After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

semiotic principles and methodology to computer science, such as computer semiotics, computational semiotics, and semiotic interface engineering, this dissertation establishes a systematic account for those researchers who are ready to look at hypertext from a semiotic point of view. Rather than a new hypertext model, this work presents the prolegomena of a theory of hypertext semiotics, interlacing the existing models with the findings of semiotic research, on all levels of the textual, aural, visual, tactile and olfactory channels. A short history of hypertext, from its prehistory to today's state of the art systems and the current developments in the commercialized World Wide Web creates the context for this approach which should be seen as a fortification of the connection between the media semiotic approach and computer semiotics. While computer semioticians claim that the computer is a semiotic machine and Artificial Intelligence scientists underline the importance of semiotics for the construction of the next hypertext generation, this paper makes use of a much broader methodological basis. These findings are placed in the context of the commercialization of the Internet. Besides identifying the main challenges for eCommerce from the viewpoint of hypertext semiotics, the author concentrates on information goods and the current limitations for a new economy, such as restrictive intellectual property and copyright laws. A semiotic analysis of iMarketing techniques and the Toywar complete the dissertation.

Zusammenfassung: Diese Dissertation legt einen systematischen Ansatz für all jene Forscher dar, die bereit sind, Hypertext aus einer semiotischen Perspektive zu

betrachten. Durch die Verknüpfung existierender Hypertext-Modelle mit den Resultaten aus der Semiotik auf allen Sinnesebenen der textuellen, auditiven, visuellen, taktilen und geruchlichen Wahrnehmung skizziert der Autor Prolegomena einer Hypertext-Semiotik-Theorie, anstatt ein völlig neues Hypertext-Modell zu präsentieren. Eine Einführung in die Geschichte der Hypertexte, von ihrer Vorgeschichte bis zum heutigen Entwicklungsstand und den gegenwärtigen Entwicklungen im kommerzialisierten World Wide Web bilden den Rahmen für diesen Ansatz, welcher als Fundierung des Brückenschlages zwischen Mediensemiotik und Computer-Semiotik angesehen werden darf. Während Computer-Semiotiker wissen, dass der Computer [...]

Recent large-scale corporate collapses, such as Lehman Brothers, Enron, Worldcom, and Parmalat, highlight the implosion of traditional models of fraud prevention. By focusing on risk factors at the micro level, they have failed to take into account the broader context in which external auditors operate as well as the crucial importance of such factors as corruption, organizational culture, corporate social responsibility, ethical values, governance, ineffective regulation, and a lack of transparency. Corporate Fraud and Corruption engages readers by showing how evidence-based, multi-level micro and macro analysis of fraud risk and protective factors inform effective fraud prevention, in turn minimizing financial catastrophes. Krambia-Kapardis focuses on her own empirical research into the aetiology of fraud to showcase a holistic approach to fraud prevention. This book

In 1967, after a twin baby boy suffered a botched circumcision, his family agreed to a radical treatment that would alter his gender. The case would become one of the most famous in modern medicine—and a total failure. Although epilepsy is one of the nation's most common neurological disorders, public understanding of it is limited. Many people do not know the causes of epilepsy or what they should do if they see someone having a seizure. Epilepsy is a complex spectrum of disorders that affects an estimated 2.2 million Americans in a variety of ways, and is characterized by unpredictable seizures that differ in type, cause, and severity. Yet living with epilepsy is about much more than just seizures; the disorder is often defined in practical terms, such as challenges in school, uncertainties about social situations and employment, limitations on driving, and questions about independent living. The Institute of Medicine was asked to examine the public health dimensions of the epilepsies, focusing on public health surveillance and data collection; population and public health research; health policy, health care, and human services; and education for people with the disorder and their families, health care providers, and the public. In *Epilepsy Across the Spectrum*, the IOM makes recommendations ranging from the

expansion of collaborative epilepsy surveillance efforts, to the coordination of public awareness efforts, to the engagement of people with epilepsy and their families in education, dissemination, and advocacy for improved care and services. Taking action across multiple dimensions will improve the lives of people with epilepsy and their families. The realistic, feasible, and action-oriented recommendations in this report can help enable short- and long-term improvements for people with epilepsy. For all epilepsy organizations and advocates, local, state, and federal agencies, researchers, health care professionals, people with epilepsy, as well as the public, *Epilepsy Across the Spectrum* is an essential resource.

Today, organizations of all kinds are ruled by the belief that the path to success is quantifying human performance, publicizing the results, and dividing up the rewards based on the numbers. But in our zeal to instill the evaluation process with scientific rigor, we've gone from measuring performance to fixating on measuring itself. The result is a tyranny of metrics that threatens the quality of our lives and most important institutions. In this timely and powerful book, Jerry Muller uncovers the damage our obsession with metrics is causing--and shows how we can begin to fix the problem. Filled with examples from education, medicine, business and finance, government, the police and military, and philanthropy and foreign aid, this brief and accessible book explains why the seemingly irresistible pressure to quantify performance distorts and distracts, whether by encouraging "gaming the stats" or "teaching to the test." That's

because what can and does get measured is not always worth measuring, may not be what we really want to know, and may draw effort away from the things we care about. Along the way, we learn why paying for measured performance doesn't work, why surgical scorecards may increase deaths, and much more. But metrics can be good when used as a complement to--rather than a replacement for--judgment based on personal experience, and Muller also gives examples of when metrics have been beneficial. Complete with a checklist of when and how to use metrics, *The Tyranny of Metrics* is an essential corrective to a rarely questioned trend that increasingly affects us all.

There seems to be renewed interest in having universities and other higher education institutions engage with their communities at the local, national, and international levels. But what is community engagement? Even if this interest is genuine and widespread, there are many different concepts of community service, outreach, and engagement. The wide range of activity encompassed by community engagement suggests that a precise definition of the "community mission" is difficult and organizing and coordinating such activities is a complex

task. This edited volume includes 18 chapters that explore conceptual understandings of community engagement and higher education reforms and initiatives intended to foster it. Contributors provide empirical research findings, including several case study examples that respond to the following higher education community engagement issues. What is “the community” and what does it need and expect from higher education institutions? Is community engagement a mission of all types of higher education institutions or should it be the mission of specific institutions such as regional or metropolitan universities, technical universities, community colleges, or indigenous institutions while other institutions such as major research universities should concentrate on national and global research agendas and on educating internationally-competent researchers and professionals? How can a university be global and at the same time locally relevant? Is it, or should it be, left to the institutions to determine the scope and mode of their community engagement, or is a state mandate preferable and feasible? If community engagement or “community service” are mandatory, what are the consequences of not complying with the mandate? How effective are policy mandates and university engagement for regional and local economic development? What are the principal features and relationships of regionally-engaged universities? Is community engagement to be left to faculty members and students who are particularly socially engaged and locally embedded or is it, or should it be, made mandatory for both faculty and students? How can community engagement be (better) integrated with the (other) two traditional missions of the university—research and teaching? The world is being transformed physically and politically. Technology is the handmaiden of much of this change. But since the current sweep of global change is transforming the face of warfare, Special Operations Forces (SOF) must adapt to these circumstances. Fortunately, adaptation is in the SOF DNA. This book examines the changes affecting SOF and offers possible solutions to the complexities that are challenging many long-held assumptions. The chapters explore what has changed, what stays the same, and what it all means for U.S. SOF. The authors are a mix of leading experts in technology, business, policy, intelligence, and geopolitics, partnered with experienced special operators who either cowrote the chapters or reviewed them to ensure accuracy and relevance for SOF. Our goal is to provide insights into the changes around us and generate ideas about how SOF can adapt and succeed in the emerging operational environment.

Considering the pervasive immorality and high divorce rate of our contemporary Christian culture, we evidently need a biblically based, theologically compelling, practical understanding of sex, dating, and relationships. Pastors Gerald Hiestand and Jay Thomas counteract this problem with their paradigm-shifting view of purity and relationships—a view that challenges even the basic assumptions of evangelical subculture. Unlike most books on dating, this one cuts straight to the heart of dating relationships, asserting with confidence that the line must be drawn at “no sexual activity” whatever. Few have dared to define and apply the Bible’s understanding of purity in premarital relationships to this degree, but Heistand and Thomas have done it. Furthermore, both authors are vocational pastors who communicate regularly with the target audience and have a proven ability to express biblical truth in a winsome and compelling manner. *Sex, Dating, and Relationships* adds a new, almost provocative voice to

How do we address racial disparities and inequities? What role do our institutions play in creating, maintaining, and magnifying those inequities? What role do we play? With a perspective that is at once scientific, investigative, and informed by personal experience, Dr. Jennifer Eberhardt offers us the language and courage we need to face one of the biggest and most troubling issues of our time. She exposes racial bias at all levels of society—in our neighborhoods, schools, workplaces, and criminal justice system. Yet she also offers us tools to address it. Eberhardt shows us how we can be vulnerable to bias but not doomed to live under its grip. Racial bias is a problem that we all have a role to play in solving.
