A scholarly collection of timely essays on the behavioral science of peace With contributions from experts representing a wide variety of scholarly fields (behavioral and social sciences, philosophy, environmental science, anthropology and economics), Peace Ethology offers original essays on the most recent research and findings on the topic of the behavioral science of peace. This much-needed volume includes writings that examine four main areas of study: the proximate causation of peace, the developmental aspects of peace, the function and systems of peace and the evolution of peace. The popular belief persists that, by nature, humans are not pre-disposed to peace. However, archeological and paleontological evidence reveals that the vast majority of our time as a species has been spent in small hunter-gatherer bands that are basically peaceful and egalitarian in nature. The text also reveals that most of the earth's people are living in more peaceful societies than in centuries past. This hopeful compendium of essays: Contains writings from noted experts from a variety of academic studies Offers a social-psychological perspective on the causation of peaceful behavior Includes information on children's peacekeeping and peacemaking Presents ideas for overcoming social tension between police and civilians Provides the most recent thinking on the behavioral science of peace Written for students and academics of the behavioral and social sciences, Peace Ethology offers scholarly essays on the development, nature, and current state of peace.

A stimulating and innovative consideration of the concept, causes, and practice of peace in societies both ancient and modern, human and primate. We know a great deal about aggression, conflict, and war, but relatively little about peace, partially because it has been such a scarce phenomenon throughout history and in our own times. Peace is more than the absence of war. Peace requires special relationships, structures, and attitudes to promote and protect it. A Natural History of Peace provides the first broadly interdisciplinary examination of peace as viewed from the perspectives of social anthropology, primatology, archeology, psychology, political science, and economics. Among other notable features, this volume offers: a major theory concerning the evolution of peace and violence through human history; an in-depth comparative study of peaceful cultures with the goal of discovering what it is that makes them peaceful; one of the earliest reports of a new theory of the organization and collapse of ancient Maya civilization; a comparative examination of peace from the perspective of change, including the transition of one of the world's most violent societies to a relatively peaceful culture, and the decision-making process of terrorists who abandon violence; and a theory of political change that sees the conclusion of wars as uniquely creative periods in the evolution of peace among modern nations.

Peace, Conflict, and Violence brings together the key concepts, themes, theories, and practices that are defining peace psychology as we begin the 21st century. This comprehensive book is rooted in psychology, but includes a wide range of interpersonal, community, national and international contexts, multiple levels of analysis from micro to macro, and multi-disciplinary perspectives. It reflects the breadth of the field and captures the main intellectual currents in peace psychology. Presents 4 main currents: violence, social inequalities, peacemaking, and the pursuit of social justice. Contains a wide range of topics, including ethnic conflict, family violence, hate crimes, militarism, conflict management, social justice, nonviolent approaches to peace, and peace education. Ideal for readers interested in peace education, international studies, psychology, political science, anthropology, and sociology.

Providing an insightful and comprehensive introduction to the world of journal publishing within the fields of political science and international relations, this book offers in-depth guidance to maximize the likelihood of publishing success. Using their extensive experience as journal editors, Marijke Breuning and John Ishiyama also include crucial advice on how to select an appropriate journal, revise manuscripts, and how to increase the impact of published work

Peace research first emerged as an explicit academic area of study in the 1950s. Pioneers of peace research included Wright, Richardson and Lenz, and this book examines their contribution and that of the 'frontiersmen' who developed the study further, establishing peace research in its own right. Assessing the evolution, status and significance of peace research after fifty years, this novel and comprehensive book is relevant not only to students of peace research, but also to the developing debates within international relations and security studies. This is where there are real problems associated with the understanding of new problems and issues by reference to traditional concepts and categories. The book will attract a broad market in the fields of international relations, politics and social theory, as well as scholars in peace studies.

Violence against women has been a focus of transnational advocacy networks since the early 1980s, and the United Nations has, in intervening years, passed a series of resolutions to condemn, prevent, investigate, and punish this violence. Member states have committed to implementing this agenda. Yet, despite this buy-in at the global level, implementation at the domestic level remains uneven. Scholars have found that states are more likely to translate global standards into national laws when pressured by women's movements and international organizations. However, a dearth of research on the implementation at the national and street-levels of these international women's rights norms hampers an understanding of what happens after states pass laws. In Africa, where most states have not prioritized the prevention of violence against women, and the majority of perpetrators act with impunity, there is a major implementation gap. This gap is acute in some post-conflict countries on the continent. Thus, despite the presence of laws on various forms of violence against women in most African countries, justice remains inaccessible to most victims. In *Global Norms and Local Action*, Peace A. Medie studies the domestic implementation of international norms by examining how and why two post-conflict states in Africa, Liberia and Côte d'Ivoire, have differed in their responses to rape and domestic violence. Specifically, she looks at the roles of the United Nations and women's movements in the establishment of specialized criminal justice sector agencies, and the referral of cases for prosecution. She argues that variation in implementation in Liberia and Côte d'Ivoire can be explained by the levels of international and domestic pressures that states face and by the favorability of domestic political and institutional conditions. Medie's study is based on interviews with over 300 policymakers, bureaucrats, staff at the UN and NGOs, police officers, and survivors of domestic violence and rape an unprecedented depth of research into women's rights and gender violence norm implementation in post-conflict countries. Furthermore, through her interviews with survivors of violence, Medie explains not only how states implement anti-rape and anti-domestic violence norms, but also how women experience and are affected by these norms. She draws on this research to recommend that states adopt a

holistic approach to addressing violence against women.

Presents a controversial history of violence which argues that today's world is the most peaceful time in human existence, drawing on psychological insights into intrinsic values that are causing people to condemn violence as an acceptable measure.

This textbook provides a comprehensive overview of different methods and sources of information-gathering for peace and conflict students and researchers, as well as the challenges presented by such work. Research on conflict-ridden societies carries special challenges for the collection and evaluation of information about the conflict and its actors. First, due to the nature of information emerging, incentives to misrepresent and propaganda is common. News coverage is sometimes poor and reporting is often incomplete, selective and biased. Second, the sensitivity of the topic and the questions posed in peace and conflict research means that access to and the security of informants can be a problem. Peace and conflict research as a discipline encompasses a number of different approaches for obtaining empirical information which serve as a basis for analyzing various research topics.

This book provides a comprehensive overview of different methods and sources of information-gathering for students and researchers, as well as the challenges presented by such work. It offers: tools for evaluating sources and information suggestions on where different types of information can be found advice on using different types of sources, including news reports and written narratives practical guidelines for constructing large-scale datasets insights and guidelines for comparative fieldwork, in-depth interviews, focus groups, and surveys reflection and discussion on important ethical concerns in peace research This book will be of much interest for students and researchers of peace and conflict studies, conflict resolution, war and conflict studies, development studies, security studies and IR, as well as for NGO workers/researchers. Kristine Höglund is Associate Professor at the Department of Peace and Conflict Research, Uppsala University. She has a PhD in Peace and Conflict Research from Uppsala University Sweden (2004). She is author of *Peacemaking in the Shadow of Violence*. Magnus Öberg is Associate Professor at the Department of Peace and Conflict Research, Uppsala University, and Associate Editor of the *Journal of Peace Research* (since 2006). He has a PhD in Peace and Conflict Research from Uppsala University (2003) and is co-editor of *Resources, Governance, and Civil Conflict* (Routledge, 2008).

This book presents Nils Petter Gleditsch, a staff member of the Peace Research Institute of Oslo (PRIO) since 1964, a former editor of the *Journal for Peace Research* (1983-2010), a former president of the International Studies Association (2008-2009) and the recipient of several academic awards as a pioneer in the scientific analysis of war and peace. This unique anthology covers major themes in his distinguished career as a peace researcher. An autobiographical, critical retrospective puts his work on conflict and peace into a broader context, while a comprehensive bibliography documents his publications over a period of nearly 50 years. Part II documents his wide-ranging contributions on globalization, democratization and liberal peace, on international espionage, environmental security, climate change and conflict and on the decline of war and more generally of violence as a tool in conflict.

The book *Psychosocial Perspectives on Peacebuilding* offers a template for those dealing with the aftermath of armed conflict to look at peacebuilding through a psychosocial lens. This Volume, and the case studies that are in it, starts from the premise that armed conflict and the political violence that flows from it, are deeply contextual and that in dealing with the impact of armed conflict, context matters. The book argues for a conceptual shift, in which psychosocial practices are not merely about treating individuals and groups with context and culturally sensitive methods and approaches: the contributors argue that such interventions and practices should in themselves shape social change. This is of critical importance because the psychosocial method continually highlights how the social context is one of the primary causes of individual psychological distress. The chapters in this book describe experiences within very different contexts, including Guatemala, Jerusalem, Indian Kashmir, Mozambique, Northern Ireland, South Africa and Sri Lanka. The common thread between the case studies is that they each show how psychosocial interventions and practices can influence the peacebuilding environment and foster wider social change. *Psychosocial Perspectives on Peacebuilding* is essential reading for social and peace psychologists, as well as for students and researchers in the field of conflict and peace studies, and for psychosocial practitioners and those working in post-conflict areas for NGO's.

The Frontiers in Chemistry Editorial Office team are delighted to present the inaugural "Frontiers in Chemistry: Rising Stars" article collection, showcasing the high-quality work of internationally recognized researchers in the early stages of their independent careers. All Rising Star researchers featured within this collection were individually nominated by the Journal's Chief Editors in recognition of their potential to influence the future directions in their respective fields. The work presented here highlights the diversity of research performed across the entire breadth of the chemical sciences, and presents advances in theory, experiment and methodology with applications to compelling problems. This Editorial features the corresponding author(s) of each paper published within this important collection, ordered by section alphabetically, highlighting them as the great researchers of the future. The Frontiers in Chemistry Editorial Office team would like to thank each researcher who contributed their work to this collection. We would also like to personally thank our Chief Editors for their exemplary leadership of this article collection; their strong support and passion for this important, community-driven collection has ensured its

success and global impact. Laurent Mathey, PhD Journal Development Manager

This book presents a rich analysis of modern democracy protests globally, using qualitative and quantitative evidence to describe trends in causes and consequences.

The International Library of Politics and Comparative Government is an essential reference series which compiles the most significant journal articles in comparative politics over the past 30 years. It makes readily accessible to teachers, researchers and students, an extensive range of essays which, together, provide an indispensable basis for understanding both the established conceptual terrain and the new ground being broken in the rapidly changing field of comparative political analysis. These two volumes include articles which examine the system, the structure, the function and the future of the United Nations.

Author Padraig O'Malley is the subject of the new acclaimed documentary *The Peacemaker*. "Impressive . . . [O'Malley] has done a tremendous amount of research about the Israeli-Palestinian conflict." —The New York Times Book Review Disputes over settlements, the right of return, the rise of Hamas, recognition of Israel as a Jewish state, and other intractable issues have repeatedly derailed peace negotiations between Israel and Palestine. Now, in a book that is sure to spark controversy, renowned peacemaker Padraig O'Malley argues that the moment for a two-state solution has passed. After examining each issue and speaking with Palestinians and Israelis as well as negotiators directly involved in past summits, O'Malley concludes that even if such an agreement could be reached, it would be nearly impossible to implement given a variety of obstacles including the staggering costs involved, Palestine's political disunity and economic fragility, rapidly changing demographics in the region, Israel's continuing political shift to the right, global warming's effect on the water supply, and more. In this revelatory, hard-hitting book, O'Malley approaches the key issues pragmatically, without ideological bias, to show that we must find new frameworks for reconciliation if there is to be lasting peace between Palestine and Israel.

Private military organizations are a new and important feature of the international landscape. They offer control of potential massive violence to the highest bidder with very limited accountability. This book offers critical insights into both the phenomenon and the challenges of and potential for regulation.

The fourth edition provides standard information such as editorial focus, special issues, where indexed and abstracted, circulation, and acceptance rates. New foreign titles, e-mail addresses, and home page URLs are new features that give the users even more access to journal publishing.

"The withdrawal of US troops from Southeast Asia in 1973 and the reunification of Vietnam in 1975 did not necessarily mean peace to all American and Vietnamese people. For many, those historical landmarks were only the beginning of another struggle--a search for a missing piece of their lives. In *Postwar Journeys*, Hang Le-Tormala seeks to understand the transnational peace efforts of American and Vietnamese people since the Vietnam War ended. She defines peace efforts in their broadest sense, ranging from individuals' search for peace of mind to reconciliation and peaceful relations among former antagonists, searching for missing family members or friends, helping people overcome the ordeals resulting from the war, and meeting or working with former opponents for the betterment of their societies"--

Across the world, most people are well aware of ordinary criminal harms to person and property. Often committed by the powerless and poor, these individualized crimes are catalogued in the statistics collected annually by the FBI and by similar agencies in other developed nations. In contrast, the more harmful and systemic forms of injury to person and property committed by powerful and wealthy individuals, groups, and national states are neither calculated by governmental agencies nor annually reported by the mass media. As a result, most citizens of the world are unaware of the routinized "crimes of the powerful", even though they are more likely to experience harms and injuries from these types of organized offenses than they are from the atomized offenses of the powerless. Research on the crimes of the powerful brings together several areas of criminological focus, involving organizational and institutional networks of powerful people that commit crimes against workers, marketplaces, taxpayers and political systems, as well as acts of torture, terrorism, and genocide. This international handbook offers a comprehensive, authoritative and structural synthesis of these interrelated topics of criminological concern. It also explains why the crimes of the powerful are so difficult to control. Edited by internationally acclaimed criminologist Gregg Barak, this book reflects the state of the art of scholarly research, covering all the key areas including corporate, global, environmental, and state crimes. The handbook is a perfect resource for students and researchers engaged with explaining and controlling the crimes of the powerful, domestically and internationally.

How do government arrangements emerge? When and how does individual agency turn into collective agency? How do sensory experiences of violence, instability, etc affect the configuration of governance arrangements? When, why, and how are governance arrangements institutionalized? This book seeks to contribute to a non-normative conceptualization of the emergence and transformation of government arrangements, and addresses the under-theorization of actors and agency in conventional

governance theories. The editors and contributors theorize the concept of governance more concretely by analyzing the key actors and arrangements that define states of governance across different places and by examining its performance and development in particular settings and time periods. Each contribution to the edited volume is based on a case-study drawn from Africa, though the book argues that the core issues identified remain the same across the world, though in different empirical contexts. The contributions also range across key disciplines, from anthropology to sociology to political science. This ground-breaking volume addresses governance arrangements, discusses how social actors form such arrangements, and concludes by synthesizing an actor-centered understanding of political articulation to a general theory of governance. Scholars across disciplines such as political science, development studies, African studies, and sociology will find the book insightful.

The world's best negotiators have moved beyond the conventional wisdom by utilising cutting-edge studies and real-world results. It's time you did too. For over twenty years, David Sally has been teaching the art of negotiation at leading business schools and to executives at top companies. Now, using insights from social psychology and game theory, he delivers the proven, clear, actionable advice you need to stay one step ahead. By studying great examples, from Machiavelli to Wall Street, Xi Jinping and Barack Obama, he explores how the game's masters navigate the field strategically, craftily, even emotionally. The best know every negotiation is different and that your tactics are, in part, determined by your opponent. One Step Ahead will make sure that you have what it takes to come out on top, no matter who you are facing across the table.

The threat of ecological collapse is increasingly becoming a reality for the world's populations, both human and nonhuman; addressing this global challenge requires enormous cultural creativity and demands a diversity of perspectives, especially from the humanities. *Theology and Ecology Across the Disciplines* draws from a variety of academic disciplines and positions in order to explore the role and nature of environmental responsibility, especially where such themes intersect with religious or theological viewpoints. Covering disciplines such as history, philosophy, literature, politics, peace studies, economics, women's studies, and the ecological sciences as well as systematic and moral theology, the contributors emphasize how these positions have begun to develop distinct perspectives on urgent ecological issues, as well as pointing toward specific practices at the local and international level. This volume provides a multidisciplinary point of departure for urgent conversations on environmental responsibility that resist simplistic solutions. Rather, the contributors highlight the complex nature of modern ecology, and suggest creative ways forward in the situation of an apparently intractable global problem.

Contains twelve essays by scholars with distinctive perspectives on the question of scientific methods versus traditional methods in the comprehension of world affairs. Originally published in 1969. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Comprising essays by Peter Wallensteen, this book presents an overview of the thematic development of peace research, which has become one of the most dynamic and innovative areas of war and conflict studies. Peace research began in the 1950s when centres were formed in the USA and Europe, and today there are research institutes and departments on every continent, with teaching and research programs in most countries, and peace researchers contribute to the development of international studies, development research and security analysis. Prof. Wallensteen has been a witness to much of this since forming the Department of Peace and Conflict Research at Uppsala University in the late 1960s, and this book brings together thirteen of his articles with five new essays in one volume. The book presents articles on such key issues in peace research as the causes of war, conflict data, conflict diplomacy, non-violent sanctions and third-party diplomacy. In this way, it demonstrates how basic research can be conducted in fields often seen as 'unresearchable' and 'too complicated to deal with'. This volume shows that it is a matter of developing definitions, creating valid measures and finding ways of collecting information, recognising that innovations of this kind require supportive research environments. Furthermore, the results are not only useful for the growth of research activity itself, but for finding ways of dealing with actual conflicts. Thus, attention is also paid here to conflict prevention, peace agreements, sanctions and third-party activity for preventing and ending armed conflict, and building a lasting post-war peace. This book will be of great interest to all students of peace studies, conflict resolution, war and conflict studies, development studies and IR/security studies in general.

Creative Stress reveals with precision how we can and must transmute negative stress so that we can evolve individually and collectively. It offers the reader a steady climb to the higher reaches of human creativity and fulfillment, and is packed with compelling stories from O'Dea's exceptionally rich experience.

This volume critically examines what happens when war formally ends, the difficult and complex challenges and opportunities for winning the peace and reconciling divided communities. By reviewing a case study of the West African state of Sierra Leone, potential lessons for other parts of the world can be gained. Sierra Leone has emerged as a 'successful' model of liberal peacebuilding that is now popularly advertised and promoted by the international community as a powerful example of a country that they finally got right. Concerns about how successful a model Sierra Leone actually is, are outlined in this project. As such this volume: -

A new theoretical analysis of the rise of Donald Trump, Marine le Pen, Nigel Farage, Geert Wilders, Silvio Berlusconi, and Viktor Orbán.
