Offers an analysis of the politics of court reform through a focused review of Indonesia's complex court system.

This book's basic hypothesis – which it proposes to test with a cognitive-sociological approach – is that legal behavior, like every form of human behavior, is directed and framed by biosocial constraints that are neither entirely genetic nor exclusively cultural. As such, from a sociological perspective the law can be seen as a super-meme, that is, as a biosocial constraint that develops only in complex societies. This super-

meme theory, by highlighting a fundamental distinction between defensive and assertive biases, might explain the false contradiction between law as a static and historical phenomenon, and law as a dynamic and promotional element. Socio-legal scholars today have to face the challenge of pursuing a truly interdisciplinary approach, connecting all the fields that can contribute to building a modern theory of normative behavior and social action. Understanding and framing concepts such as rationality, emotion, or justice can help to overcome the significant divide between micro and macro sociological knowledge. Social scientists who are interested in the law must be able to master the epistemological discourses of different disciplines, and to produce fruitful syntheses and bridge-operations so as to understand the legal phenomenon from each different point of view. The book adopts four perspectives: sociological, psychological, biological-evolutionary and cognitive. All of them have the potential to be mutually integrated, and constitute that general social science that provides common ground for exchange. The goal is to arrive at a broad and integrated view of the socio-legal phenomenon, paving the way for a comprehensive theory of norm-oriented and norm-perceived actions.

The Penal Code of California forms the basis for the application of criminal law within the state of California. It was originally enacted in 1872 as one of the original four California Codes, and has been substantially amended and revised since then. This book contains the following parts: Part 3 - Of Imprisonment and the Death Penalty, Part 4 - Prevention of Crimes and Apprehension of Criminals, Part 5 - Peace Officers' Memorial, Part 6 - Control of Deadly Weapons

Winner of the 2017 British Society of Criminology Book Prize The penal voluntary sector and the relationships between punishment and charity are more topical than ever before. In recent years in England and Wales, the sector has featured significantly in both policy rhetoric and academic commentary. Penal voluntary organisations are increasingly delivering prison and probation services under contract, and this role is set to expand. However, the diverse voluntary organisations which comprise the sector, their varied relationships with statutory agencies and the effects of such work remain very poorly understood. This book provides a wide-ranging and rigorous examination of this policy-relevant but complex and little studied area. It explores what voluntary organisations are doing with prisoners and probationers, how they manage to undertake their work, and the effects of charitable work with prisoners and probationers. The author uses original empirical research

and an innovative application of actor-network theory to enable a step change in our understanding of this increasingly significant sector, and develops the policy-centric accounts produced in the last decade to illustrate how voluntary organisations can mediate the experiences of imprisonment and probation at the micro and macro levels. Demonstrating how the legacy of philanthropic work and neoliberal policy reforms over the past thirty years have created a complex three-tier penal voluntary sector of diverse organisations, this cutting-edge interdisciplinary text will be of interest to criminologists, sociologists of work and industry, and those engaged in the voluntary sector.

For an increasing number of hospitals and universities the institutional review board (IRB) has become a way of life. Spurred into existence by public outcries about the unethical nature of certain modern scientific experiments, the IRB represents the most visible evidence of institutional commitment to ethical review of clinical research. However, this exponential growth of IRB activities has not occurred without growing pains. Like the Environmental Protection Agency, IRBs have had to develop procedures and standards without a clear consensus as to what would be optimal for science and society. Each IRB has perforce devised its own *modus operandi*, subject to general principles and guidelines laid down by others but still relatively free to stipulate the details of its functioning. Thus one can applaud the general idea as well as the overall performance of IRBs without asserting that the millennium has arrived. The composition, philosophy, efficiency, responsibilities, and

powers of IRBs remain topics suitable for debate. It is still possible (and appropriate) for IRB members to worry both about the propriety of their decisions and the personal costs of their service.

Enacted in 1860, the Indian Penal Code is the longest serving and one of the most influential criminal codes in the common law world. This book commemorates its one hundred and fiftieth anniversary and honours the law reform legacy of Thomas Macaulay, the principal drafter of the Code. The book comprises chapters which examine the general principles of criminal responsibility from the

perspective of Macaulay, and from more recent accounts by lawmakers and reformers. These are framed by chapters that examine the history and conceptual underpinnings of Macaulay's Code, consider the need to revitalize the Indian Penal Code, and review the current challenges of principled criminal law reform and codification. This book is a valuable reference on the Indian Penal Code, and current debates about general principles of criminal law for legal academics, judges, legal practitioners and criminal law reformers. It also promises to have wider scholarly appeal, of interest to legal theorists, historians and policy specialists. The Routledge Handbook of Irish Criminology is the first edited collection of its kind to bring together the work of leading Irish criminologists in a single volume. While Irish criminology can be characterised as a nascent but dynamic discipline, it has much to offer the Irish and international reader due to the unique historical, cultural, political, social and economic arrangements that exist on the island of Ireland. The Handbook consists of 30 chapters, which offer original, comprehensive and critical reviews of theory, research, policy and practice in a wide range of subject areas. The chapters are divided into four thematic sections: Understanding crime examines specific offence types, including homicide, gangland crime and white-collar crime, and the theoretical perspectives used to explain

them. Responding to crime explores criminal justice responses to crime, including crime prevention, restorative justice, approaches to policing and trial as well as post-conviction issues such as imprisonment, community sanctions and rehabilitation. Contexts of crime investigates the social, political and cultural contexts of the policymaking process, including media representations, politics, the role of the victim and the impact of gender. Emerging ideas focuses on innovative ideas that prompt a reconsideration of received wisdom on particular topics, including sexual violence and ethnicity. Charting the key contours of the criminological enterprise on the island of Ireland and placing the Irish material in the context of the wider European and international literature, this book is essential reading for those involved in the study of Irish criminology and international and comparative criminal justice.
