A complete guide of how to use the Nikon Z6 and Z7 mirrorless digital cameras (Firmware version 2.20) --- There are myriad things that you can set in the Nikon Z6/Z7 user-interface --- it is simply overwhelming. This guide book shows you how to use the Nikon Z cameras in a logical, easy-to-follow way. I start with the basic controls of the camera, and then talk basic things such as release modes, exposure, focus, vibration control. Then I talk about white balance and Picture Control the Z cameras offer. I explain the "i" menu, My Menu, and User Presets U1, U2, U3. I struggled with the User Presets paradigm of the Nikon Z cameras, because the manual is not super-clear about its behavior. So I summarized for you what I was able to understand after some experiments and testing. I also explain some photo techniques such as Multiple exposure, HDR, Interval timer shooting and Time-lapse movie. The complete list of all the menu items are included. I added some shots I made to show you how wonderful the pictures came out to be, all straight from JPEG fine* FX format. I used Nikkor Z 24-70mm f/4 zoom lens, and some other F-mount Nikkor lenses via the FTZ adapter. I also tried a crazy-ultra-wide Voigtlander 10mm M-mount lens via an LM-NZ adapter. Thanks to the short flange distance of the Z-mount, almost any lens in the world can be attached to the Z body via some mount adapters. With the Nikon's introduction of their Z models, we are ushering in the new world of picture-taking -- The Arrival of the Mirrorless Era. You do not need a 500-page photo book to use the Nikon Z cameras. This book shows you how to use the Nikon Z cameras in a logical, easy-to-follow way. Enjoy!
