

## Le Voyage Dans La Lune 1902 A Trip To The Moon

An authoritative and comprehensive guide to cinema's first true blockbuster.

Le professeur Barbenfouillis et six autres savants s'organisent pour une expédition sur la lune...

Before the turn of the 20th century, before the nickelodeon, even before the first cinemas, George Méliès began making movies. In addition to the fairy tales and fantasies for which he is best known, he made films in every genre from newsreels and commercial advertisements to science fiction and pornography. This major study of Méliès's films interprets his work using the tools of modern film analysis and explores several myths about Méliès's role in film history.
