The surface markings of deeper structures are indicated together with common sites for injection of local anaesthetic, accessing blood vessels, biopsying organs and making incisions. The accompanying text describes the anatomical features of the illustrated structures. Over 250 colour photographs with accompanying line drawings to indicate the position of major structures. The seven regionally organised chapters cover all areas of male and female anatomy. The text is closely aligned with the illustrations and highlights the relevance for the clinical examination of a patient. Includes appropriate radiological images to aid understanding. All line drawings now presented in colour to add clarity and improve the visual interpretation. Includes 20 new
