There is a highly significant and under-considered intersection and interaction between migration law and labour law. Labour lawyers have tended to regard migration law as generally speaking outside their purview, and migration lawyers have somewhat similarly tended to neglect labour law. Examining and clarifying the interactions between migration, migration law and labour law, the book particularly focuses on how migration status has a bearing on labour relations and the world of work. Contributors to the volume identify the many ways that migration law, as currently designed, divides the objectives of labour law, privileging employer concerns over the supply of labour over worker-protective concerns. In addition, migration law creates a particular form of status, which affects labour relations, thereby dividing the subjects of labour law. Written by leading scholars of labour law, migration law, and migration studies, this book provides a diverse and multidisciplinary approach to this field of legal interaction, of interest to academics, policymakers, legal practitioners, trade unions, and migrants' groups alike.
