The European discovery of the Americas in 1492 was one of the most important events of the Renaissance, and with it Christopher Columbus changed the course of world history. Now, five hundred years later, this 2-volume reference work will chart new courses in the study and understanding of Columbus and the Age of Discovery. Much more than an account of the man and his voyages, The Christopher Columbus Encyclopedia is a complete A-Z look at the world during this momentous era. In two volumes, The Christopher Columbus Encyclopedia contains more than 350 signed original articles ranging from 250 to more than 10,000 words, written by nearly 150 contributors from around the world. The work includes cross-references, bibliographies for each article, and a comprehensive index. The work is fully illustrated, with hundreds of maps, drawings and photographs.

Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series. Most of the papers appearing in volume 87 numbers, 1-2 are based on papers presented at the Colloquium on the Philosophy of Ludwig Wittgenstein held at the Department of Philosophy at Florida State University on 7-8 April 1989. We owe warm thanks to Florida State University for generously supporting this colloquium. The English translation of the chapter entitled 'Philosophie', from Wittgenstein's typescript

number 213 (von Wright), appears here with permission of Wittgenstein's literary heirs, without affecting existing copyrights. The original German version of this chapter was edited by Heikki Nyman and appeared in *Revue Internationale de Philosophie* 43 (1989), pp. 175-203. Jaakko Hintikka's article (87, No.2) first appeared in a shorter form in *The Times Literary Supplement* No. 4565 (28 September to 4 October 1990, p. 1030). The present version appears with the permission of *The Times Literary Supplement*, which is gratefully acknowledged. Our thanks are due to all the participants of the colloquium and the contributors to these special numbers.

Challenge students to write creatively and focus on grammatical skills with *Grammar and Writing Skills* for grades 7 and up. This 128-page book reinforces the fundamentals of the English language. Students grasp a well-rounded understanding of language skills, practice the skills with exercises, and apply those skills through creative writing assignments. The book includes explanations of important terms, unit tests, a glossary, and an answer key.

Includes papers which chart a flow of topics on computers and writing, beginning with models of how people write and how software can be developed to facilitate the various aspects of that process, and moving on to considerations in producing hypertext and computer-generated story writing.

This book examines how Massachusetts Normal Art School became the alma mater par excellence for generations of art educators, designers, and artists. The founding myth of American art education is the story of Walter Smith, the school's first principal. This historical case study argues that Smith's students formed the professional

network to disperse art education across the United States, establishing college art departments and supervising school art for industrial cities. As administrative progressives they created institutions and set norms for the growing field of art education. Nineteenth-century artists argued that anyone could learn to draw; by the 1920s, every child was an artist whose creativity waited to be awakened. Arguments for systematic art instruction under careful direction gave way to charismatic artist-teachers who sought to release artistic spirits. The task for art education had been redefined in terms of living the good life within a consumer culture of work and leisure.

Drawing on hitherto-unused sources this book represents a shift in the historiography of British education. At the centre of the investigation is Joseph Payne. He was one of the group of pioneers who founded the College of Preceptors in 1846 and in 1873 he was appointed to the first professorship of education in Britain, established by the College of Preceptors. By that date Payne had acquired a considerable reputation. He was a classroom practitioner of rare skill, the founder of two of the most successful Victorian private schools, the author of best-selling text-books, a scholar of note despite his lack of formal education, and a leading member of the College of Preceptors and such bodies as the Scholastic Registration Association, the Girls' Public Day School Trust, the Women's Education Union and the Social Science Association.

This is the first book which authoritatively reviews the UK expenditure on education from 1920 – 1955, both by local authorities and private schools. The

book takes the main elements of education in turn and discusses them in detail. There are original studies of local authority finance, of teachers' pay and of the economics of private education. It examines educational spending by social class and compares the growth of educational services in England and Wales, Scotland and Northern Ireland.

Are there evidence-based answers to the broad question "What explicit knowledge about language in teachers and/or students appears to enhance literacy development in some way"? Distinguished by its global perspective, its currency, and its comprehensiveness, *Beyond the Grammar Wars*: provides an historical overview of the debates around grammar and English/literacy teaching in four settings: the US, England, Scotland and Australia offers an up-to-date account of what the research is telling (and not telling) us about the effectiveness of certain kinds of grammar-based pedagogies in English/literacy classrooms takes readers into English/literacy classrooms through a range of examples of language/grammar-based pedagogies which have proven to be successful addresses metalinguistic issues related to changes in textual practices in a digital and multimodal age, and explores the challenges for educators who are committed to finding a "usable grammar" to contribute to teaching and learning in relation to these practices. All of the contributors are acknowledged experts in
