Contrasting two Protestant justices who hold distinctively different worldviews, Chief Justice William H. Rehnquist and Justice Harry A. Blackmun, this book explores how each came to hold his worldview, how each applied it in Supreme Court rulings, and how it led them to differing outcomes for liberty, equality, and justice. This clash of worldviews between Rehnquist, whose religious and philosophical influences were anchored in the Reformation, and Blackmun, whose Reformation theology was modified by Enlightenment philosophy, provide the context to examine the true nature of justice, liberty, and equality and to consider how such ideals can be maintained in a society with increasingly divergent worldviews.

The age-old question for every leader—how do we bring out the best in those we lead? Anyone who has run a company, raised a family, lead an army, or coached a team struggles to find the key to help others excel and realize their potential. It is surprising how often we resort to criticism vs. an approach that actually results in a better worker and a better person. What if we could speak Words of Life that transform those under our influence and ignite fires of intrinsic motivation? What if those we lead found great purpose in what they do and worked at their jobs with all their heart? Isn't that what leaders, parents and teachers really want? Ultimately, don't we hope to foster intrinsic motivation so that the individuals we lead become better employees, better students or better athletes? Recent discoveries of brain science and the wisdom of top CEO's that Dr. Tim Irwin interviewed for this book give us the answers we've long sought. In most organizations, the methods used to provide feedback to employees such as performance appraisal or multi-rater feedback systems, in fact, accomplish the exact opposite of what we intend. We inadvertently speak Words of Death. Brain science tells us that these methods tend to engage a natural "negativity bias" that is hardwired in us all. Science in recent years discovered that affirmation sets in motion huge positive changes in the brain. It releases certain neuro chemicals associated with well-being and higher performance. Amazingly, criticism creates just the opposite neural reaction. The most primitive part of the brain goes into hyper defense mode, compromising our performance, torpedoing our motivation and limiting access to our higher-order strengths. How do we redirect employees who are out-of-line without engaging our natural "negativity bias?" Leaders must forever ban the term, "Constructive Criticism." Brain science tells us that we can establish a connection between the employee's work and his or her aspirations. This book calls for a new approach to align workers with an organization's mission, strategy and goals, called Alliance Feedback. A practical guide for leading others with wisdom, integrity, and humanity This book argues that great leadership requires wisdom. Rather than a formulaic managerial approach to leadership, Lead with Wisdom presents the case for leadership based on our shared humanity and the stories that unite us. What emerges is a model of leadership based on learning to read key patterns of human experience: the way language shapes our reality, how we form new meaning through conversation, how relationships determine influence and how we deal with uncertainty. It presents readers with the tools and illustrated examples to implement the four arts of leading wisely: how to draw out and create a new story in the organization, how to find and leverage the brilliance of people, how to speak with promise to restore meaning and hope, and how to show grace in dealing with the most demanding people and circumstances. Offers a leadership approach rooted in our shared humanity and the stories which unite and define us Ideal for corporate leaders, middle managers, administrators, and anyone else with management responsibilities Written by a popular speaker on leadership and the author of Arts of the Wise Leader, with personal CEO experience and a PhD in the history of ideas Structured as one key idea per page or double page spread with funky line drawings supporting the concepts and skills For anyone who wants to lead with wisdom, integrity, and humanity, Lead with Wisdom offers a welcome alternative to traditionally robotic and formulaic leadership strategies.

How did the early church grow so quickly? How can we replicate that success today? The early church gives us the perfect example of how a small group of committed Christians can affect their communities and change the world. The apostles brought a change to the way the people of God lived. Wherever they went, what they believed transformed the culture. In *Ordinary People, Extraordinary Power*, John Eckhardt helps you understand the purpose and function of today's spiritual apostles. Using examples from Jesus and the early church, Eckhardt shows you God's strategy for the apostolic and the biblical foundation for its use and pattern. You will discover... The characteristics of the apostle The proper role and function of the apostolic The ways God uses this gift in the world today Apostles are pioneers. They preach and teach the culture of the kingdom of God--a kingdom of love, humility, power, authority, and service. Through training, teaching, discipleship, and relationship, God begins to empower individuals by the Holy Spirit in preparation for greater service. Our world needs people willing to break free from religion and tradition and be activated to heal, deliver, prophesy, preach, and demonstrate God's kingdom. It is time to put the apostolic back in the church.

Will your next leader be insignificant—or indispensable? The importance of leadership and the impact of individual leaders has long been the subject of debate. In *Indispensable*, Harvard Business School professor Gautam Mukunda offers an enticingly fresh look at how and when individual leaders really can make a difference. By identifying and analyzing the hidden patterns of their careers, and by exploring the systems that place these leaders in positions of power, *Indispensable* sheds new light on how we may be able to identify the best leaders and what lessons we can learn, from both the process and the result. Profiling a mix of historic and modern figures—from Thomas Jefferson and Abraham Lincoln to Winston Churchill and Judah Folkman—and telling the stories of how they came to power and how they made the most important decisions of their lives, *Indispensable* reveals how, when, and where a single individual in the right place at the right time can save or destroy the organization they lead, and even change the course of history. *Indispensable* will also help you understand this new model so you can use it in your own life—whether you're a citizen casting a ballot, an executive choosing your next CEO, or a leader trying to make your mark.

In this offbeat approach to leadership, college president Steven B. Sample—the man who turned the University of Southern California into one of the most respected and highly rated universities in the country—challenges many conventional teachings on the subject. Here, Sample outlines an iconoclastic style of leadership that flies in the face of current leadership thought, but a style that unquestionably works, nevertheless. Sample urges leaders and aspiring leaders to focus on some key counterintuitive truths. He offers his own down-to-earth, homespun, and often provocative advice on some complex and thoughtful issues. And he provides many practical, if controversial, tactics for successful leadership, suggesting, among other things, that leaders should sometimes compromise their principles, not read everything that comes across their desks, and always put off decisions.
