Cattails grow in a marsh, pitcher plants grow in a bog, jewelweed grows in a swamp, right? Do sandhill cranes live among sandy hills? Frogs live near lakes and ponds, but can they live on prairies, too? What is a pine barrens, an oak opening, a calcareous fen? Wisconsin's Natural Communities is an invitation to discover, explore, and understand Wisconsin's richly varied natural environment, from your backyard or neighborhood park to stunning public preserves. Part 1 of the book explains thirty-three distinct types of natural communities in Wisconsin—their characteristic trees, beetles, fish, lichens, butterflies, reptiles, mammals, wildflowers—and the effects of geology, climate, and historical events on these habitats. Part 2 describes and maps fifty natural areas on public lands that are outstanding examples of these many different natural communities: Crex Meadows, Horicon Marsh, Black River Forest, Maribel Caves, Whitefish Dunes, the Blue Hills, Avoca Prairie, the Moquah Barrens and Chequamegon Bay, the Ridges Sanctuary, Cadiz Springs, Devil's Lake, and many others. Intended for anyone who has a love for the natural world, this book is also an excellent introduction for students. And, it provides landowners, public officials, and other stewards of our environment with the knowledge to recognize natural communities and manage them for future generations.

The stillness of the forest trail was so primeval that the tread of a soft-booted foot was a startling disturbance. At least it seemed so to the ears of the wayfarer, though he was moving along the path with the caution that must be practised by any man who ventures beyond Thunder River. He was a young man of medium height, with an open countenance and a mop of tousled tawny hair unconfined by cap or helmet. His garb was common enough for that country—a coarse tunic, belted at the waist, short leather breeches beneath, and soft buckskin boots that came short of the knee. A knife-hilt jutted from one boot-top. The broad leather belt supported a short, heavy sword and a buckskin pouch. There was no perturbation in the wide eyes that scanned the green walls which fringed the trail. Though not tall, he was well built, and the arms that the short wide sleeves of the tunic left bare were thick with corded muscle.

"This wonderful narrative by a retired history professor takes us back through the time and space of his ancestors and his own youth. Weaving between present and past, it offers a unique blend of nostalgia and incisive commentary about the imprint of Americans on the land and on each other. Gaines Post Jr. shares with us an odyssey that is at once personal and universal."-James McPherson, Emeritus Professor of History, Princeton University, and author of *Battle Cry of Freedom* On a solo trip in 2002, Gaines Post Jr. drives his 1966 Volkswagen Bug from California to Wisconsin and back, traveling so slowly that the land and its history seep into his bones. Crossing old trails kindles his imagination of the westward expansion that attracted his ancestors and shaped America's national character. In South Dakota, he visits Red Cloud's grave and hears the great Lakota leader whisper that Post is not at the end of his path. While working cattle on a Wyoming ranch, Post recalls his grandfather, born during Red Cloud's War. Part travelogue, part memoir, and overflowing with history's natural wonder, *Blue Bug, Red Road* speaks to those with a wandering spirit searching for quiet layers of time and memory within the American landscape.

Black grapes, tobacco smoke or a glimpse of the Dirty River – any one of these is sufficient to send me hurtling back in time to my childhood. It was a childhood of the 1960's – a time which, in many ways, feels so very different to today.
