This basic source for identification of U.S. manufacturers is arranged by product in a large multi-volume set. Includes: Products & services, Company profiles and Catalog file.

Vols. for 1964- have guides and journal lists.

Vols. for 1970-71 includes manufacturers' catalogs.

This book constitutes the refereed proceedings of the 12th International Conference on Tests and Proofs, TAP 2018, held as part of STAF 2018, in Toulouse, France, in June 2018. The 8 regular papers, 2 short papers, 1 invited

paper and 1 invited tutorial presented in this volume were carefully reviewed and selected from 18 submissions. The TAP conference promotes research in verification and formal methods that targets the interplay of proofs and testing: the advancement of techniques of each kind and their combination, with the ultimate goal of improving software and system dependability.

Includes annual summaries.

This book focuses on environmental footprints that have attracted considerable interest and discussion within academia, policy makers and the public as a tool to assess anthropogenic effects on the environment. It begins with an overview which provides a starting point for understanding the concept of environmental footprints. On the basis of a thorough investigation into the theoretical and methodological aspects of selected environmental footprints that have been widely adopted, a unified framework for structuring, categorizing and integrating various footprint indicators is established. Furthermore, the book brings clarity to the relationship between footprint analysis and life cycle assessment, and challenges the isolation of environmental footprints and planetary boundaries. The findings provide novel insights into the development of environmental footprints for environmental impact assessment and environmental sustainability assessment.
