SAY CHEESE! Photoshop Elements has a reputation of being the little brother of Photoshop, a photo editor that doesn't have the muscle of its better-known sibling. The truth is the Elements version offers all the photo editing tools and power the vast majority of non-professional photographers and designers will ever need to get the results they want. This book helps even the absolute beginner get a grasp on the art of photo editing before sending them on their way to making common image fixes with a single click and taking full control of image layers to create a unique result. UPDATES: Learn the basics of Photoshop elements Edit photos Build layers Add artistic touches This short SitePoint book provides readers with a fun and yet practical introduction to Sinatra, a framework that makes web development with Ruby extremely simple. It's not intended to be a completely comprehensive guide to the framework or an in-depth Ruby tutorial, but will quickly get you up to speed with Sinatra and give you the confidence to start experimenting on your own. The book is built around a real-life example project: a content management system. It's a fun and easily understandable project that is used to demonstrate the concepts outlined in the book in a practical way. This is a clear, approachable and very easy-to-follow book that will get you to to speed with Sinatra in

Are you using YouTube to reach new customers for your business? If not consider these statistics: * More than 1 billion unique visitors to YouTube every month * Each month, more than 6 billion hours of video is watched * 100 hours of video are uploaded each minute * YouTube reaches more adults aged 18-34 than any cable network * Every second there are approximately 49,296 videos being viewed around the world * YouTube is the second largest search engine, right behind Google. If you are serious about growing your business, establishing your expertise in your market and attracting new customers, this step guide is for you.

Real estate day trading is using the Internet to buy and sell houses without leaving home. In many cases, the investor closes on a house and resells it the same day. Readers will learn the author's system for how to buy and sell 5-10 houses a month in today's market, using the Internet, phone, fax, and email to analyze, research, and find

the properties, buyers, and others needed for the transaction. Author Larry Goins has personally done deals in nine different states and has students in the US, Canada, Australia, New Zealand, Japan, China, Israel, the Philippines, and Denmark. Day trading can be used for wholesaling properties to other investors, retailing, lease options, short sales, foreclosure investing, etc. The basic steps are: Search online for potential properties to make offers on, using specific techniques for finding the right ones. Once an offer is accepted, usually within 1-2 weeks, put it on paper using clauses included in the book, and get the property inspected by a rehab contractor to get a free estimate of how much the repairs will cost. This is done by finding reputable contractors online and through referrals from realtors and through autoresponders. Order an appraisal. Sell it fast! Using the buyers list you have built on the internet through email marketing groups, social networking sites, blogs, free classified sites, bank-owned property sites, and more, send an email with the details of the property and instructions on how they can get the property under contract. Usually within two hours several potential buyers will reply. Set up a closing to buy it and to sell it on the same day; closings are about 30 minutes apart. Buy it at 10:00 and sell it at 10:30, for example. There are many ways to fund and close on the property. The book will contain step-by-step, easy processes for assignments, options, flex options, simultaneous closings, using hard money, private money, cash partners, and credit partners, none of which will require an investor's own cash or credit. Capitalize on teens' fascination with technology! Heart Education: Strategies, Lessons, Science, and Technology for Cardiovascular Fitness uses heart monitoring technology to help students learn concepts of cardiovascular fitness in a fun and innovative way. With the benefits of immediate and constant feedback, heart rate monitoring technology provides an engaging way for students to monitor their exercise sessions. Heart Education is based on the author's principles of Heart Zones Education, a comprehensive cardiovascular fitness program for physical education that examines wellness from the viewpoints of health, fitness, and athletic performance. Designed for students ages 11 to 18, Heart Education incorporates key aspects of the middle school and high school texts of Healthy Hearts in the Zone with the most current information on training and technology. Heart Education's 10-step program provides a series of modules with lesson plans, making it simple to present and easy to learn. The program gets

students using heart monitors from the start, letting them experience the rush of seeing their heart rate display. Students will learn functions of heart monitoring, how to apply them based on individual heart rate data, and how to set realistic physical activity goals. Teachers and students can choose from over 20 health and fitness workouts and apply strategies for athletic performance training using heart zones. Heart Education also tackles emotional fitness with structured plans to reduce stress, build positive connections with others, and contribute to a stable emotional outlook throughout the turbulent adolescent years. Also featured are lessons incorporating heart zones concepts into popular outdoor recreation activities such as adventure racing, cross-country skiing, snowshoeing, geocaching, and orienteering. This guidebook features •a lesson plan finder for easy reference to each lesson and its accompanying student materials; •a web resource containing all worksheets, station cards, training logs, and other forms for easy printing; •additional resources including a hardware guide for heart rate monitors, troubleshooting tips, and a series of circuit training stations for reassessment; and •recommended health assessments that support the strategies of the Heart Zone Training (HZT) system. Although some forms of technology may be viewed as contributing to an overall decline in physical activity, heart rate monitoring technology can provide a way to empower students to reach their personal health and fitness goals. Heart Education: Strategies, Lessons, Science, and Technology for Cardiovascular Fitness can help you maximize students' activity time with appealing, technology-based tools and scientifically sound strategies to positively affect their cardiovascular fitness.

Digital collections have already changed the ways users access and interact with an institution's materials. And small or medium-sized libraries, archives, museums, and historical societies face a unique set of challenges in regards to digital collections. They may have been unable to jump on the digitization bandwagon at its beginning due to competing priorities or lack of resources, and may now be struggling to get a digitization program in place to meet the evolving needs and expectations of their own users. The good news is that digital projects can
