This text takes a unique approach to presenting environmental health to students. Rather than being organized around the traditional regulatory fields (air pollution, hazardous wastes, etc.), this book is structured around the things we do as individuals and societies that result in environmental health hazards. The author details the hazards of energy production, industry, food production, and the modern lifestyle, while exploring our place within the global community. The book is an excellent introduction to environmental health for students of public health and health science. or other course materials. Chapters feature questions and fill in the blank exercises, allowing students to check their understanding of the subject matter, and assess their progress early on. Everything in the book is designed to answer the question "What do I need to know?". The fourteen chapters of the book cover the many areas involved in environmental science and environmental studies, including chemical, physical, biological, and earth science principles, earth spheres, and biomes. Also covered are environmental cycles, material and energy resources, pollution, and environmental laws and regulations. Each chapter begins with an explanation of the topic to be discussed, and indicates where in a textbook students can find complete discussions, figures, charts and tables. Chapter exercises are presented in multiple choice, fill in the blank, and matching formats, allowing students many opportunities for self-evaluation prior to taking class examinations. Of special note is the Rap City in Green feature of the book, which reviews major concepts in verse form. The musicality of the verses enhances appeal, and is a highly effective memory aid. Pathways to Learning Environmental Science is an excellent support tool for students in general education environmental science/studies courses.

There are moments in everyone's degree when you are expected to do something unfamiliar and daunting - present a seminar, go on a fieldtrip, create a wiki page, lead a lab team - and how to do it or what to expect is unclear. Studying at university requires a different approach from studying at school and this book explains this transition. Packed with practical hints, study tips, short cuts, real-life examples and careers advice, this book will prove invaluable throughout your geography, earth science or environmental science degree. Designed for all geography, earth science and environmental science students, this book provides guidance on: time management and effective research constructing essays and creating arguments giving presentations confidently undertaking fieldwork and laboratory work avoiding plagiarism and citing references correctly using e-technologies such as blogs and your university's VLE online assessment and peer feedback. This guide also explains the role of the academic and how it differs from that of a school teacher, and prepares you for the world of work by showing how the skills you learn at university today can be used in your career choice of tomorrow.

Do your part in caring for the environment by first understanding the core elements of environmental science. This straightforward study guide will help you come into terms with the problems that change the environment, some of which you may have contributed to. Also, know how science can help correct these problems so you can better support research and help raise public awareness too.
