An examination of how language functions in CLIL, based on a corpus of classroom interactions. Drawing on their wide experience as CLIL educators and researchers, the authors explore data collected in real CLIL classrooms from two interrelated perspectives: the CLIL classroom as an interactional context for developing language and content, and the genres and registers through which the meanings of the different academic subjects are enacted. From the analysis of this corpus of data, the authors provide a rich description of how CLIL students' language works and may be expected to develop. Also available separately as a paperback. This volume builds a conceptual basis for assessment promoting learning in Content and Language Integrated Learning (CLIL) classrooms and proposes practical assessment approaches and activities that CLIL teachers can apply in the classroom. CLIL as an educational context is unique, as language and content learning happen simultaneously. The efficacy of such instruction has been studied extensively, but assessment in CLIL classrooms has drawn much less attention. The present volume aims to fill this gap. Arranged based on different ways that content and language are integrated in CLIL, the chapters in this book together build a solid theoretical basis for assessment promoting learning in CLIL classrooms. The authors discuss how assessment eliciting this integration yields insights into learners' abilities, but more importantly, how these insights are used to promote learning. The contributors to the volume together build the understanding of classroom-based assessment as cyclic, of teaching, learning, and assessment as inter-related, and of content and language in CLIL classrooms as a dialectical unity. This volume will spark interest in and discussion of classroom-based assessment in CLIL among CLIL educators and researchers, enable reflection of classroom assessment practices, and foster collaboration between CLIL teachers and researchers. The assessment approaches and activities discussed in the volume, in turn, will help educators understand the scope of applications of assessment and inspire them to adapt these to their own classrooms.

This book is a comprehensive text for those interested in formal education in sub-Saharan Africa. It provides a thought-provoking overview of the key educational ideas, themes and issues facing schooling in Africa today, by drawing on a wide literature to examine evidence concerning both educational policy and the working realities of primary and secondary schools in Africa. Based on the author's forty years of experience in researching and publishing on education in Africa, it takes a balanced but critical approach to analysing education in Africa, and discusses both positive and negative patterns across the region, as well as identifying differences between and within countries. The book examines major questions of educational provision, structure, content and process but does so in a way that raises challenging questions about gender, inequality, violence, authoritarianism and democracy in education as well the fundamental question of whether education is achieving its desired outcomes. It will be of great interest to students and researchers working in the fields of comparative and international education, education and international development, African education, African studies and development studies.

More and more, teachers in the lifelong learning sector are required to teach the 14-19 age group. This book is a practical guide to delivering learning to 14-19s. It begins by looking at the background to teaching 14-19 in FE and covers current pathways for achievement. Coverage of effective delivery of the new Diploma qualification is included, giving guidance on planning and assessment. It goes on to explore the challenges of behaviour, participation and re-engaging disaffected learners. Finally, it considers the wider context of building partnerships with schools and the needs of industry and employers.

This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: (a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to peoples' views about evolution, (b) designing, implementing, evaluating evolution education curriculum that reflects contemporary evolution understanding, and (c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

This collection presents new investigations into the role of heritage languages and the correlation between culture and language from a pedagogic and cosmopolitical point of view. Produced with University of Cambridge International Examinations, the Toolkit helps teachers to develop language awareness to support their students with the academic language they need to be successful in subjects taught through English. With reflective questions and activities, it can be used either for self-study or in training modules. Useful for both content and English language teachers, it is aimed primarily at those who teach students for whom English is not their first language - for example as part of a bilingual or CLIL programme or in an international English-medium school.
