The idea is that the fact families allow children to think about part-whole relationships while also helping them realize that subtraction and addition are opposites of one another (Cobb, 1987; Sun & Zhang, 2001; Zhou & Peverly, 2005)." - https://www.researchgate.net/publication/2422266096_Helping_a_Young_Child_Connect_Fact_Family_Addition_and_Subtraction_using_ToolsAnother

great thing about fact families in math: the answer is always there. One of the three values is the answer. That's the thing that makes it possible for kids in kindergarten, 1st grade or 2nd grade to identify the relationships so easily. What this book is NOT. This book is not designed with a particular influence like Singapore Math, Kumon, Everyday Math, or that kind of thing. It's strictly practice problems conveniently organized into workbook format... So YOU don't have to worry that this workbook is going to recommend a different learning style than what your child is being taught. Practice, practice, practice... and your child will be on their way. Traditional Chinese edition of My Side of The Mountain by Jean Craighead George. In Traditional Chinese. Annotation copyright Tsai Fong Books, Inc. Distributed by Tsai Fong Books, Inc.

A cumulative tale in which a wakeful flea atop a number of sleeping creatures causes a commotion with just one bite.
