ICSE/ISC Boards

Environmental Studies: Understanding the World Around Us is a series of five books for classes 1 to 5 on Environmental Studies. The series strictly follows the new NCERT syllabus and the vision of the National Curriculum Framework (NCF) 2005. The series introduces young learners to their environment. They also learn how to preserve it while reading the books. The books have been written in a child-friendly language and are supported by lively illustrations. The concepts have been explained in a simple, clear and logical manner for better understanding.

This textbook is written to bring about an awareness of a variety of environmental concerns. It covers a wide range of topics and issues about environmental science. It attempts to create a pro-environmental attitude and a behavioral pattern in society that is based on creating sustainable lifestyles. But a textbook can hardly be expected to achieve a total behavioral change in society. Conservation is best brought about through creating a love for nature.
