This proceeding contains selected papers of The International Seminar On Recent Language, Literature, And Local Culture Studies “Kajian Mutakhir Bahasa, Sastra, Dan Budaya Daerah (BASA)” held on 20-21 September 2019 in Solo, Indonesia. The conference which was organized by Sastra Daerah, Faculty of Cultural Sciences Universitas Sebelas Maret and Culture Studies Postgraduate Program of Universitas Sebelas Maret. The conference accommodates topics for linguistics in general including issues in language, literature, local cultural studies, philology, folklore, oral literature, history, art, education, etc. Selecting and reviewing process for the The International Seminar On Recent Language, Literature, And Local Culture Studies “Kajian Mutakhir Bahasa, Sastra, dan Budaya Daerah” was very challenging in that it needs a goodwill of those who were involved in such a process. More than ten experts were invited in reviewing, giving suggestions for revision and at last selecting the papers. On that account, we would like to forward our appreciation and our gratefulness to such invited experts for having done the process. The committee received more than 180 papers from the participants and based on the results of the review, only 141 papers were declared fit to be presented at the seminar and subsequently published in the proceedings of BASA#3-2019 Papers in the proceeding are expected to give academic benefits, especially in broadening the horizon of our understanding in language, literature, and local culture studies. We realize that what we are presenting for the publication is till far for being perfect.

Constructive criticism is very much welcome for improvement. Finally, the committees thank for the participation and congratulate for the publication of the papers in the proceedings of BASA#3-2019. The committees also thank all those who have supported and actively participated for the success of this event. Hopefully these Proceedings can be used as references in developing technology and improving learning activities in the fields of education, social, arts and humanities.

An easy-to-use resource for professionals and parents, this book provides fun and practical ideas to help motivate and extend communication and play skills in children with autism with the support of pictures. The book describes how picture scripts can help facilitate play and learning and provides 40 photocopiable scripts across a range of different activities such as drawing, cooking, using construction toys, imaginative play, arts and crafts, and life skills. Tasks are presented in small manageable step-by-step picture sequences and support a range of skills including following instructions, increasing independence, comprehension, story-telling and choice-making. Readers can print copies of the scripts from the CD-ROM that accompanies the book. Ideal for special education teachers, early years practitioners, speech and language therapists, occupational therapists, and parents, this will be an excellent tool for any classroom, home or therapy setting.

The groundbreaking book that explains Sensory Processing Disorder (SPD)--and presents a drug-free approach that offers hope for parents--now revised and updated. Does your child exhibit... Over-responsivity--or under-responsivity--to touch or movement? A child with SPD may be a "sensory avoider," withdrawing from touch, refusing to wear certain clothing, avoiding active games--or he may be a "sensory disregarder," needing a jump start to get moving. Over-responsivity--or under-responsivity--to sounds, sights taste, or smell? She may cover her ears or eyes, be a picky eater, or seem oblivious to sensory cues. Cravings for sensation? The "sensory craver" never gets enough of certain sensations, e.g., messy play, spicy food, noisy action, and perpetual movement. Poor sensory discrimination? She may not sense the difference between objects or experiences--unaware of what she's holding unless she looks, and unable to sense when she's falling or how to catch herself. Unusually high or low activity level? The child may be constantly on the go--wearing out everyone around him--or move slowly and tire easily, showing little interest in the world. Problems with posture or motor coordination? He may slouch, move awkwardly, seem careless or accident-prone. These are often the first clues to Sensory Processing Disorder--a common but frequently misdiagnosed problem in which the central nervous system misinterprets messages from the senses. The Out-of-Sync Child offers comprehensive, clear information for parents and professionals--and a drug-free treatment approach for children. This revised edition includes new sections on vision and hearing, picky eaters, and coexisting disorders such as autism and Asperger's syndrome, among other topics.
