Most financial trading books read more like an infomercial than a book – this is different Would you jump out of an airplane without a parachute? Then why would you start making trades online before you learned what you were doing? It's crazy! But with deep discount brokers making it look so easy for individual investors, it's no wonder consumers today are lulled into a false sense of security. You can't rely on outdated textbooks and strategies anymore. But if you adapt, you can make a considerable fortune with these new market conditions. Here's just a fraction of what you'll discover inside: The best brokerage accounts for swing traders (setting this up right can save you \$1000+ a year in commissions) How social media moves asset prices, and how to always be first to act on these (do this and you'll almost always ensure lower entry prices than your competition) The only 3 strategies you need for swing trading success (despite what everyone else tells you, it's these 3 which will bring 90% of your profits) How to always ensure the right entry position for a trade How to spot under or overvalued stocks with 99% accuracy The "magic trading number": If you win this percentage of your trades, you'll make massive profits (lower than you think) The secret to finding your trading edge (hint: the risk-reward ratio isn't enough) When to invest, and more important when NOT to invest like Warren Buffett The 10 best traders to follow on Twitter for maximum profit opportunities The #1 thing new traders miss about aftermarket trading. Get this right and you'll have a huge advantage How to set a proper stop loss so you don't get stopped out prematurely. One of the biggest mistakes new traders make is having a stop loss which is too tight. Do this instead and you'll profit when the market moves in your favor. The "zen trader" strategy which makes you immune to losses (which although rare, will occur with any trading plan) A useful, yet barely known website which breaks company news faster than relying on mainstream news services. How to use the "other 80/20 rule" to profit from short term price movements. 3 profit securing lessons you can learn from the DOTCOM bubble Why a new trader should never trade cryptocurrency How one trader made \$1.4 million in a single day with 1 options trade, and why you shouldn't try to replicate their strategy "Hedge-Fund Style" money management for absolute beginners How to profit from legal marijuana (all the upside of cannabis growing companies but without the red tape and volatility) A simple technique you can do in just 5 minutes a day. This is used by top hedge fund traders, and almost always guarantees an increase in your percentage of winning trades A "backdoor" technique which lets the market do the work for you (an effective "passive trading" strategy and used by Wall Street all the time) ...and much, much more. You may have experienced various obnoxious and even misleading advertisements of easy, get rich trading strategies. This is not one of those. You won't have to spend thousands on expensive trading software or "magic bullet systems" In fact, you can get started using an online trading account and use free websites for your information (you'll find the best two in Chapter 7) All written in plain, easy to understand English. One of the most frequent problems for beginners is to understand what a chart is, how to read it, how to recognize the hidden signals inside it, how to interpret it, how to use the tools of technical analysis, but above all, what is the technical analysis? I wanted to create this book just to help those who have trouble with these points, those who would like to start but think it is too difficult to understand and tend to be discouraged. This book presents itself as a "quick" guide to technical analysis. I tried to summarize the fundamental concepts on the study of the charts, the various types, the technical analysis and the most known analysis tools, all this with the purpose of providing essential information on some of the topics considered more "difficult" than trading. A quick and rather simple guide where each topic is explained in a short space, without becoming bogged down in technicalities that would overload the mind of a beginner, focusing attention on basic concepts, operation, practice and some advice. I thought it advisable to insert a hundred images in this guide to help you understand better. You will also find examples and suggestions to be able to exercise and familiarize yourself with some concepts by applying them to your chart. In summary, this technical analysis guide can help you take the first steps on your platform and start interpreting your first trading signals. You can start using analysis tools with more awareness, and you can start with your experience. Warning! What you can expect from this book: You can expect pages that will explain to you what the technical analysis consists of and how the analysis tools (the most common) work. What you should not expect from this book: You will not find a way to earn; you will not find a magic trading strategy; you will not find "THE" method to put into practice the technical analysis because each trader develops one based on its characteristics. You will not find explanations on the technical analysis at the level of a 700-page manual ... remember that this is a quick guide. Personally, I think a book is just a help, and it is not enough to learn everything you need. While this book will be useful to guide you, you will still have to practice in the field, observe those who have been doing this activity for years and are successful, learn their strategies, attend courses and learn more every time you get the chance. After this introduction, we will start immediately with the types of graph and then move on to the analysis, so we will not dwell on what is trading and on the basis of the markets. If you think you need to start from scratch, then I suggest you first read my book "Forex Trading - Beginner's Guide: Learn the basics to start trading" by Reynard Mattison. In this way, you will have a clearer idea before you try the technical analysis topic.

There are a lot of pre-education and pre-trading decisions a beginner will need to make before you spend any money on trading or capitalizing an account to trade live with.
