

Documents Required For Indian Passport

Since the nineteenth century, a succession of states has classified the inhabitants of what are now the borderlands of Northeast India and Bangladesh as Muslim "frontier peasants," "savage mountaineers," and Christian "ethnic minorities," suspecting them to be disloyal subjects, spies, and traitors. In *Jungle Passports* Malini Sur follows the struggles of these people to secure shifting land, gain access to rice harvests, and smuggle the cattle and garments upon which their livelihoods depend against a background of violence, scarcity, and India's construction of one of the world's longest and most highly militarized border fences. *Jungle Passports* recasts established notions of citizenship and mobility along violent borders. Sur shows how the division of sovereignties and distinct regimes of mobility and citizenship push undocumented people to undertake perilous journeys across previously unrecognized borders every day. Paying close attention to the forces that shape the life-worlds of deportees, refugees, farmers, smugglers, migrants, bureaucrats, lawyers, clergy, and border troops, she reveals how reciprocity and kinship and the enforcement of state violence, illegality, and border infrastructures shape the margins of life and death. Combining years of ethnographic and archival fieldwork, her thoughtful and evocative book is a poignant testament to the force of life in our era of closed borders, insularity, and "illegal migration."

Forbidden Land tells the story of three attempts by Frans Welman and his companions to enter Nagaland, the land of more than forty Naga tribes. Although all three efforts ended in failure, the attempts demonstrate how India and the lesser-known Burma, now known as Myanmar, have been successful in keeping foreigners out. Neither country wants outsiders to observe the raging war that started shortly after independence from colonial Britain. The Nagas, who time and time again have made it known to both former colonizer Britain and newly emerging India that they wanted to be left alone, were invaded by India in 1954. Now 50 years later, the war is still on, although for the second time in its history peace talks are taking place. This war, forgotten by the international community, was the challenge for Welman and his companions. Their goal was to check on the rare yet compelling accounts of the land and people that told of beauty and democracy among the Nagas and their tenacity to not give in to a powerful alien master. The three journeys enlighten the reader to how fifty years of domination make a people believe that what has been done, including genocide, is genuinely defined in true terms. These journeys open eyes to see the beauty and the beast within. They will lead to the fascinating Nagas, who are in dire need to be assisted in their quest to be free.

India: Doing Business and Investing in ... Guide Volume 1 Strategic, Practical Information, Regulations, Contacts

Emigration in 21st-Century India is the first definitive exposition of contemporary Indian labour migration. The book provides a comprehensive appraisal of the policies, legislation and institutional architecture governing emigration at both federal and state levels. It posits that, geographically, emigration is now a more inclusive, pan-India phenomenon with many distinct features. It draws critical attention to the multiple dualities in Indian emigration, showing how the artificial distinction between a universal pravasi ('expatriate' or 'migrant') and a restricted aam pravasi ('common emigrant') distorts emigration governance. On the basis of extensive data from the Kerala Migration Survey (KMS) and National Sample Survey Organisation (NSSO) Rounds, it projects the emerging profile of the emigrant from new source states as also the likely number of migrants by 2021, drawing cross-country comparisons where appropriate. The work will be invaluable to scholars of migration and diaspora studies, economics, development studies and sociology, as well as policy makers, administrators, academics, and non-governmental organisations in the field.

In today's world of constant identification checks, it's difficult to recall that there was ever a time when "proof of identity" was not a part of everyday life. And as anyone knows who has ever

lost a passport, or let one expire on the eve of international travel, the passport has become an indispensable document. But how and why did this form of identification take on such a crucial role? In the first history of the passport in the United States, Craig Robertson offers an illuminating account of how this document, above all others, came to be considered a reliable answer to the question: who are you? Historically, the passport originated as an official letter of introduction addressed to foreign governments on behalf of American travelers, but as Robertson shows, it became entangled in contemporary negotiations over citizenship and other forms of identity documentation. Prior to World War I, passports were not required to cross American borders, and while some people struggled to understand how a passport could accurately identify a person, others took advantage of this new document to advance claims for citizenship. From the strategic use of passport applications by freed slaves and a campaign to allow married women to get passports in their maiden names, to the "passport nuisance" of the 1920s and the contested addition of photographs and other identification technologies on the passport, Robertson sheds new light on issues of individual and national identity in modern U.S. history. In this age of heightened security, especially at international borders, Robertson's *The Passport in America* provides anyone interested in questions of identification and surveillance with a richly detailed, and often surprising, history of this uniquely important document.

Ten years ago the topic of human smuggling and trafficking was relatively new for academic researchers, though the practice itself is very old. Since the first edition of this volume was published, much has changed globally, directly impacting the phenomenon of human smuggling. Migrant smuggling and human trafficking are now more entrenched than ever in many regions, with efforts to combat them both largely unsuccessful and often counterproductive. This book explores human smuggling in several forms and regions, globally examining its deep historic, social, economic, and cultural roots and its broad political consequences. Contributors to the updated and expanded edition consider the trends and events of the past several years, especially in light of developments after 9/11 and the creation of the U.S. Department of Homeland Security. They also reflect on the moral economy of human smuggling and trafficking, the increasing percentage of the world's asylum seekers who escape political violence only by being smuggled, and the implications of human smuggling in a warming world. This book provides an ethno-historical study of the trade system in Ladakh (India), a busy entrepôt for Silk Route trade between Central and South Asia. Previously a part of global networks, Ladakh became an isolated border area as national boundaries were defined and enforced in the mid-20th century. As trade with Central Asia ended, social life in Ladakh was irrevocably altered. The author's research combines anthropological, historical, and archaeological methods of investigation, using data from primary documents, ethnographic interviews and participation-observation fieldwork. The result is a cultural history of South and Central Asia, detailing the social lives of historical Ladakhi traders and identifying their community as a cosmopolitan social group. The relationship between the historical narratives and the modern ethnographic context illustrates how social issues in modern communities are related to those of the past. It is demonstrated that this relationship depends on both memories, narratives about the past constructed within present social contexts, and legacies, ways in which the past continues to shape present social interactions. This book will be of particular interest to anthropologists, historians and specialists in South and Central Asian studies, as well as those interested in historical archaeology, science, sociology, political science and economics.

This book analyses legal orders, actors and democracy in contemporary India, with a particular focus on the everyday contexts and dynamics of human rights, citizenship and socio-economic rights and laws. The contributions explore both 'institutionalization from above', where the judiciary and legislative body aim to govern people, and 'institutionalization from below', where the governed attempt to expand their substantive rights embedded within their everyday lives. This analysis identifies contact zones between the two directions, which act as spaces for democratic participation and negotiation. Such a perspective should be useful to both those who are interested in

Indian politics, and anthropologists and sociologists working on dynamics of laws and rights.

This book examines the effect on domestic and international law, and on human rights law and theory, of the impact of the sharp increase in the use of surrogacy. Featuring a wide range of views from academics and practitioners around the world, the contributors present critical analysis of the current regulation of surrogacy and consider what could be done to further protect the rights of all persons involved in surrogacy arrangements.

The author of this book hails from a Goan emigrant family and was born in British India and has had a rare exposure to British rule in India, to the Portuguese presence in Goa and to independent India, besides having lived in the United States for three years for post-graduate studies in engineering. After Independence, India raised objections to two forms of the Portuguese presence: (1) Portuguese government's patronage over certain Catholic dioceses which had been evangelized by the Portuguese in the sixteenth century, a dispute which was quickly resolved by July 18, 1969 and (2) the Portuguese political presence in Goa, Daman, Diu, Dadra and Nagar Haveli, which India claimed on grounds of geography and Portugal claimed on grounds of history and juridical superiority, the absence of any significant desire of the people to merge with India. The author has been privy to a full set of diplomatic exchanges with India, few other countries and within the Portuguese Government, in four volumes published by the Ministry of Foreign Affairs, Lisbon, an official de-classification, on Goa and its dependencies, 1947 to 1967, some of which have been extensively used in their complete text for better understanding in the book.

In an age of revolution, Mexico's creole leaders held aloft the Virgin of Guadalupe and brandished an Aztec eagle perched upon a European tricolor. Their new constitution proclaimed 'the Mexican nation is forever free and independent'. Yet the genealogy of this new nation is not easy to trace. Colonial Mexico was a patchwork state whose new-world vassals served the crown, extended the empire's frontiers and lived out their civic lives in parallel Spanish and Indian republics. Theirs was a world of complex intercultural alliances, interlocking corporate structures and shared spiritual and temporal ambitions. Sean F. McEnroe describes this history at the greatest and smallest geographical scales, reconsidering what it meant to be an Indian vassal, nobleman, soldier or citizen over three centuries in northeastern Mexico. He argues that the Mexican municipality, state and citizen were not so much the sudden creations of a revolutionary age as the progeny of a mature multiethnic empire.

Women in Indian Borderlands is an ethnographic compilation on the complex interrelationship between gender and political borders in South Asia. The book focuses on the border regions of West Bengal, Jammu and Kashmir and Northeast India. The chapters in the book examine the stories of women whose lives are intertwined with borders, and who resist everyday violence in all its myriad forms. They show how most of the traditional efforts to make geopolitical regions more secure end up privileging a masculine definition of security that only results in feminine insecurities. These essays discuss how women negotiate their differences with a state that, though democratic, denies space to differences based on ethnicity, religion, class or gender. Borders are interpreted as zones where the jurisdiction of one state ends and that of the other begins. What comes out is the startling revelation that women not only live on the borders, but in many ways, form them.

The core of this edited volume originates from a special issue of the Journal of the Ottoman and Turkish Studies Association (JOTSA) that goes well beyond the special issue to incorporate the stimulating discussions and insights of two Middle East Studies Association conference roundtables and the important work of additional scholars in order to create a state-of-the-field volume on Ottoman sociolegal studies, particularly regarding Ottoman international law from the eighteenth century to the end of the empire. It makes several important contributions to Ottoman and Turkish studies, namely, by introducing these disciplines to the broader fields of trans-imperial studies, comparative international law, and legal history. Combining the best practices of diplomatic history and history from below to integrate the Ottoman Empire and its subjects into the broader debates of the nineteenth-century trans-imperial history this unique volume represents the exciting work and cutting-edge scholarship on these topics that will continue to shape the field in years to come.

In this groundbreaking work, Kamal Sadiq reveals that most of the world's illegal immigrants are not migrating directly to the US, but to countries in the vast developing world, where they are able to obtain citizenship papers fairly easily. Sadiq introduces "documentary citizenship"

to explain how paperwork--often falsely obtained--confers citizenship on illegal immigrants. Across the globe, there are literally tens of millions of such illegal immigrants who have assumed the guise of "citizens." Who, then, is really a citizen? And what does citizenship mean for most of the world's peoples? Rendered in vivid detail, Paper Citizens not only shows how illegal immigrants acquire false papers, but also sheds light on the consequences this will have for global security in the post 9/11 world.

"Zamindar crosses political and conceptual boundaries to bring together oral histories of north Indian Muslim families divided between the two cities of Delhi and Karachi with extensive archival research in previously unexamined Urdu newspapers and government records of India and Pakistan. She juxtaposes the experiences of ordinary people against the bureaucratic interventions of both postcolonial states to manage and control refugees and administer their property. As a result, she reveals the surprising history of the making of the western Indo-Pak border, one of the most highly surveillanced in the world, which was instituted in response to this refugee crisis in order to construct national difference where it was the most blurred."--BOOK JACKET.
