This open access book assembles landmark studies on divorce and separation in European countries, and how this affects the life of parents and children. It focuses on four major areas of post-separation lives, namely (1) economic conditions, (2) parent-child relationships, (3) parent and child well-being, and (4) health. Through studies from several European countries, the book showcases how legal regulations and social policies influence parental and child well-being after divorce and separation. It also illustrates how social policies are interwoven with the normative fabric of a country. For example, it is shown that father-child contact after separation is more intense in those countries which have adopted policies that encourage shared parenting. Correspondingly, countries that have adopted these regulations are at the forefront of more egalitarian gender role attitudes. Apart from a strong emphasis on the legal and social policy context, the studies in this volume adopt a longitudinal perspective and situate post-separation behaviour and well-being in the life course. The longitudinal perspective opens up new avenues for research to understand how behaviour and conditions prior or at divorce and separation affect later behaviour and well-being. As such this book is of special appeal to scholars of family research as well as to anyone interested in the role of divorce and separation in Europe in the 21st century.

Supporting children and families through separation and divorce is a major area of concern in contemporary society. However, it is sometimes hard for those professionals who are helping supporting families to hear the 'voice' of the child in this process. Writing from their wide experience as clinicians working with children and families, Emilia Dowling and Gill Gorell Barnes set out in this book to address this gap, and allow the child to be heard. Working with Children and Parents through Separation and Divorce combines research with clinical and practical approaches to working with families going through stress changes linked to separation or divorce. Attention is given to the wider

context of children's lives with the implications for general practice, schools and other services addressed in special chapters. A focused approach to divorce related problems that takes each family member's view into account is illustrated. Combining individual and family work helps parents to resolve difficulties, enabling children troubled by parental separation to progress with their own lives. Carter presents a "how to" manual for working with families in separation and divorce using an active, directive therapeutic process called Family Restructuring Therapy. This philosophy and effective process works well for the "normal" divorced family who need to learn new practices and patterns, and for the "high-conflict" family whose behavior patterns have become so maladaptive that the children's well-being is at risk.

Traumatic Divorce and Separation integrates the conflicting mental health perspectives concerning trauma theory and the study of divorce, in what the author has termed "traumatic divorce" -- that is, divorce complicated by the high-risk factors of domestic violence, mental illness, and/or substance abuse. The text's interdisciplinary discussion examines issues of financial disparities for women following divorce, traumatic symptoms in children and adults, and the legal controversies about the admissibility of psychological theories related to abuse. The author also addresses: domestic violence as a gendered crime against women; the need for a trauma-informed judicial response; and the need for a systemic judicial response that incorporates an understanding of

There are few people whose lives are unaffected by marriage breakdown. Yet how many are well informed about the divorce process and/or appreciate the wide powers the court has to redistribute property and income after divorce? Those who act without the benefit of specialist legal advice can risk impoverishing themselves and their families by accepting less than the court may award them or offering more than the court would order them to give. The Handbook of Separation and Divorce is principally concerned with the financial consequences of marriage breakdown in England and Wales. It suggests what should be done when a marriage is in difficulty and ensures that advice is obtained from a solicitor who is a specialist. It recognises that everyone who separates or divorces will be the poorer and recommends that where appropriate those who can face mediation should undertake it while at the same time ensuring they can get independent legal advice. The Handbook of Separation and Divorce will be essential reading for social workers and health professionals as well as the general reader and those going through, or considering, divorce or separation.
