This volume contains a refereed selection of revised full papers chosen from the contributions presented during the Third Annual Workshop held under the auspices of the ESPRIT Basic Research Action 6453 Types for Proofs and Programs. The workshop took place in Torino, Italy, in June 1995. Type theory is a formalism in which theorems and proofs, specifications and programs can be represented in a uniform way. The 19 papers included in the book deal with foundations of type theory, logical frameworks, and implementations and applications; all in all they constitute a state-of-the-art survey for the area of type theory.

This book focuses mainly on logical approaches to computational linguistics, but also discusses integrations with other approaches, presenting both classic and newly emerging theories and applications.Decades of research on theoretical work and practical applications have demonstrated that computational linguistics is a distinctively interdisciplinary area. There is convincing evidence that computational approaches to linguistics can benefit from research on the nature of human language, including from the perspective of its evolution. This book addresses various topics in computational theories of human language, covering grammar, syntax, and semantics. The common thread running through the research presented is the role of computer science, mathematical logic and other subjects of mathematics in computational linguistics and natural language processing (NLP). Promoting intelligent approaches to artificial intelligence (AI) and NLP, the book is intended for researchers and graduate students in the field.

Continues Balkoski's acclaimed multivolume history of the U.S. 29th Infantry Division in World War II

CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences. The database provides abstracts of journal articles and citations to book reviews drawn from over 1,800+ serials publications, and also provides abstracts of books, book chapters, dissertations, and conference papers.

1970- issued in 2 vols.: v. 1, General reference, social sciences, history, economics, business; v. 2, Fine arts, humanities, science and engineering.

Quick Reference to European VAT Compliance provides the information necessary to deal with common compliance challenges via a format that allows readers to readily locate pertinent guidance when needed. This highly practical reference distills the problem-solving process by anticipating the relevant challenges and providing reliable help. Quick Reference to European VAT Compliance consists of two distinct sections: - An overview of how the various VAT systems in Europe work, with particular attention paid to compliance issues; and - Detailed, country-specific VAT compliance profiles for each EU Member State plus Iceland, Norway and Switzerland. Authored by the experts at Deloitte's Global Tax Center (Europe), Quick Reference to European VAT Compliance is an indispensable tool for professionals seeking to proactively manage VAT compliance.

EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American-focused magazine.

Papers presented at the annual meeting of the American Statistical Association ...

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Investigates alleged communist control of the publications and international information exchange programs of the Institute of Pacific Relations. Also investigates alleged communist attempts to influence U.S. Far East policy. Includes discussion of Communist Party activities in Nazi Germany.
