No state has been so frequently mocked, maligned, or misunderstood as New Jersey. Yet the state is filled with amazing places and people who rarely receive the media attention they deserve. For the past twenty years Star-Ledger columnist Peter Genovese has been one of the rare voices singing the praises of his state's hidden wonders and gritty charms. For this new book, Genovese spent months scouring the state for rich stories and fascinating locations. New Jersey State of Mind takes us on a journey to over twenty-five of these places and introduces us to the colorful characters who live and work there, from a demolition derby driver to a female craft brewer, and from a Cuban celebrity chef to a Portuguese pig breeder. He also reveals the many natural wonders that have earned New Jersey its "Garden State" nickname, from cranberry bogs to river tours to wild bird sanctuaries. Collectively, these pieces paint a picture of a diverse state full of hard-working individuals who care for their communities. This book cuts through the myths and stereotypes surrounding the state and reveals the proud beating heart of the real New Jersey.

'An Introduction to Modern Vehicle Design' provides a thorough introduction to the many aspects of passenger car design in one volume. Starting with basic principles, the author builds up analysis procedures for all major aspects of vehicle and component design. Subjects of current interest to the motor industry, such as failure prevention, designing with modern materials, ergonomics and control systems are covered in detail, and the author concludes with a discussion on the future trends in automobile design. With contributions from both academics lecturing in motor vehicle engineering and those working in the industry, "An Introduction to Modern Vehicle Design" provides students with an excellent overview and background in the design of vehicles before they move on to specialised areas. Filling the niche between the more descriptive low level books and books which focus on specific areas of the design process, this unique volume is essential for all students of automotive engineering. Only book to cover the broad range of topics for automobile design and analysis procedures Each topic written by an expert with many years experience of the automotive industry Land Rover Defender, 90 and 110 Range - 30 Years of the Coil-Spring 4x4 Models charts the evolution of the coil-sprung Defender vehicles. Rover switched from leaf springs to coil springs for their utility models in 1983, it was a major step forward. The first coil-sprung model, the One Ten, replaced the Series III 109s. The short-wheelbase Ninety replaced the Series III 88s in 1984. From 1990, the models were all re-branded as Land Rover Defenders - 90, 110 and 140 - as the Land Rover range expanded and the marketing teams wanted a new name. Topics covered include: Origins of the Defender and early Ninety and One Ten Models; Development and use of the long-wheelbase models; Special conversions and Defenders built outside the UK, including in Australia and South Africa; Military and emergency service use of the Defender; Detailed examinations of engines and engineering, and the focus on diesel power; The future of the Defender. Charts the evolution of the coil-sprung Defender vehicles - the early 90 and 110 models from 1983 to present day. A must buy for all Land Rover enthusiasts. Superbly illustrated with 300 colour photographs. James Taylor is a well-known writer on classic motoring and a specialist on the Land Rover marque.

A quarter of a century ago, the Land Rover Discovery defined at a stroke how traditional 4 x 4 all-terrain ability could co-exist with family-estate practicality at an affordable price. Since 1989, the Discovery has gone through several iterations, but its essential qualities have remained unchanged. Practical, capable, and above all completely distinctive - the stepped roof seemed odd at first but now defines the Discovery shape - the Discovery has gone on to become one of Land Rover's best-loved products. Land Rover Discovery - 25 Years of the Family 4 x 4 looks in detail at the four generations of Discovery, including full specification details and production histories. Topics covered include the design and development of the original Discovery in the late 1980s, and the move into North America; the new 300Tdi engine and R380 gearbox of 1994, and the BMW takeover; Series II models of 1998-2004, and Land Rover's move from BMW to Ford; Discovery 3/'LR3' - 2004-2009, and the new TDV6 engine, developed by Jaguar; Discovery 4/'LR4' - the all-purpose family luxury car; special editions and derivatives of all four generations of Discovery, including Discoverys for the emergency services and the Camel Trophy and G4 Challenge competition vehicles. Superbly illustrated with 351 colour photographs.

These proceedings review progress in the development of lubricants and in the understanding of the phenomena of lubrication. The contents include papers on the impact of automotive technology and environmental factors upon lubricant requirements, elasto-hydrodynamic lubrication, boundary lubrication, machine elements, bio-tribology, metal forming, rheology, lubricated wear and very thin film (nano metre) lubrication. Presented by leading scientists from 22 different countries, these proceedings provide an up-to-date review of developments in this field.

The Rover Group - Company and Cars is a comprehensive history of the company and a guide to its products. Centring on the period of the official existence of the Rover Group, the book also examines the events leading up to its formation in 1986 and its controversial aftermath, following its dismemberment in 2000. The book is backed by first-hand accounts from Rover employees, as well as a foreword by Jon Moulton, the man behind several bids to acquire elements of the company. Including production histories and full specification guides to its cars, The Rover Group is a compelling insider's account of one of the most controversial periods in the British motor industry. The book covers: the beginnings of Rover and its place in British Leyland; Land Rover's expansion in the 1980s and how it led to the foundation of the Rover Group; Rover under British Aerospace and the sell-off to BMW; Rover's struggle under German management and BMW's disposal of the Group and finally, the aftermath of Rover's collapse - MG Rover, Land Rover and MINI. Fully illustrated with 270 historical and original colour photographs.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz – rich cars, poor quality. There's only one Saturn you should buy. Toyota – enough apologies: "when you mess up, 'fess up."
