Much more than just a study calendar, Saunders Student Nurse Planner, 2013-2014 will quickly become your lifeline with its wealth of organizational tools, clinical information, and helpful nursing school guidance all within one compact and versatile resource. Designed specifically for busy nursing students like you, this planner's strategies for time management and stress-reduction, NCLEX Exam review questions and study tips, and abundance of helpful clinical tools can significantly relieve the common aches and pains of nursing school and help you perform to your fullest potential both inside the classroom and throughout clinical practice. Davis's Q&A Review for the NCLEX-RN® gives you an overview of the latest test plan and outlines the test-taking strategies you need to prepare for the exam. Practice questions guide you through all of the content covered on the NCLEX, while two comprehensive exams test mastery of all subject areas covered on the NCLEX exam.

Learn pharmacology with the trusted text written specifically for surgical technologists! Pharmacology for the Surgical Technologist, 5th Edition ensures that as an integral member of the operating room team, you have an in-depth understanding of surgical medications. It covers everything a surg tech needs to know, including basic pharmacology, dosage calculations, safe handling of medications, terminology, and drug effects and side effects. If you are interested in becoming a surgical first assistant, many chapters also include coverage of advanced practice. Written by Tiffany Howe, CST, CSFA, FAST, MBA, an educator, and Angie Burton, CST, FAST, a practicing surg tech, this book covers all areas of pharmacology designated in the AST Core

Curriculum for Surgical Technology. Coverage of pharmacology meets the needs of the Surgical Technologist and includes all areas designated in the AST Core Curriculum for Surgical Technology, 6th Edition. Advanced Practice sections in each chapter provide content relating to the role of the first surgical assistant, helping students who want to advance to that role, and keeps this text useful as a professional reference. Concise three-part organization makes it easier for students to understand 1) the foundations of pharmacology, mathematics, and drug administration, 2) applications of pharmacology to the surgical environment, and 3) preoperative medications, types of anesthesia, and emergency situations. Caution boxes highlight drug alerts and surgical safety issues. Chapter study questions help students measure their knowledge and apply it to practice, and serve as an excellent review tool for classroom and certification exams. Insight boxes provide in-depth, cutting-edge information on specific products, procedures, and processes in the operating room. Learning features include Tech Tips from experts, Quick Question boxes with quizzes on foundational knowledge, Make It Simple boxes reviewing medical terminology, and Notes simplifying difficult concepts. Comprehensive glossary defines key terms highlighted in the text. Evolve companion website includes up-to-date drug monographs and additional exercises allowing students to practice math calculations. NEW! Coverage of new drugs includes antibiotics frequently used in the operating room. NEW! Content map correlates the content in the text to the requisite components of the pharmacology portion of the AST Core Curriculum for Surgical Technology. NEW author team blends theory and practice, with easy-to-read explanations from Tiffany Howe, CST, SDFA, FAST, MBA, an instructor of surgical technology, and Angie Burton, CST, FAST, a practitioner of surgical technology.

This handbook provides detailed coverage of drug classification in a unique, easy-access format. Over 90 drug prototypes are found on the left-hand pages and offer complete pharmacologic information. These prototypes are correlated with nursing process material located on the right-hand pages. Comprehensive drug tables contain generic and brand drug names; pregnancy categories; common routes and dosages; contraindications and drug, food and laboratory test interactions; pharmacokinetics and pharmacodynamics; therapeutic effects/uses and modes of action; protein binding capacity; half life; onset, peak and duration of drug action; and side effects/adverse reactions.

Records cataloging the healing powers of natural substances - plants, minerals, and animal byproducts - date back more than 4,000 years. There is no denying the effectiveness of traditional Chinese medicine, yet - until recently - the roots of this knowledge were largely lost in superstition and folklore. However, the use of herbs as an alternative medical treatment for many illnesses has increased steadily over the last decade, particularly since such herbs are categorized as "Natural Food Products" and are not yet subject to strict control by the FDA. Reports published in 1996 indicate that more than 10% of the US population has used herbal remedies. This book does not debate the value of Eastern or Western medicine but brings together Chinese herbal lore and Western scientific methods in a current, comprehensive treatise on the pharmacology of Chinese herbs. This second edition of *The Pharmacology of Chinese Herbs* presents the chemical composition, pharmacological action, toxicity, and therapeutic value of 473 herbs. The book: Classifies herbs according to their therapeutic value Informs how active ingredients in herbs may adversely interact with other herbs or drugs Evaluates which herbs have the potential for more investigation and possible use as drugs Describes the

pharmacological action of each herb based on recent scientific study and describes each herb according to Chinese pharmacopoeia and folk medicine Provides a review of Chinese medical history Presents information on how to use modern chemical techniques for enhancing or modifying herbal ingredients into better agents with more strength and activity What's New in the Second Edition Discussions on: Herbs and their specific effects on the immune system Herbs and fertility/infertility Anti-cancer herbs Anti-HIV herbs Anti-malarial herbs Ginseng and ginsenosides Anti-Alzheimer herbs Herbs affecting the nervous system

to test your knowledge of critical drug content. A collection of 16 unique "Roadside Assistance" video clips feature nationally known pharmacologist/speaker Alan P. Agins, PhD, who presents core pharmacology concepts with humor and analogy. Electronic flash cards provide a quick and easy way to memorize information about major drugs, drug classes, and pharmacologic principles. Care planning activities present brief case studies along with care plan templates that challenge you to use your pharmacology knowledge to plan patient care. Discussion questions facilitate virtual classroom discussions that are critical to learning in an online environment. Animations visually demonstrate and clarify complex concepts. An integrated drug handbook serves as a convenient reference and adds to the simulated, true-to-life clinical environment. An audio glossary presents both a definition and an audio pronunciation clip for approximately 1,400 terms and drug names. New organization strengthens the connection between the online course and the textbook by combining corresponding self-study modules, videos, and animations into folders that match up with each textbook unit. Dynamic new self-study modules go beyond basic pharmacologic principles to help you better understand key drug information related to areas such as HIV/AIDS, asthma, pain, peptic ulcer disease, antihypertensives, and antilipemic drugs.

master more complex processes. It will also be an invaluable resource for mentors supporting students." Dorothy Adam, Lecturer, The Robert Gordon University, UK "This book is a fundamental companion for all nurses wanting to become more proficient at medication calculations. The book is designed to find areas for improvements through a series of tests that start with a basic calculation review. Working through the book will help you to build confidence in the clinical environment." James Pearson-Jenkins, Senior Lecturer of Adult Acute Nursing, University of Wolverhampton, UK "This book is a useful tool for all nurses. I would recommend it for nursing staff undertaking intravenous or other medication management courses/ modules. It would also benefit nurses who have to undertake calculations tests as part of their new post or ongoing development." Amy Hutchinson, Student Nurse, University of Ulster, UK "Through simple examples, exercises and gradual progression, this book will help to remove the anxiety often associated with the arithmetic involved in drug calculations commonly encountered in clinical practice. The book will be of use to pre-registration and registered nurses alike. It provides an opportunity for both self assessment and practice, as such it will be a useful tool for improving confidence, competence and patient safety in a critical skill."
