Have you ever wondered what a guide dog does? How do they know to lead a blind owner? Can they understand traffic lights? Most importantly, how does the owner know where to pick up the poop? This memoir answers these questions—and more. It tells what guide dogs are supposed to do. They're smart, loyal and well-trained—but not all dogs are created alike. Musket is proof of that. He's definitely got a thing for treats and belly rubs. For the first time, the dog has his say. (Of course he needed a little help with the typing, since he doesn't have opposable thumbs. That's where author Mark Carlson came in. Still, Musket is the brains of the outfit.) Mark and Musket tell their story with humor, emotion, and Musket's occasional contradictions. And at the end of the day, Musket somehow manages to be a great guide dog too. Confessions of a Guide Dog was written so a wonderful, devoted dog could reach out to those who haven't been lucky enough to meet him. He'll make you smile, laugh, cry, and want to give him treats. This is their story. (And they're sticking to it.)

To me, a card trick or a brain teaser is not just a way to impress and elude others, or a way to show off by figuring out a trick I've been shown; it's much more profound than that. To me, they are a way of opening up an entirely different way of thinking. Tricks helped me improve my ability to think outside the box, not limit myself while searching for solutions, and trained me in using every bit of information given to me in order to understand how things work, not only for tricks but on a day to day basis with life. Tricks are also a good way to prove to others that things they thought impossible are quite plausible. A simple card trick can leave even the most skeptical of spectators wondering how it happened and not only that; they might even beg you for the secret. Even more importantly, to me, a trick is the perfect way to put a smile on someone's face. This book contains all the material I have ever learned and performed. Each trick is explained in a step-by-step procedure making it easier to follow, and the requirements for each trick are explained along the way.

In addition to stage magic, sleight of hand tricks and conjuration, this book intensely examines the circus and street performance arts of fire eating, sword swallowing and juggling. Completing this impressive guide is an examination of ventriloquy and shadowgraphy - the art of making shapes and animals appear as shadows of your hand. Theatrical magic shows have ensued and endured for over a century, impressing and enrapturing audiences with their flamboyancy and apparent display of the impossible. Little wonder too, being as the departure from the norm of routine characterises much of what we term entertainment. Street and casual performances of magic meanwhile have gone on for much longer, stunning those fortunate enough to bear witness for aeons. The mission for this primer is multipurpose: the author's first desire to elevate the knowledge of tricks among the general spectator. His intention is not to upset the entertainment value magic no doubt offers, but to make its cunning and technical mastery all the more worthy of observation and admiration. What can be more impressive than seeing a magician who has, in all likelihood, practiced and performed tricks thousands of times do so with a genuine and preserved passion as a thrilled crowd looks on? Other than enlightening people, this guide's second purpose is its intention to motivate the aspirant magician. The pages are something of a test: if the reader finds the descriptions to be a 'spoiler' of sorts, then perhaps you are better involved with magic as a spectator, not a performer. If your reaction is different - as mine was many years ago as I was shown the workings of my first few staple magic tricks - and you are curious or eager, or even have ideas to improve or elaborate on what's written, then you may have the makings of a musician inside of you. The third and final motive is perhaps a little idealistic, but essentially has the benefit of all at heart. To the author, the wrapping of magic tricks in arcane secrecy is counterproductive; they should be unveiled for others to learn and be all the more fascinated. As for professional musicians who jealously guard their craft? They should invent new and even greater tricks - for the limit is only the imagination - and leave the foundations readily accessible by the interested public. This book was composed by professional magician and performer of over 20 years experience Charles G. Wright, so rest assured that you are in good (and dexterous) hands throughout the explanations, and will emerge knowledgeable.
