingly, the decisions that affect our lives - where we go to school, whether we get a loan, how much we pay for insurance - are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: everyone is judged according to the same rules, and bias is eliminated. And yet, as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and incontestable, even when they're wrong. Most troubling, they reinforce discrimination. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort CVs, grant or deny loans, evaluate workers, target voters, and monitor our health. O'Neil calls on modellers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change.

Bringing together experts on regionalism and federalism this collection explores the impact of legislative regions on parties and voters. It reflects on the 1980 publication of *Small Worlds* by David Elkins and Richard Simeon, which outlined how and why voters and policies differ across Canadian provinces. Using recent data, the essays in this collection provide a comparative re-examination of the impact of regions. The book explores attitude divergence in Canada and in the US, the role and impact of regional parties in Quebec, Scotland and Bavaria, the impact of multi-level governance on how citizens understand and discharge their duties and the capacity of sub-state political systems to influence general political attitudes. The result is an empirical and analytical contribution to regionalism and federalism studies that demonstrates how and why regions matter. This book was published as a special issue of *Regional and Federal Studies*.

Comparing Political Regimes provides a comprehensive assessment of the world's political systems by outlining and contrasting the aspects of four different regime types: liberal democracies, electoral democracies, semi-liberal autocracies, and closed autocracies. The third edition is thoroughly revised and updated. It now incorporates the two new countries that have appeared since the last edition—Kosovo and South Sudan—and covers the regime changes that have occurred in many countries, including the liberalization (but not yet actual democratization) of the Arab Spring. Extra material has also been added on demography and political economy, especially with regards to economic development, and on secession of regions.

Organized thematically around important questions in comparative politics, *Introducing Comparative Politics, Fourth Edition* by Stephen Orvis and Carol Ann Drogus integrates a set of extended case studies of 11 core countries into the

narrative. Serving as touchstones, the cases are set in chapters where they make the most sense topically—not separated from theory or in a separate volume—and vividly illustrate issues in cross-national context. The book's organization allows instructors flexibility and gives students a more accurate sense of comparative study. In this edition, a brand new chapter on Contentious Politics covers ethnic fragmentation, social movements, civil war, revolutions, and political violence. New case studies on this topic include the Occupy and Tea Party movements in the US; Zapatista rebellion in Mexico; Boko Haram in Nigeria; and; and revolutions in China and Iran. The chapter on States and Identity has been substantially revised to better introduce students to the concept of identity and how countries handle identity-based demands. Case studies include nationalism in Germany; ethnicity in Nigeria; religion in India; race in the US; gender in Iran; and sexual orientation in Brazil. Content on states and markets, political economy, globalization, and development has all been consolidated into a new Part III of the book, focusing in a sustained way on economic issues.

Beginning with an introduction to the field of comparative politics, this clear and complete text moves on to explore new, innovative directions in the field. Leading scholar Howard J. Wiarda explores its main approaches, including political development, political culture, dependency theory, corporatism, indigenous theories of change, state-society relations, rational choice, and the new institutionalism. Wiarda addresses many hot issues in the field: Can democracy and human rights be transplanted from one culture to another? Is civil society exportable? What works in the effort to develop the poorer nations and what doesn't? Where are we headed with such frontier research issues as comparative environmental policy, women's rights, and gay rights? The book concludes with a stimulating discussion of whether the great systems debates of the past (socialism vs. capitalism, democracy vs. authoritarianism) are now over and points to some of the next important study and research frontiers. Students, professors, and general readers will all find Comparative Politics current, provocative, and well written—a truly balanced overview.

"Cases and Concepts in Comparative Politics gets students out of the text and into the real world. Through its unique applied approach that introduces the concepts in the context of real situations, along with pedagogy that encourages students to practice exploring on their own the concepts in action in country case studies, students spend more time doing the work of comparative politics and less time reading about it"—Pursuing an interdisciplinary approach, this book offers detailed insights into the empirical relationships between overall social key figures of states and cultures in the fields of information and communication technology (ICT) (digital divide/inequality), the economy, education and religion. Its goal is to bridge the 'cultural gap' between computer scientists, engineers, economists, social and political scientists by providing a mutual understanding of the essential challenges posed and opportunities offered by a global information and knowledge society. In a sense, the historically unprecedented technical advances in the field of ICT are shaping humanity at different levels and forming a hybrid (intelligent) human-technology system, a so-called global superorganism. The main innovation is the combined study of digitization and globalization in the context of growing social inequalities, collapse, and sustainable development, and how a convergence towards a kind of global culture could take place. Accordingly, the book discusses the spread of ICT, Internet Governance, the balance between the central concentration of power and the extent of decentralized power distribution, the inclusion or exclusion of people and states in global communication processes, and the capacity for global empathy or culture.

Politics is intuitively about relationships, but until recently the network perspective has not been a dominant part of the methodological paradigm that political scientists use to study politics. This volume is a foundational statement about networks in the study of politics.

In a story set against the backdrop of Dublin in 1915, two boys who meet at the local swimming hole plan to swim to an island in Dublin Bay the following Easter, but their plans coincide with the Easter uprising—a historic rebellion that changes their li

Gender in the Political Science Classroom looks at the roles gender plays in teaching and learning in the traditionally male-dominated field of political science. The contributors to this collection bring a new perspective to investigations of gender issues in the political behavior literature and feminist pedagogy by uniting them with the Scholarship of Teaching and Learning (SoTL). The volume offers a balance between the theoretical and the practical, and includes discussions of issues such as curriculum, class participation, service learning, doctoral dissertations, and professional placements. The contributors reveal the discipline of political science as a source of continuing gender-based inequities, but also as a potential site for transformative pedagogy and partnerships that are mindful of gender. While the contributors focus on the discipline of political science, their findings about gender in higher education are relevant to SoTL practitioners, other social-science disciplines, and the academy at large.

This systematic, user friendly, and refreshingly unusual introduction to comparative politics is designed to teach students how to think comparatively and theoretically about the world they live in. The second edition retains the core features of the first, coherently integrating comparative method, theory, and issues, but provides updated material and additional cases throughout. The text now also includes study questions for each chapter.

This book shows how the dynamic interplay of a powerful "golden triangle" of sports, media, and business interests with social, cultural, economic, and political forces shapes sport in a changing world. This edition is a condensed and updated version of the first edition, with an emphasis on current social issues in sport. It also has more global content. The golden triangle concept is more developed and applied more extensively. Other key themes of the first edition—power, status, and inequality—are also more developed. New "Stop and Think Questions" have been added to challenge students to think about the meaning of what they have read. The book is now divided into five sections. The new sections highlight sociology and the sociology of sport; inequality and diversity; globalization and social deviance; major social contexts of sport, including the high school, college, and professional levels; and power, political economy, and global sports.

Explores the importance of comparative politics, discusses different comparative methods, investigates the big issues of today and looks forward to the key challenges for comparative politics over the next century.
