Developing and supporting literacy is an absolute priority for all early years settings and primary schools, and something of a national concern. By presenting extensive research evidence, Rachael Levy shows how some of our tried and tested approaches to teaching reading may be counter-productive, and are causing some young children to lose confidence in their abilities as readers. Through challenging accepted definitions and perspectives on reading, this book encourages the reader to reflect critically on the current reading curriculum, and to consider ways in which their own practice can be developed to match the changing literacy landscape of the 21st century. Placing the emphasis on the voices of the children themselves, the author looks at: - what it feels like to be a reader in the digital age - children's perceptions of reading - home and school reading - reading in multidimensional forms - the future teaching of reading Essential reading for all trainee and practising teachers, this critical examination of a vital topic will support all those who are interested in the way we can help future generations to become literate. This book will encourage researchers and practitioners alike to redefine their own views of literacy, and situate 'reading literacy' within the digital world in which young children now live.

The most important factor affecting student learning isn't standards, textbooks, or testing--it's teachers. And when it comes to improving learning, research has shown teachers what works. But the real challenge comes when it's time to do what works and do it well. In this book, Jane E. Pollock explains how making the right adjustments in four critical areas of practice—curriculum, instruction, assessment, and feedback—can help any teacher improve student learning significantly. Here, you'll find out how to -- Create a classroom curriculum document that's truly useful and incorporates robust concepts, generalizations, and procedures. -- Plan instruction that's focused on helping students become master learners who can apply information and skills, not just do schoolwork. -- Design varied classroom assessments that yield evidence of mastery and pinpoint where further instruction is required. -- Use criterion-based feedback to improve individual student achievement and refine instruction. Along with step-by-step procedures, practical guidelines, and specific models, this book features the voices of individual teachers who share their experience using the author's "Big Four" approach. Like them, you may find it's the missing link you need to transform your pedagogy and achieve unprecedented levels of both student success and professional satisfaction.

The year 2020 brought an unprecedented worldwide health crisis through the COVID-19 pandemic that has been affecting all sectors, including education. There were questions surrounding the effectiveness of online trainings for teachers, online teaching practices, the motivation and engagement of students, and the quality of learning and education in these times. Action research emerged to address these concerns, being a systematic process of inquiry using reflection within a cyclical model of planning, acting, implementing, evaluating, and continuous reflection. This method of research is employed with the expertise and passion from educators to better enhance online practices and education while using authentic learning and experiences. Using collaboration, social advocacy, and action research, there is the opportunity to advance teaching for students, families, and communities without a physical context involved. The Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research explores successful teaching and learning skills through the method of action research and intersects it with online learning in order to uncover best teaching practices in online platforms. This book showcases educational professionals' action research for solutions in advancing teaching and learning, the practical benefits of action research, recommendations for improving online teaching and learning, and a focus on professional growth as well as social justice advocacy. It highlights important topics including student learning, teacher collaboration, authentic learning, advocacy, and action research in both K-12 and higher education settings.
