As a result of the global convergence of financial reporting standards, U.S. GAAP is changing profoundly. U.S. GAAP is also being abandoned by many public and private companies, and will eventually be replaced by a higher-quality set of global standards. The Convergence Guidebook for Corporate Financial Reporting provides the timely, practical guidance that CFOs, controllers, and other financial managers need in order to prepare for the impact of Convergence on their companies, departments, and careers. Guidebook readers will also learn why they must begin preparing for "the next big challenge in corporate financial reporting" now. Financial Reporting & Analysis (FR&A) by Revsine/Collins/Johnson/Mittelstaedt emphasizes both the process of financial reporting and the analysis of financial statements. This book employs a true "user" perspective by discussing the contracting and decision implications of accounting and this helps readers understand why accounting choices matter and to whom. Revsine, Collins, Johnson, and Mittelstaedt train their readers to be good financial detectives, able to read, use, and interpret the statements and most importantly understand how and why managers can utilize the flexibility in GAAP to manipulate the numbers for their own purposes. Significantly, the new edition emphasizes the differences and similarities between GAAP and IFRS, which is a critical component of this course.

There are 11 chapters in the FAR I course and this book focus on the essential 10 chapters. Each chapter contains learning objectives, an introduction, comprehensive discussion, summary and accompanied by practical and comprehensive illustrations with suggested solutions. To facilitate students understanding, a comprehensive set of revision questions are available at the end of each chapter with some clues to the answers. Written in simple English by experienced lecturers, students will find this book to be useful and friendly companion in their learning process. This book can also serves as a good and helpful teaching materials for lecturers.

Financial Reporting: First Take is designed to present the fundamental concepts of financial statements and their analysis to

business executives. The book has been class-tested for more than six years in executive masters programs in business (EMBA) throughout the United States and in a number of foreign countries. The goal is to equip business managers with a basic understanding of financial reports in a concise time frame. The book has four specific objectives for this audience: 1. Further the ability to speak the language of accounting 2. Deepen the understanding of the basics of financial recording and statement preparation 3. Enable readers to navigate annual reports and the financial disclosures therein 4. Assist in reading and evaluating financial statements In addition to executive education courses, the book has been used successfully in intensive "refresher" courses for masters students in specialized areas of business. The objectives are the same--to provide a quick background in financial reporting fundamentals on which readers can build. The book provides a practical, effective, and efficient skill-development learning process using the following features and/or learning principles. 1. Focus on fundamental and enduring concepts: The informational fundamentals of financial reporting are covered with a modest number of concepts that are stable over time. No attempt is made to address the broad set of technical nuances of accounting or financial analysis. 2. Focus on real world examples: The major unifying feature of the book is the study of the financial statements of 3M Company. Chapters 5-10 are devoted exclusively to understanding and using these statements. Even in Chapters 2 and 3, which are built around a hypothetical company, Pearl River, the discussion is as practical as possible. For example, the illustration of bookkeeping in Chapter 3 is tied directly to the impact of transactions and events on the financial statements of Pearl River. 3. Keep it straight forward: All topics are presented in a two-page spread with topic titles on the top left-hand side to help readers navigate the chapters. Graphics are widely used with relevant items highlighted to reinforce concepts. 4. Keep it understandable: The two-page spread results in fewer concepts on each page. Term boxes define terms on the same page they are initially introduced. Intuitive labels are used when possible to make concepts more understandable and memorable. The book is written in a conversational writing style in the first person with rhetorical questions and helpful directives. 5. Facilitate the development of a learning community: One of the hallmarks of executive education is its high level of interaction among participants. This book enhances these discussions by raising questions, focusing on key concepts, and through the judicious use of individual and group exercises. Copies of the latter are available from the authors. The book consists of the following ten chapters: Chapter 1: A Framework for Financial Reporting (24 pages) Chapter 2: Overview of Pearl River's Balance Sheets and Income Statements (28 pages) Chapter 3: Mechanics of Bookkeeping--Preparation of Pearl River's Financial Statements ((42 pages) Chapter 4: Generally Accepted Accounting Principles (30 pages) Chapter 5: Navigating 3M's Annual Report: Top Ten Items (28 pages) Chapter 6: Overview of 3M's Balance Sheet (58 pages) Chapter 7: Overview of 3M's Income Statement (26 pages) Chapter 8: Overview of 3M's Statement of Cash Flows (18 pages) Chapter 9: Overview of 3M's Statement of Equity (16 pages) Chapter 10: Ratio Analysis & It Role in Interpreting Financial Statements (40 pages)

While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.

The FASB Statements of Financial Accounting Concepts contains the full text of the seven Statements of Financial Accounting Concepts issued to date. The existing concepts are intended to serve the public interest by setting the objectives, qualitative characteristics, and other concepts that guide selection of economic events to be recognized and measured for financial reporting. Unlike a Statement of Financial Accounting Standards, a Statement of Financial Accounting Concepts does not establish Generally Accepted Accounting Principles.

Seminar paper from the year 2002 in the subject Business economics - Controlling, grade: 1,0, University of Hannover (Lehrstuhl für Controlling), course: Seminar zur "Financial Accounting Theory", 25 entries in the bibliography, language: English, abstract: This paper studies the decision-usefulness of accounting information and the implications of financial reports, especially against the background of efficient securities markets. The decision-usefulness of financial statements gained in importance in the literature of accounting research due to the decline in helpfulness for decision taking of traditional financial statements like earnings, cash flows and stock returns.¹ This deterioration is accompanied by a deficit of future-oriented indicators, in particular intangible assets, which are not integrated in the actual financial reporting requirements.² These outstanding problems lead to incompleteness of capital markets, which are tried to be solved by different mechanisms, e.g. penalties, incentives and voluntary disclosure, to attain to efficient securities markets, the social advantageous solution.³ Section 2 describes the requirements of efficient securities markets, its various forms and the origin of inefficient working securities markets. Chapter 3 illustrates the usefulness of financial statements for different constituencies, especially for investors and management, and the legal standards for mandatory disclosure. Division 4 expresses the information dilemma and presents diverse solutions for an approximation to social optimal allocations, i.e. allocations that diminish securities markets inefficiencies. Chapter 5 gives a short summary of this paper. 1 See LEV / ZAROWIN (Boundaries of Financial Reporting 1999), pp. 354 – 362. 2 See GÜNTHER / BEYER (Value Based Reporting 2001), pp. 1627 – 1629. 3 See SCOTT (Financial Accounting Theory 1997), pp. 81 – 82.

FINANCIAL ACCOUNTING is designed to prepare users to succeed as future business managers by emphasizing the business context of accounting, the interaction between accounting and business, and financial statement analysis. This text demonstrates how financial statements are useful and interesting tools for diagnosing a company's problems or strengths, and for making loan, investment, acquisition, employment and political decisions. Using actual financial statements the authors leverage students' everyday consumer experiences to link accounting terminology and practice with actual events that they already understand. Lastly, Journal Entries and the Accounting Cycle are de-emphasized – they're not covered until chapter 7 and after that they are only used sparingly.

The International Financial Reporting Standards are quite different from other sets of accounting standards, and are fundamentally different from US-GAAP, in that they are based on principles, and not on detailed rules. Financial Reporting under IFRS: A topic-based approach offers a global perspective on IFRS by presenting the prescribed rationale and principles and illustrating them through numerous examples from large international companies. It aims to develop the fundamental skills necessary to read and use the information contained in all types of financial statements, through examples, activities, questions and answers. The book is broadly divided into three sections. Section one examines the structure of the Balance Sheet and the Income Statement, their links and the accounting mechanisms used to prepare them. Section two deals with the identification, evaluation and reporting of Balance Sheet items. Section three covers the use of financial statements to analyze a firm's performance and its risks. Throughout the book special topics are covered, including Derivatives and Hedge accounting (IAS 39), Business Combination (IFRS 3) and Operating Segments (IFRS 8). Financial Reporting under IFRS is ideally suited to the needs of students of accounting and financial reporting, but all users of financial statements, from creditors and investors to suppliers, customers, employees and governments will benefit from its concise, topic-based approach.

Streamline financial statement preparation with this cross-referenced guide Financial Statement Disclosures Manual is a natural complement to Wiley GAAP, providing a complete set of tools for statement preparation. This useful reference is formatted in accordance with FASB Accounting Standards Codification® (ASC) schema, with information delineated as Presentation, Assets, Liabilities, Equity, Revenue, Expenses, and Broad Transactions. When used with other Wiley GAAP resources, this arrangement helps users perform additional research and easily find more detailed information on requirements, with disclosures referenced to FASB's ASC. Explicit examples enable easy customization, streamlining the statement preparation process and potentially improving the effectiveness of disclosures with clear presentation of information that is most important to users. Determining the correct wording and presentation formats for disclosures is a time consuming effort. Standards are continually updated, and the latest changes to revenue recognition impact virtually all financial statements. This book is a guide to enhanced disclosure as standardized by FASB, and works in conjunction with other Wiley GAAP products to provide a complete professional reference. Find specific GAAP codification and explanations quickly and easily Get up to speed on the latest developments and updates Follow references to relevant content in Wiley GAAP and the Disclosure Checklist Study expertly-prepared examples to understand GAAP applications Enhanced disclosure requirements have come about in response to accounting scandals, the proliferation of complicated instruments, and the pressure toward transparency. Keeping abreast of the latest developments – and their applications and requirements – is an essential but time-consuming part of the accountant's role. Financial Statement Disclosures Manual simplifies statement preparation by providing complete disclosures information, cross-referenced to relevant GAAP information and tools.

In August, 1976 the research seminar 'Decision-making in business' was organized at Nijenrode, The Netherlands School of Business. More than fifty scientists and practitioners from nine countries presented research papers in one of the six discussion groups. Some of them also presented some of their ideas in front of a large mixed audience at a one-day symposium. Many of the papers presented at Nijenrode were of such a high quality that the decision to publish a selection of them was an easy one. At the

same time the new series Nijenrode studies in business was initiated. All who were involved, the policy committee of the Nijenrode studies, the advisory and editorial board of the series, the publisher, and the organizing committee of the seminar and symposium, acclaimed the idea of publishing three volumes in the new series. A collection of eleven papers could be grouped under the title Trends in managerial and financial accounting. Another collection will be published as volume 2 of this series under the title Trends in financial decision-making, while volume 3 will consist of papers exploring the theme Trends in business ethics. The books are intended for those who are interested in new developments in the decision-making area. They are especially suitable for graduate or advanced undergraduate courses: volume 1 in managerial or financial accounting courses; volume 2 in courses on managerial finance, capital budgeting or decision making; and volume 3 in courses on business ethics or related fields.
