This book constitutes the refereed proceedings of the 5th International Symposium on Static Analysis, SAS'98, held in Pisa, Italy, in September 1998. The 20 revised full papers presented were carefully reviewed and selected from a total of 48 submissions. Also included is an invited tutorial. The papers are organized in topical sections on data-flow analysis, logic programming, concurrency, abstract domains, partial evaluation, type inference, and optimization. The invited tutorial by David Schmidt and Bernhard Steffen is entitled "data-flow analysis as model checking of abstract interpretations".

This accessible guide to TV technology and the digital revolution includes full coverage of analogue systems (terrestrial, satellite and cable).

A quarterly journal of film history, theory, criticism, and practice.

Designed to make life a little easier by providing all the theoretical background necessary to understand sound reproduction, backed up with practical examples. Specialist terms - both musical and physical - are defined as they occur and plain English is used throughout. Analog and digital audio are considered as alternatives, and the advantages of both are stressed. Audio is only as good as the transducers employed, and consequently microphone and loudspeaker technology also feature heavily - making this the most comprehensive, up-to-date text currently available on all aspects of sound reproduction.

Sound is a new area of interest in the Arts and Humanities. The study of sound in cinema has only recently been established in Film and Media Studies. Furthermore, so far, attention has focused on Hollywood and European cinema in this regard. Reading sound from other world cinemas, particularly those from the global South, remains underexplored. As India is currently the world's largest producer of films with a formidable global presence, this book bridges the gap with a collection of interviews, introducing leading film industry sound practitioners from the subcontinent. The book examines historical developments from the advent of the talkies to present-day digital cinema productions, providing an embodied understanding of the unique Indian film sound world with new perspectives on cinematic narration in the practitioner's own words.
