The Power of Faith: How the Love of God Found Me details the circular journey the author's life had taken through the years. It chronicles the author's life from the 1960s until the present. While he was ambitious and desired to practice law, God had a quite different intention in mind. Barriers and adversity occurred with each attempt to try to practice. Rather than be a practicing attorney, God wanted the author to understand the meaning of his life: the discovery of the meaning of true love. God wanted the author to understand that God loved him and that He would provide for the essential needs for his survival. Likewise, God wanted to convey that if the author loved Him too, additional blessings would come his way beyond mere survival. All this knowledge resulted from a simple adverse event: the tripping over a small dog resulting in a broken foot. God wanted the author to convey this sentiment to those receptive. With the readers examining their lives, they will see the role God has with them along with the love God has in their lives. God exists and is real, and all it takes is believing to change one's path in life.

Exponents Practice Workbook for Grades 9-10: Contains 100 Practice Questions with Answer Key Exponents are an important topic in Algebra and are widely used in problems. This workbook is designed for students of grades 9 and 10 to practice and master exponents. By the end of year 10, students must understand the laws of exponents and how to solve problems containing exponents (also called indices). This workbook contains 100 questions of varying difficulty levels in six different sections. There are no multiple-choice questions, instead, students have to solve exponents and put their final answer in the answer box. Below each of the questions, some space has been provided for students to solve the problem. However, ask students to use their own copy if you want to reuse this workbook. The level of difficulty increases at each section and more exponent rules are included at every stage. Parents and teachers can remove the two-page answer key at the end and give this workbook to students or your children. All the answers are on both sides of the last page which can easily be removed. This workbook will provide enough practice for students to solve all types of exponent problems in the future.
