The issues in the debates over ratifying the Constitution are fundamental to understanding the American Founding. Reading the words of the Federalists and Antifederalists offers unique insights into the principles of American Government. These insights are frequently lost in textbook accounts. Unfortunately, these works are too difficult for many students today to develop an interest. The vocabulary and length of these documents combine into a perfect storm of discouragement for even highly motivated readers. This hurts our understanding of these issues, and it cripples our ability to engage in the conversation started in 1787. These issues remain relevant and hotly contested. This edition seeks to fulfill two broad goals: 1) to, while still retaining the original words of the authors, make these debates accessible to students who would instead simply read online summaries of the texts and 2) to foster discussions on these vital issues. Each of these 52 documents have been trimmed to a manageable size to make them accessible while still being challenging. Each document also includes a series of questions to foster discussion. This edition brings together a coherent collection of primary source documents, making them ideal for use in advanced high school classes or introductory college courses. The included Document Based Questions will save time for instructors, and the collection as a whole will foster a conversation between readers today and the Founding Fathers of 1787. About the Editor: Charles Martindell teaches high school and college courses in Government and Western Civilization. In 2012, he received a Master of Arts degree in American History and Government from Ashland University, where he was honored with the Chairman's Award for Outstanding Performance. He also serves as an Ashbrook Ambassador with the Ashbrook Center at Ashland University. This guide breaks down the components of government documents librarianship into manageable, easy to understand parts. Lisa Ennis, a "tried by fire" documents librarian, begins by looking at career opportunities in both Federal Depository Libraries (FDLs) and non-depository libraries with government document collections. She discusses skills and traits; networking and training options; managing and administering people, paperwork, and collections; and both public service and technical service issues. She provides essential background on the GPO and the FDLP, covering the shift to a digital environment and publication of the new Electronic FDL Manual. Ennis's informative coverage is matched by an enthusiastic "can-do" approach that will appeal to any librarian considering or already engaged in government documents work.

Copyright law is a critical issue for authors, librarians, publishers, and information vendors. It is also a complex area, with many shades of gray. Librarians continually need to seek answers to questions ranging from the reproduction of copyrighted works for library users, through the performance of audiovisual works, to the digitization and display of protected works on library websites. This book presents updated versions of the author's copyright columns published in *Against the Grain*, the leading journal in acquisitions librarianship since the late 1990s. It is the first volume in the series *Charleston Insights in Library, Archival, and Information Sciences*. The aim of the *Charleston Insights* series is to focus on important topics in library and information science, presenting the issues in a relatively jargon-free way that is accessible to all types of information professionals, including librarians, publishers, and vendors, and this goal shapes the pragmatic and accessible tone of the book. The volume is presented in question-and-answer format. The questions are real, submitted by librarians, educators, and other information professionals who have attended the author's copyright law workshops and presentations or submitted them to her by e-mail or telephone. The author has selected the questions and answers that have general applicability. She has then arranged them into logical chapters, each prefaced by a short introduction to the topic. Because it is written in an accessible and clear style, readers may want to review the entire work or they can just access particular chapters or even specific questions as they need them. The volume includes an index to facilitate reference use.

Annotation Government documents--forms, brochures, letters, and policy papers--that are difficult to understand create problems both for the public they're intended to help and for government agencies. In this collection, researchers from five universities in the Netherlands survey recurring problems in government documents and offer possible solutions. The contributors are linguists, document designers, and other communication experts who have studied public documents both empirically and from a design point of view. Though the subject is Dutch documents, the text is in English, and the work may be of interest to those investigating government communication in other nations as well as those who produce similar documents in the private sector.
