This collection represents a systematic exploration of media entertainment from an academic perspective. Editors Zillmann and Vorderer have assembled scholars from psychology, sociology, and communication to provide a broad examination of the primary function of media entertainment--the attainment of gratification. Chapters included here address vital aspects of media entertainment and summarize pertinent findings, providing an overview of what is presently known about the appeal and function of the essential forms of media entertainment, and offering some degree of integration. Written in a clear, non-technical style, this volume provides a lively and entertaining study of media entertainment for academic study and coursework.

This book presents a timely analysis of the psychological influences, underpinnings, and predictors of non-consensual image-based sexual offending (NCIBSO), such as revenge pornography, cyber-flashing, deepfake media production and upskirting. In this

rapidly expanding field, this book offers a novel perspective that encompasses both a forensic psychoanalytic analysis of offending behaviours and an examination of the influence of our use of online environments and digital platforms on these behaviours. The authors begin by outlining the historical and legal context before moving on to a critique of previously posited motivating factors. Rather than conceptualising NCIBSO in purely gendered terms, they demonstrate the potential for a psychological framework to facilitate a better understanding of how and why people engage in a range of non-consensual sexual image offences. In doing so it will provide fresh insights for policymakers and clinicians, in addition to scholars from across the fields of psychology, sociology, criminology, law, media and gender studies.

Exploring topics ranging from sexting, revenge porn and the law to relationship boundaries and sexual stereotypes, this practical teaching resource facilitates discussion on the difficult issues surrounding pornography with young people aged 11-19. At a time when pornography is more accessible than ever and many young people are inadvisably turning to pornography to learn about sex and relationships, this book explores what pornography is, how sex is portrayed in the media versus the reality, how pornography can affect sexual relationships, self-esteem and body image, and provides details of where young people can seek advice and support if they are worried. It includes full lesson plans, activities, photocopiable materials and clear information on how to implement the programme, including outlines for staff CPD sessions and parent workshops. A comprehensive resource to use as part of PSHE or SRE sessions in schools or youth services, this book will be vital for PSHE teachers, senior leadership teams, pastoral care teams, school counsellors, youth workers, school nurses, and anyone who might be involved in sex education provision for young people.

clear, direct and fluid graphic lines, which upset parts of the establishment (a couple are shown in one print making love while being blessed by the hand of God; in another, a nude Mary Magdalene embraces Christ on the Cross). Hoyland explores the relationship between the spiritual and the sensual in Gill's many prints and drawings, including the Song of Songs woodcuts. Images are like texts influenced by their cultural environment. To decode their code and at the same time to liberate it from the guardianship of the text interpretation, the authors of this volume have made the task. They explore the question of the role of images in the reconstruction of women's history in antiquity. The answers range from fundamental interpretations of ancient images from a gender-oriented perspective to the exploration of more specific topics such as the portrayal of nudity or the woman as ruler, mother or priestess. "Images and Gender" is a unique groundbreaking collection of the latest gender research on the subject Iconography of Egypt, Palestine and Israel as well as Greek and Roman antiquity.

The sixth edition of this approachable text draws on both academic and applied perspectives to offer a lively critique of contemporary advertising's effects on American character and culture. Berger explains how advertising works by employing a psycho-cultural approach, encouraging readers to think about advertisements and commercials in more analytical and profound ways. The sixth edition features updated statistics, two new chapters, and new discussions of the role of brands, social media, non-binary perspectives on gender, advertising and the 2020 election, the problem of self-alienation, and how all these elements relate to consumption. Berger also considers the Values and Lifestyle (VALS) and Claritas typologies in marketing. Distinctive chapters examine the "1984" Macintosh commercial, a Fidji perfume advertisement, and a moisturizer

advertisement from semiotic, psychoanalytic, sociological, Marxist, mythic, and feminist perspectives. *Ads, Fads, and Consumer Culture* provides an accessible overview of advertising in the United States, spanning issues as diverse as sexuality, politics, market research, consumer culture, and more, and helps readers understand the role that advertising has played, and continues to play, in all our lives.

In this profoundly original and far-reaching study, Robert M. Polhemus shows how novels have helped to make erotic love a matter of faith in modern life. Erotic faith, Polhemus argues, is an emotional conviction—ultimately religious in nature—that meaning, value, hope, and even the possibility of transcendence can be found in love. Drawing on a wide range of disciplines, Polhemus shows the reciprocity of love as subject, the novel as form, and faith as motive in important works by Jane Austen, Walter Scott, the Brontës, Dickens, George Eliot, Trollope, Thomas Hardy, Joyce, D. H. Lawrence, Virginia Woolf, and Samuel Beckett. Throughout, Polhemus relates the novelists' representation of love to that of such artists as Botticelli, Vermeer, Claude Lorrain, Redon, and Klimt. Juxtaposing their paintings with nineteenth- and twentieth-century texts both reveals the ways in which novels develop and individualize common erotic and religious themes and illustrates how the novel has influenced our perception of all

The cult of eroticism is a pervasive force in modern society, affecting almost every aspect of our daily lives. In this book, Paul Rutherford argues that this phenomenon is a product of one of the major commercial and political enterprises of the twentieth and twenty-first centuries: the creation of desire - for sex, for wealth, and for entertainment. *A World Made Sexy* examines museum exhibitions, art, books, magazines, films, and television to explore the popular rise of eroticism in America and across the developed world. Starting with a brief foray into the history of pornography, Rutherford goes on to explore a sexual liberation movement shaped by the ideas of Marx and Freud, the erotic styles of Salvador Dali and pop art, the pioneering use of publicity as erotica by Playboy and other media, and the growing concerns of cultural critics over the emergence of a regime of stimulation. In one case study, Rutherford pairs James Bond and Madonna in order to examine the link between sex and aggression. He details how television advertising after 1980 constructed a theatre of the libido to entice the buying

public, and concludes by situating the cultivation of eroticism in the wider context of Michel Foucault's views on social power and governmentality, and specifically how they relate to sexuality, during the modern era. *A World Made Sexy* is about power and pleasure, emancipation and domination, and the relationship between the personal passions and social controls that have crafted desire.

Was he influenced by the environment, he asks himself, and if so, how? Ginzburg uses his own experience to examine the elusive and constantly evolving nature of history and historical research.

Despite headlines that label all harassment among youth as bullying, there is in fact a difference between sexual harassment and bullying. This book discusses the similarities and important differences between the two, offering firsthand accounts from victims and others involved in combating the activities that victimize students. It provides parents, youth advocates, scout leaders, and other concerned adults with practical steps to partner with schools to prevent and intervene on the behaviors to help

keep kids safe. The book clearly identifies the steps to take to hold schools accountable when a student has been harassed or bullied, even when the school is not stopping the behavior. Providing examples throughout the work, Strauss helps readers become better acquainted with the various activities that constitute sexual harassment and bullying and what they can do to combat the problem.

Focusing on victims of online facilitated child sexual abuse, this book takes a rigorous approach to existing literature, addressing some of the most pressing public and policy questions today: which children are vulnerable to online facilitated child sexual abuse; how is their vulnerability made; what are they vulnerable to and how can resilience (both human and technical) be promoted? The book also probes the changing nature of child sexual abuse in the digital age: how is it the same or different and what does this mean for victims and survivors? These questions are not only critical to developing effective responses that build resilience but are also central to debates about harm and cognitive justifications drawn on by both victims and offenders.

This book explores a type of wandering referred to as “errant bodies.” This form of wandering is intentional, without specific destination, and operates as a means of resistance against hegemonic forms of power and cultural prescriptions. Beginning with an examination of the character and particulars of being an errant body, the book investigates historical errant bodies including Ancient Greek Cynics, Punks, Baudelaire, Situationists, Earhart, Kerouac, Fuller, Baudrillard, Hamish Fulton, and Keri Smith.

Being an errant body means stepping to the side of dominant culture, creating a potential means of political resistance in the technologically driven twenty-first century. Lamanna/Riedmann/Stewart's bestselling **MARRIAGES, FAMILIES, AND RELATIONSHIPS: MAKING CHOICES IN A DIVERSE SOCIETY**, 14th edition, emphasizes a theme that is especially relevant in our modern and global world: making choices in a diverse society. Combining various theoretical perspectives with real-world examples, the text will help you understand how people are influenced by the society around them, how social conditions change in ways that affect family life, the interplay between families and the larger society, and the family-related choices that individuals make throughout adulthood. You'll gain insightful perspectives on different ethnic traditions and family forms. You will also be empowered to question assumptions and reconcile conflicting ideas and values as you make informed choices in your own life. Everyday Feminist Research Praxis: Doing Gender in The Netherlands offers a selection of previously unpublished work presented during the 2011, 2012 and 2013 Netherlands Research School of Gender Studies (NOG) conferences. Reflecting the wide spectrum of interdisciplinary gender studies, this volume is organised into four sections along four conceptual knots. These thematic entry-points are space/time, affectivity, public/private, and technological mediation. The central emphasis of this volume is twofold: first, the everyday is approached as a concretely grounded site of micro-political power struggles. Second, the contributors make

explicit connections between theory and their everyday feminist research practices. As a whole, the interventions – ranging from fashion modelling, child-birthing discourses and digital documentaries – show how feminist research praxis remains crucial in critically disentangling naturalized routines of daily life, which in turn enables the scrutiny of, for example, the arbitrariness of entrenched power relations and contradictory, personal and collective, everyday trajectories. *Everyday Feminist Research Praxis*, thus, energises possibilities for new forms of recognition, representation and redistribution of power.

It has been over ten years since the release of the first edition. Over this time span, the dilemmas for the sexual offender - including their visceral and virtual manifestations - have captured the imagination of the public, have rewritten the subdiscipline of behavioral sciences and the law, and have led to new technologies in the assessment, diagnostic, and treatment decision sciences. These dilemmas circulate in the marketplace of conspicuous digital consumerism that stylizes and commercializes the sex offender industry through society's ubiquitous infotainment-driven and carnival-like outlets. This second edition will act as the

antidote to the voyeurism that addictively feeds on the dramatizations that caricature the victims, assailants, and predicaments that constitute the dilemmas for the sexual offender. The authors systematically probe and dissect the boundaries of their topic with erudition and insight. This acumen consists of psychiatric, legal, moral, and bio-social realms of inquiry and analysis. Old questions about the nature of evil, women in society, violence and mental illness, and treatment and recovery receive fresh attention based on the latest empirical evidence. New chapters address emergent forms of deviant sexuality (e.g., cyber-offending, erotic and sadistic psychopathy, and child-molesting clergy). New sections illuminate existing forms of aberrant sexuality (e.g., moral development and necrophilia, moral reasoning and sex offenders, and the psychodynamics of serialized lust murder). This state-of-the-art text, replete with cutting-edge case illustrations, demonstrates how medicine, law, and culture are inextricably (and sometimes inexplicably) bound together. It will serve as an outstanding resource for psychiatrists, lawyers, criminologists, policy analysts, and forensic mental health professionals as the authors expertly reveal the world of sexual offenders.

People with learning difficulties are considerably more likely to experience sexual violence than non-disabled people, and for this reason they are often described as 'vulnerable'. However, the use of this label can in fact increase risk. This book argues that by seeing adults with learning difficulties as vulnerable and in need of protection, they are stripped of their autonomy and left with fewer skills that are needed to protect themselves from harm. Their different treatment, such as segregation and over-protection, can in fact increase their 'vulnerability'. The author discusses a range of social processes, such as sex education, self-determination, friendships, sexual relationships and social inclusion, and examines the risk and benefits associated with

each. Drawing on the everyday experiences of 29 adults with learning difficulties, the author illustrates how people with learning difficulties can be capable of safeguarding themselves from harm, and makes a range of suggestions for enabling them to become better equipped at managing risk themselves. This book will be essential reading for practitioners working with people with learning difficulties, as well as students and academics in the fields of disability and social work.

This comprehensive text examines the unique characteristics of sexual offenses and the resulting laws that pertain specifically to them, including the causes and treatment of sexual offenses as well as the policy implications of research outcomes. Sexual offenders are often treated differently than other offenders (by both the community and the criminal justice system) as a result of public scorn and recidivism. This distinctive book answers the call for thorough, research-based information on this inherently controversial subject. Over the last decade there has been dramatically increased interest in the ways that technology has been used in the abuse and exploitation of children, due in part to increasing numbers of convictions for child pornography-related offenses. Opinion swings between those who feel that there is a danger of distorting the threat posed to children by technology, and those for whom it appears that the threat has been grossly underestimated. Current literature surrounding the debate at times seems to create more questions than answers and what quickly becomes apparent is that the data we have to inform our understanding is partial, potentially context specific, and at times seemingly contradictory. This book broadens our

understanding of the complex nature of online sexual exploitation of children and considers the risk that those engaged in Internet-related offences pose to children in both the online and offline environments. It focuses on cutting-edge research and conceptual thinking that views perpetrators within context, examines those impacted by such offending, describes emerging legal and policy issues, and proposes innovative strategies for prevention within a dynamic global environment. *Understanding and Preventing Online Sexual Exploitation of Children* responds to the growing call for help across all practice areas, from judicial to therapeutic, and will provide an invaluable resource for practitioners and policy makers working in the field, as well as students and academics studying sexual exploitation and cyber crime.

Whilst the value of human integrity within the laws of individual states and the documents of international human rights is being increasingly consolidated and will become, sooner or later, the primary concern of the law, severe breaches of this value are indeed still widespread. In particular the sexual exploitation of children constitutes one of the most serious questions of national, regional, transnational and international law. According to international records, every fifteen seconds a child is raped in Africa alone. Almost half of the cases heard by the ICTY concern the sexual exploitation of women and children during armed conflict. More or less similar conclusions may be reached regarding the ICTR or the SCSL. In Rwanda alone, 500,000 females were raped. Almost 200,000 females and children have been the victims of cruel forms of sexual violence during the conflicts in Congo. Sexual abuse of children by priests cannot any longer be concealed in Australia, Belgium, Canada, Germany, France, Ireland, Mexico, the United Kingdom, and the United States, although it is ignored in most Islamic countries. The sexual exploitation of children is also widely practised in many other

countries. Regrettably, 79% of all world trafficking is for sexual exploitation. The principal subject matter of this book is the legal etymology of sexual exploitation governing minors. The aim is to identify and analyse jus cogens and obligation erga omnes in relation to the sexual exploitation of children and to evaluate the international responsibility of states in relation to the elimination or prevention of the crime, and the prosecution and punishment of offenders. This book provides extensive information on pedophilia (sexual interest in the prepubescent body age), hebephilia (sexual interest in the early-pubescent body age) and sexual offenses against children, i.e., the various forms of child sexual abuse, including the use of child sexual abuse images, along with the current state of knowledge concerning offender groups. The book makes it clear that pedophilia or hebephilia do not inevitably lead to offenses against children - that there are those who keep their desires in their fantasies and do not act them out on the behavioral level. The World Health Organization classifies pedophilia as a mental disorder. It can be safely assumed that many pedophile men in a given community live their lives, unrecognized and adamant about hiding their sexual drives from society and from themselves, and who are genuinely motivated not to act upon their sexual fantasies. The numbers of exactly this particular group of pedophilically inclined non-offenders can be increased by preventive therapeutic measures. For this purpose, two treatment programs have been developed at the Institute of Sexology and Sexual Medicine at the Charité-Universitätsmedizin Berlin (University Clinic) since the initiation of the Prevention Project Dunkelfeld in 2005 - First, the project involving adult participants (Berlin Dissexuality Therapy: BEDIT) and later, another for adolescents (BEDIT-A), who find themselves attracted to children. Both program manuals are completely integrated into this work, which reflects 15

years of assessment and treatment experience.

Sexual Behavior in the Human Female was originally published in 1953, five years after the male volume. The material presented in this book was derived from personal interviews with nearly 6,000 women; from studies in sexual anatomy, physiology, psychology, and endocrinology. The book presents data on the incidence and frequency with which women participate in various types of sexual activity. The authors show how such factors as age, decade of birth, and religious adherence are reflected in patterns of sexual behavior. Some measure of the social significance of the various types of sexual behavior is provided. The authors make comparisons of female and male sexual activities, and investigate the factors which account for the similarities and differences between female and male patterns of behavior. 872 pp + intro, 155 figs, 179 tables, bibliography, index, Cloth \$49.95 (short), bb: April, pub: May
